Use this helpful book to learn about the leadership tools to fuel success, grow your team, and become the visionary you were meant to be. True leadership isn't a matter of having a certain job or title. In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than "the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.

A brilliant work from the most influential philosopher since Sartre. In this indispensable work, a brilliant thinker suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

The New York Times bestseller by the acclaimed, bestselling author of *Start With Why* and *Together is Better*. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millennials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up

inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort—even their own survival—for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

In the spring of 1959, eighteen-year-old Bruce Lee returned to San Francisco, the city of his birth. Although the martial arts were widely unknown in America, Bruce encountered a robust fight culture in the Bay Area, populated with talented and trailblazing practitioners such as Lau Bun, Chinatown's aging kung fu patriarch; Wally Jay, the innovative Hawaiian jujitsu master; and James Lee, the Oakland street fighter. Regarded by some as a brash loudmouth and by others as a dynamic visionary, Bruce spent his first few years back in America advocating for a modern approach to the martial arts, and showing little regard for the damaged egos left in his wake. The year of 1964 would be an eventful one for Bruce, in which he would broadcast his dissenting worldview before the first great international martial arts gathering, and then defend it by facing down Wong Jack Man—Chinatown's young kung fu ace—in a legendary behind-closed-doors showdown. These events were a catalyst to the dawn of martial arts in America and a prelude to an icon. Based on over one hundred original interviews, *Striking Distance* chronicles Bruce Lee's formative days amid the heated martial arts proving ground that thrived on San Francisco Bay in the early 1960s.
