This—revised and enhanced—book examines the role of finance in supporting other functional areas while fostering an understanding of how financial decisions can create value. Corporate Finance covers areas related to estimating divisional cost of capital; executing a financing strategy; establishing debt and dividend policies consistent with the company's strategy and environment; choosing between dividends and stock repurchases; managing high growth and managing working capital. Its new topics include: - Corporate Financial Flexibility (Real options) - New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/ICWA students and executive education programs.

Artificial Intelligence in Accounting and Auditing Routledge

The impact of the global financial crisis on government funds has been significant, with squeezed budgets having to satisfy ever-increasing demands for public services. Managers working in the public sector are confronted daily with targets and demands that are often set in confusing accounting and financial language. In *Financial Management and Accounting in the Public Sector*, Gary Bandy employs a clear and concise narrative to introduce the core concepts of accounting and

financial management in the public sector and how to deliver services that represent value for money. This second edition has been revised and updated throughout, offering: an increased focus on post-crisis austerity more international examples of public financial management greater coverage of governance, accountability and risk management With a glossary of terms to help managers understand and be understood by accountants, as well as learning objectives, case studies and discussion questions, this practical textbook will help students of public management and administration to understand the financial and accounting aspects of managing public services.

Financial Management and Accounting in the Public Sector Financial Times/Prentice Hall Explaining the underlying logic behind financial ratios, this book adds to the discussion on the importance and implementation of ratios and illustrates the essential role that they play in company evaluations and investment screening. The author explores how ratios establish a proportional relationship between accounting and market data, and when well-integrated into a global company vision, can become powerful indicators capable of outlining relevant information and identifying warning signs. Going beyond merely listing possible ratios and looking further into their implementation, each ratio family is demonstrated with numerous graphs and practical case studies involving companies such as Amazon, Walmart and Alibaba. With a focus on behavioral finance and enterprise value, this innovative Palgrave Pivot will be of interest to investors, bankers and entrepreneurs, as well as finance scholars and students.

Determine a company's value, what drives it, and how to enhance value during a M&A *Valuation for M&A* lays out the steps for measuring and managing value creation in non-publicly traded entities, and helps investors, executives, and their advisors determine the optimum strategy to enhance both market value and strategic value and maximize return on investment. As a starting point in planning for a transaction, it is helpful to compute fair market value, which represents a "floor" value for the seller since it by definition represents a value agreed upon by any hypothetical willing and able buyer and seller. But for M&A, it is more important to compute investment value, which is the value of the target company to a strategic buyer (and which can vary with each prospective buyer). Prepare for the sale and acquisition of a firm Identify, quantify, and qualify the synergies that increase value to strategic buyers Get access to new chapters on fairness opinions and professional service firms Find a discussion of Roger Grabowski's writings on cost of capital, cross-border M&A, private cost of capital, intangible capital, and asset vs. stock transactions Inside, all the necessary tools you need to build and measure private company value is just a page away!

The future of politics after the pandemic COVID-19 exposed the pre-existing conditions of the current global crisis. Many Western states failed to protect their populations, while others were able to suppress the virus only with sweeping social restrictions. In contrast, many Asian countries were

able to make much more precise interventions. Everywhere, lockdown transformed everyday life, introducing an epidemiological view of society based on sensing, modeling, and filtering. What lessons are to be learned? *The Revenge of the Real* envisions a new positive biopolitics that recognizes that governance is literally a matter of life and death. We are grappling with multiple interconnected dilemmas—climate change, pandemics, the tensions between the individual and society—all of which have to be addressed on a planetary scale. Even when separated, we are still enmeshed. Can the world govern itself differently? What models and philosophies are needed? Bratton argues that instead of thinking of biotechnologies as something imposed on society, we must see them as essential to a politics of infrastructure, knowledge, and direct intervention. In this way, we can build a society based on a new rationality of inclusion, care, and prevention.
