AGUIRRE JAIDA

Reflection Harper Collins

If you want to help people learn from activities, exercises or experiences, this book is for you. This book fills a gap; it is the gap between doing an activity and learning from it. Plenty of books describe activities that are good for icebreaking, for team-building, for project management or for cross-cultural understanding, etc. A few of these books do give advice about reviewing (or debriefing) the activities, and 90% of the times it reads: "Here are some questions you can ask ...". How's that for boring and/or limiting? The result of such advice is that reviews are often dull and they dwell on what went wrong. When reading, they give off a feeling of discomfort. But why is that? Well, one of the reasons is because the same people speak up all the time. And that bores and might even annoy the rest of the participants. Thus, reviewing gets a bad name and people just want the review to finish as quickly as possible so that they can get on with the next activity. This is a rare book for two reasons: It is about reviewing (How many books have you come across on this subject?) It is about reviewing actively.(Which makes it not just rare, but unique.) With the help of this book, you can make reviews at least as engaging as the activities you are reviewing. No more discomfort. No more unwanted silences. No more superficial reviews. Just engaging and practical ways to help people learn from experience! How does that sound for a change?

Academic Language Literacy Jossey-Bass

Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

Student Teachers' Perspectives Duke University Press

Marjorie C. Ringler describes a professional development framework to teach principals and teachers the value of Academic Language Literacy (ALL) as the key to academic success. Typically mainstream classroom teachers and principals do not purchase books solely on academic language literacy because they see this as the domain of the ESL teacher. *Academic Language Literacy: Developing Instructional Leadership Skills* for

Principals and Teachers infuses this knowledge through a three pronged approach (content, context, and process) to effective professional development. This book addresses educators who are looking for a research based approach to improving academic success for students who come to school language deficient and deficient in the background knowledge necessary for success in school. An innovative approach to improving instruction illustrates that all teachers are language teachers if the language being taught is that of their content. Practical examples are included for instructional leaders to use when planning, implementing, and evaluating professional development. Teachers also get practical examples for integrating academic language literacy in all content areas. Strategies include both teaching and learning methods that promote academic language awareness and student-centered approaches.

Reflective Practice has become established as an essential feature of practice in psychotherapy and counselling in the UK, Europe, USA and some other parts of the world. However, the writing on reflective practice is arguably fragmented and scattered, and much of it is highly theoretical and abstract. This book draws together conceptual and ethical issues regarding reflective practice, including the meaning and development of the orientation. More importantly, it connects theory to day-to-day

practice in psychotherapy and counselling, addressing issues such as: What does reflective practice look like, in practice? How do we develop the skills in carrying it out? What ways does it assist practice? The book offers an exploration of reflective practice within different models of psychotherapy and counselling: CBT, psycho-dynamic and narrative, systemic family therapy, narrative and community approaches. Throughout, it employs a range of illustrations from a variety of clinical contexts to illustrate reflective practice in action. These include work with; children and families, adult mental health, trauma and abuse, learning disability, youth offending and bereavement and loss. The mix of theoretical background along with practical examples and exercises will be key for students and practitioners in the fields of psychotherapy and counselling. The book will be a spur to readers to challenge dominant assumptions and modes of clinical practice and help them fulfil the compulsory requirement for a reflective practice element in their training.
