Writers' & Artists'  
Yearbook 2018 OECD  
Publishing  
Driving Identities  
examines long-standing  
connections between  
popular music and the  
automotive industry and  
how this relationship has  
helped to construct and  
reflect various socio-  
cultural identities. It also  
challenges common  
assumptions regarding  
the divergences between  
industry and art, and  
reveals how music and  
sound are used to suture  
the putative divide  
between human and non-  
human. This book is a

ground-breaking inquiry  
into the relationship  
between popular music  
and automobiles, and into  
the mutual aesthetic and  
stylistic influences that  
have historically left their  
mark on both industries.  
Shaped by new  
historicism and cultural  
criticism, and by  
methodologies adapted  
from gender, LGBTQ+,  
and African-American  
studies, it makes an  
important contribution to  
understanding the  
complex and  
interconnected nature of  
identity and cultural  
formation. In its  
interdisciplinary  
approach, melding  
aspects of  
ethnomusicology,  
sociology, sound studies,

and business studies, it  
pushes musicological  
scholarship into a new  
consideration and  
awareness of the  
complexity of identity  
construction and of  
influences that inform our  
musical culture. The  
volume also provides  
analyses of the  
confluences and coactions  
of popular music and  
automotive products to  
highlight the mutual  
influences on their  
respective aesthetic and  
technical evolutions.  
Driving Identities is aimed  
at both academics and  
enthusiasts of automotive  
culture, popular music,  
and cultural studies in  
general. It is accompanied  
by an extensive online  
database appendix of car-

themed pop recordings and sheet music, searchable by year, artist, and title.

Korean families are changing fast. While birth rates remain low, Koreans are marrying and starting a family later than ever before, if at all. Couple-with-children households, the dominant household type in Korea until recently, will soon make up fewer than one quarter of all households. These changes will have a profound effect on Korea's future. Among other things, the Korean labour force is set to decline by about 2.5 million workers by 2040, with potential major implications for economic performance and the sustainability of public finances.

In this book, which was first published in 1956, Kentucky newspaper editor, publisher and writer Carlos B. Embry presents a detailed examination of the legal, political and socioeconomic status of Native Americans. "A devastating survey of the plight of the American Indian touches on the history that preceded the retreat to the reservations, the nature

of the Indian Bureau and its seeming philosophy of perpetual paternalism, and tells the story of the tribes through the viewpoint of their leaders."—Kirkus Review *Skills Training in Communication and Related Topics* Elsevier Health Sciences

A Simple Introduction

Bloomsbury Publishing Successful campaign manager and three-time mayor of Ashland, Oregon, Catherine Shaw presents a clear and concise, must-have handbook for navigating local campaigns. This handbook gives political novices and veterans alike a comprehensive and detailed plan for organizing, funding, publicizing, and winning local political campaigns. Finding the right message and targeting the right voters are clearly explained through specific examples, anecdotes, and illustrations. Shaw also provides in-depth information on assembling campaign teams, precinct analysis, canvassing, and dealing with the media. The Campaign Manager is an encouraging, lucid presentation of how to win elections at the local level. Updates to the fifth edition include an entirely new chapter on social media and its influence on campaigning, new coverage on how to put together a campaign plan, and a new appendix on how to campaign on a budget.

**Dealing with Conflict and Change** Routledge

A comprehensive and state-of-the-art overview

from internationally-recognized experts on white-collar crime covering a broad range of topics from many perspectives Law enforcement professionals and criminal justice scholars have debated the most appropriate definition of “white-collar crime” ever since Edwin Sutherland first coined the phrase in his speech to the American Sociological Society in 1939. The conceptual ambiguity surrounding the term has challenged efforts to construct a body of science that meaningfully informs policy and theory. The Handbook of White-Collar Crime is a unique re-framing of traditional discussions that discusses common topics of white-collar crime—who the offenders are, who the victims are, how these crimes are punished, theoretical explanations—while exploring how the choice of one definition over another affects research and scholarship on the subject. Providing a one-volume overview of research on white-collar crime, this book presents diverse perspectives from an international team of both established and newer scholars that review theory, policy, and

empirical work on a broad range of topics. Chapters explore the extent and cost of white-collar crimes, individual- as well as organizational- and macro-level theories of crime, law enforcement roles in prevention and intervention, crimes in Africa and South America, the influence of technology and globalization, and more. This important resource: Explores diverse implications for future theory, policy, and research on current and emerging issues in the field Clarifies distinct characteristics of specific types of offences within the general archetype of white-collar crime Includes chapters written by researchers from countries commonly underrepresented in the field Examines the real-world impact of ambiguous definitions of white-collar crime on prevention, investigation, and punishment Offers critical examination of how definitional decisions steer the direction of criminological scholarship Accessible to readers at the undergraduate level, yet equally relevant for experienced practitioners, academics, and researchers, *The Handbook of White-Collar*

Crime is an innovative, substantial contribution to contemporary scholarship in the field.

This book offers a vision of the future of electricity supply systems and CIGRE's views on the know-how that will be needed to manage the transition toward them. A variety of factors are driving a transition of electricity supply systems to new supply models, in particular the increasing use of renewable sources, environmental factors and developments in ICT technologies. These factors suggest that there are two possible models for power network development, and that those models are not necessarily exclusive: 1. An increasing importance of large networks for bulk transmission capable of interconnecting load regions and large centralized renewable generation resources, including offshore and of providing more interconnections between the various countries and energy markets. 2. An emergence of clusters of small, largely self-contained distribution networks, which include decentralized local

generation, energy storage and active customer participation, intelligently managed so that they operate as active networks providing local active and reactive support. The electricity supply systems of the future will likely include a combination of the above two models, since additional bulk connections and active distribution networks are needed in order to reach ambitious environmental, economic and security-reliability targets. This concise yet comprehensive reference resource on technological developments for future electrical systems has been written and reviewed by experts and the Chairs of the sixteen Study Committees that form the Technical Council of CIGRE.

From combating COVID-19 and climate change to tackling corruption and tax evasion, international organisations (IOs) play a critical role in helping countries find solutions to common problems. But for IOs to deliver optimal support to countries and their populations, the international instruments they develop need to be inclusive, well understood and have a tangible impact.

**Performing Medieval Drama in America** OECD Publishing

This book adopts a collectivist perspective on special interest tourism consumption, bringing together research on 'special interest tourism' and 'niche tourism' as well as more recent research into the interdisciplinary applications of the sociological concept of neo-tribes. It promotes a shift in perspective away from special interest tourism understood as a sum of similarly motivated individuals, to a collective view of special interest tourists who share common characteristics (e.g., shared values, beliefs and mutual interests) and group structures. This approach provides a

better understanding of groupings that are not unified by a common tourism motivation, but brought together by otherwise conditioned commonalities in actual behavior triggered by supply-side contexts (e.g., Airbnb). The book considers tourism micro-segments as consumer tribes (i.e., as symbolic communities) in which individuals are embedded and loosely bound together. As there is limited research on the collectivist perspective on

special interest tourism consumption, in the first part the book's conceptual/theoretical discourse contributes to a better understanding of 'groupings' in tourism behavior but also collectives that are not unified by a common tourism motivation. Presenting international examples, the book explores in Part 2 the group culture of a range of tourist tribes by describing emerging tourism micro-segments, identifying shared identities, and analyzing

their collective mechanisms.
