Statistical Concepts for the Behavioral
Sciences Verso Books

Why is there something rather than nothing? Does God exist? Does time flow? What are we? Do we have free will? What is truth? Metaphysics is concerned with ourselves and reality, and the most fundamental questions regarding existence. This clear and accessible introduction covers the central topics in metaphysics in a concise but

comprehensive way. Brian Garrett discusses the crucial concepts in a highly readable manner, easing the reader in with a look at some important philosophical problems. He addresses key areas of metaphysics: God Existence Modality Universals and particulars Facts Paradoxes of material constitution Causation Time Free will Personal identity Truth. This second edition has been thoroughly revised. Most chapters include substantial amounts of new material, and there are additional chapters on Existence, Modality, Facts and Paradoxes of Material Constitution. What is this thing called

Metaphysics? contains many helpful student-friendly features. Each chapter concludes with a useful summary of the main ideas discussed, a glossary of important terms, study questions, annotated further reading, and a guide to web resources. Text boxes provide bite-sized summaries of key concepts and major philosophers, and clear and interesting examples are used throughout. *CONCEPTS AND DESIGN* Routledge After Cooper Blake wakes from a serious car accident to find himself in the company of an attractive, tormented ghost, he keeps his visions to himself until

he discovers that two of his peers also hide supernatural abilities.

Manual of Skin Surgery Newnes

Two classics in one! Wonderfully spread out in one, annotated and illustrated, compact volume. Many vintage books are increasingly scarce and expensive. We published this volume in an affordable, modern, high-quality edition complete with a biography of the author. Includes: *Hard Times* (1854) *Oliver Twist* (1867)

Strategy for Energy Conservation in India Harvard University Press

It's hard to break out of a rut. For years, Nathan submerged himself into his job at St. Genevieve's. He enjoys teaching, hates faculty meetings, loves his science and has committed himself to the cycle of college life. Along the way, he's become resigned to being a gay man in a straight culture, a Jew among Catholics, and single in a world of couples. Then the brilliant Isaac Wolf appears in his classroom. Isaac's a few years older than his fellow students, gorgeous, self-composed and Jewish. Isaac has his own secrets, which Nathan finds out at the racy new club downtown where the boys who dance out front can be bought in the back room.

Nathan thinks he's about to get a lap dance, but behind the beaded curtain the man on his knees turns out to be Isaac. Nathan's mind isn't the only thing Isaac blows. Afterward, Nathan can't stop thinking about that night. The question is whether Nathan can let himself fall in love with a student, much less someone with Isaac's checkered past. Is it too late for a student to teach his professor the true nature of love and respect? This is a revised, author's edition of the first *Tarnished Souls* story, originally published in 2012 by Loose Id.

Judgment A&C Black

Lawrence presents inspirational and encouraging thoughts that will entice readers to explore their own spirituality and meaning for life. These prose poems give spiritual insight into life's meaning, fulfillment, and direction with a mainstream appeal.

The second book in the best-selling Big Bad Bite Series! Does he have his claws in her for good? Or is she just yanking his tail? Elena Demos's life has been turned upside down. Her mother has passed away, leaving Elena and her two half-sisters to deal with their mother's will and the crazy stipulations it contains. For the three sisters to inherit the substantial amount of money left behind, they have to go to work with two aunts they've never met in a family business-Amazon's Inc.- they know nothing about. If that isn't bad enough, Elena runs into the man who once broke her heart, and it's only their first day on the job. Gage Ivanov is a stupid beast. He let the woman who should be his mate go because she couldn't be told of his Other identity. Now Elena's back, but she refuses to give in to his demands for her to be his mate. The timing for all of this couldn't be worse, either, because Gage

and his circle of friends are trying to subdue a rogue pack of wolf shifters in Germany who threaten to out the Others to the world of humans. Will he be able to juggle the oncoming conflict and win back his mate? Claws, love bites and handcuffs - OH MY! Contains mature themes. "If you're looking for a fun and sexy paranormal romance you need to pick up Walk On The Striped Side, I'll never look at cat toys the same way... Fans of Shelly Laurenston and Jessica Sims will fall in love with Jessie Lane's Big Bad Bite series." - The Book Nympho
The American Negro, a Study Packt
 Publishing Ltd

This is an emotional new adult romance about two people struggling to escape others' expectations, and about a third person who changes all their lives. Ness watches girls fall over themselves for Evan's attention, but she has no interest in the hot English student who includes poetry in his seduction techniques. Evan is amused by the uptight girl who refuses to fall for his charms, and engages in a battle of wits to win her over. But Evan is struggling with a side of his life he keeps hidden and the secretive behaviour

threatens his new relationship with Ness. When everything falls apart, Ness and Evan are both faced with difficult choices. All because of Lucy.

A guide to improving your writing skills and avoiding common mistakes

Houghton Mifflin Harcourt
 Beyond simulation and algorithm development, many developers increasingly use MATLAB even for product deployment in computationally heavy fields. This often demands that MATLAB codes run faster by leveraging the distributed parallelism of Graphics Processing Units (GPUs). While MATLAB successfully provides high-level functions as a simulation tool for rapid prototyping, the underlying details and knowledge needed for utilizing GPUs make MATLAB users hesitate to step into it. Accelerating MATLAB with GPUs offers a primer on bridging this gap. Starting with the basics, setting up MATLAB for CUDA (in Windows, Linux and Mac OS X) and profiling, it then guides users through advanced topics such as CUDA libraries. The authors share their experience developing algorithms using MATLAB, C++ and GPUs for huge datasets, modifying MATLAB codes to

better utilize the computational power of GPUs, and integrating them into commercial software products. Throughout the book, they demonstrate many example codes that can be used as templates of C-MEX and CUDA codes for readers' projects. Download example codes from the publisher's website: <http://booksite.elsevier.com/9780124080805/> Shows how to accelerate MATLAB codes through the GPU for parallel processing, with minimal hardware knowledge Explains the related background on hardware, architecture and programming for ease of use Provides simple worked examples of MATLAB and CUDA C codes as well as templates that can be reused in real-world projects

2010 Usborne Publishing Limited
 Hacking Secret Ciphers with Python not only teaches you how to write in secret ciphers with paper and pencil. This book teaches you how to write your own cipher programs and also the hacking programs that can break the encrypted messages from these ciphers. Unfortunately, the programs in this book won't get the reader in trouble with the law (or rather, fortunately) but it is a guide on the basics

of both cryptography and the Python programming language. Instead of presenting a dull laundry list of concepts, this book provides the source code to several fun programming projects for adults and young adults.

When the levees broke in August 2005 as a result of Hurricane Katrina, 80 percent of the city of New Orleans was flooded, with a loss of 134,000 homes and 986 lives. In particular, the devastation hit the vulnerable communities the hardest: the old, the poor and the African American. The disaster exposed the hideous inequality of the city. In response to the disaster numerous plans, designs and projects were proposed. This bold, challenging and informed book gathers together the variety of responses from politicians, writers, architects and planners and searches for the answers of one of the most important issues of our age: How can

we plan for the future, creating a more robust and equal place?

“With good judgment, little else matters. Without it, nothing else matters.” Whether we’re talking about United States presidents, CEOs, Major League coaches, or wartime generals, leaders are remembered for their best and worst judgment calls. In the face of ambiguity, uncertainty, and conflicting demands, the quality of a leader’s judgment determines the fate of the entire organization. That’s why judgment is the essence of leadership. Yet despite its importance, judgment has always been a fairly murky concept. The leadership literature has been conspicuously quiet on what, exactly, defines it. Does judgment differ from common sense or gut instinct? Is it a product of luck? Of smarts? Or is there a process for making consistently good calls? Noel Tichy and Warren Bennis have each spent decades studying and teaching leadership and advising top CEOs such as Jack Welch and Howard Schultz. Now, in their first collaboration, they offer a powerful framework for making tough calls when the stakes are high and the right

path is far from obvious. They show how to recognize the critical moment before a judgment call, when swift and decisive action is essential, and also how to execute a decision after the call. Tichy and Bennis bring their three-dimensional model to life with interviews with world-class leaders who have thrived or suffered because of their judgment calls. These stories include:

- Jeff Immelt, CEO of General Electric, whose judgment to grow through research and development transformed GE into the world's premier technology growth company.
- Joel Klein, chancellor of the New York City Department of Education, who made tough calls about teachers, students, and parents while turning around a troubled school system.
- Jim McNerney, CEO of Boeing, whose strategic judgment helped him reinvigorate his company and restore a culture of trust and respect.
- The late general Wayne Downing, who found an unexpected opportunity in the midst of crisis when he led the Special Operations raid to capture Manuel Noriega.
- A. G. Lafley, CEO of Procter & Gamble, who bet \$57 billion to purchase Gillette and reinvent his company.
- Brad Anderson,

CEO of Best Buy, who made the call to commit totally to a customer-centric strategy and led his people to execute it. Whether you're running a small department or a global corporation, Judgment will give you a framework for evaluating any situation, making the call, and correcting if necessary during the execution phase. It will show you how to handle the overlapping domains of people, strategy, and crisis management. And it will help you teach your entire team to make the right call more often. No organization can afford to neglect this crucial discipline—and no previous book has ever brought it into such clear focus.

Just A Touch Kyle Books

This resource serves to educate lawyers and business professionals on how to draft the many types of "boilerplate" provisions, a legal term that refers to the standardized, one-size-fits-all provisions of a contract. Each chapter tackles one of 20 provisions and analyzes why it is important, the key legal and business issues raised, and how to draft the provision to suit a particular transaction. Such analysis not only helps readers better understand how to draft these

provisions in their contracts, but also helps them better understand the other party's process.

Crucible of Liberty Concept Publishing Company

Using first-person narratives collected through oral history interviews, this groundbreaking book collects black women's memories of their public and private lives during the period of legal segregation in the American South. *Gods, Emperors and Dormice* Penguin Never Far Away is a short story and resource for the parent who has a child that doesn't like to separate from them when time for school or work. It has illustrative pictures and content for the parent and child to interact before they go about their day.
