The Handbook of Islamic Banking comprises 25 studies by leading international experts on Islamic banking and finance specially commissioned to analyse the various debates and the current state of play in the field. From its origins thirty years ago, Islamic banking has expanded rapidly to become a distinctive and fast growing segment of the international banking and capital markets. Despite this expansion, Islamic banking still remains poorly understood in many parts of the Muslim world and continues to be a mystery in much of the West. This comprehensive Handbook provides a succinct analysis of the workings of Islamic banking and finance, accessible to a wide

range of readers. At the same time, it seeks to bring the current research agenda and the main issues on Islamic banking before a wider audience. Islamic banking offers, as an alternative to conventional interest-based financing methods, a wide variety of financial instruments and investment vehicles based on profit-and-loss sharing arrangements. These are all explored in detail along with other subjects such as governance and risk management, securities and investment, structured financing, accounting and regulation, economic development and globalization. M. Kabir Hassan, Mervyn Lewis and the other contributors have created an authoritative and original reference work, which will contribute to a wider understanding of Islamic banking as well as provoking further discussion and research. It will be invaluable to all scholars, researchers and policymakers with an interest in this subject.

Learning is an inseparable part of human experience. Understanding how adults learn and applying that expertise to practical everyday situations and relationships opens the window on a broader understanding of the capacity of the human mind. Dorothy MacKeracher's *Making Sense of Adult Learning* was first published in 1996, and was acclaimed for its readability and value as a reference tool. For the second edition of this essential work, MacKeracher has reorganized and revised many of the chapters to bring the text up-to-date for contemporary use. Concepts are presented from learning-centred and learner-centred perspectives, while related learning and teaching principles provide ideas about how one may enable others to learn more effectively. Written for people preparing to become adult educators, *Making Sense of Adult Learning* provides background information about the nature of adult learning and the characteristics that typify adult learners. This new edition will be quick to assert its place as the premier guide in the field.

Microfinance has long been recognized as having significant potential to create jobs and reduce poverty. But to meet the twin challenges of growth and sustainability, managers of microfinance institutions (MFIs) must not only understand essential management functions: they must also be armed with innovative ideas and strategies to succeed in today's increasingly competitive environment. This book provides a valuable overview of the key management principles necessary to optimize the services of MFIs. Volume 1 examines the markets and marketing of MFIs and captures the different ways that managers can communicate the value of their products and services. It offers strategies to prevent risk from occurring and, if it does occur, explains how to rectify the situation. Practical techniques for allocating costs and determining prices are also highlighted, as well as the importance of plans, budgets and reports. Volume 2 includes chapters on various product options, including savings, insurance, leasing, money transfers, and even grants and

nonfinancial services. It also explores how to combine different product menus to serve specific market segments, such as the ultra-poor, youth, women, and small and medium enterprises. It provides specific suggestions to manage diversification, including adapting the institutional culture, redistributing responsibilities, empowering staff, communicating with clients, reengineering systems, and managing change.

The Law of Peoples Edward Elgar Publishing

The Rules of the Game brings together essays written over the course of thirty years by a major figure in the field. McKinnon analyzes and compares a wide variety of important international monetary regimes: the establishment of the gold standard in the nineteenth century, Bretton Woods, the dollar standard, floating exchange rates, the European Monetary System, and current proposals for reforming world monetary arrangements. The essays are unique in that they specify precisely the rules of the game for each international monetary regime - past, present, and future. For ease of reference, the book offers boxed summaries of each set of rules and then discusses their advantages and disadvantages, from the gold standard down to the author's proposal for a common monetary standard for the twenty-first century.

The increasing number of older people in the United States has served to focus attention upon the processes of aging and the effectiveness of social programs for the elderly. In order to plan effective programs, accurate social measures are necessary. Now, more than ever before, researchers require conceptually explicit instruments designed to assess individual and social behaviors, attitudes, and traits in the elderly population. This is the first in a three-volume series designed to serve the needs of researchers, evaluators, and clinicians in assessing the instruments used in the field of aging. The measures review in Volume 1 focus on the cognitive reactions of older people to aging and on the assessments of aging made by people who are not yet old. This volume also contains the series introduction which explains the methods used for evaluating the instruments and assesses the status of gerontological measurement today. Each chapter is devoted to instruments in a particular subject area such as intellectual functioning, personality, self-esteem, and ethnic group identification. Most chapters are composed of three parts. First, there is a concise narrative review of the major theoretical concerns and measurement strategies within that particular research domain. The second part is a collection of abstracts, each of which presents a conceptual definition and a description of a specific instrument together with data about samples, reliability, validity, scaling properties, and correlations with age. Whenever possible the instruments themselves constitute the third part of the chapter.

Auditing counts! With recent incidents at WorldCom, Enron, Xerox, Tyco, and other companies, auditing has never been so important. Auditing is perhaps our single best defense in ensuring the integrity of our financial reporting system. That's why this new Eighth Edition of Boynton and Johnson's *Modern Auditing* focuses on decision making and the critical role auditors play in providing assurance about the integrity of the financial reporting system. Known for its clear writing and accessibility, this text provides comprehensive and integrated coverage of current developments in the environment, standards, and methodology of auditing. Features * Real-world examples relate issues discussed in the chapter to ethics, audit decision making, and the integrity of the financial reporting system. * Focus on Audit Decisions sections highlight key factors that influence an auditor's decisions. * Includes discussion of the role of the Public Company Accounting Oversight Board (PCAOB) Auditing Standards, and a chapter feature highlights PCAOB standards that differ from Generally Accepted Auditing Standards for private companies. * Expanded case material related to the integrated audit case (Mt. Hood Furniture) provides a variety of databases that allow students to utilize generalized audit software (IDEA) to accomplish various audit tasks. Multiple databases allow the case to be reused with different data from term to term. * A flowchart style chapter preview begins each chapter. * Chapter summaries reinforce important audit decisions included in the chapter. * End-of-chapter material organized by audit decisions provides a clear link between audit decisions discussed in each chapter and the problem material.

Why too much work and too little time is hurting workers and companies—and how a proven workplace redesign can benefit employees and the bottom line Today's ways of working are not working—even for professionals in "good" jobs. Responding to global competition and pressure from financial markets, companies are asking employees to do more with less, even as new technologies normalize 24/7 job expectations. In *Overload*, Erin Kelly and Phyllis Moen document how this new intensification of work creates chronic stress, leading to burnout, attrition, and underperformance. "Flexible" work policies and corporate lip service about "work-life balance" don't come close to fixing the problem. But this unhealthy and unsustainable situation can be changed—and *Overload* shows how. Drawing on five years of research, including hundreds of interviews with employees and managers, Kelly and Moen tell the story of a major experiment that they helped design and implement at a Fortune 500 firm. The company adopted creative and practical work redesigns that gave workers more control over how and where they worked and encouraged managers to evaluate performance in new ways. The result? Employees' health, well-being, and ability to manage their personal and work lives improved, while the company benefited from higher job satisfaction and lower turnover. And, as Kelly and Moen show, such changes can—and should—be made on a wide scale. Complete with advice about ways that employees, managers, and corporate leaders can begin to question and fix one of today's most serious workplace problems, *Overload* is an inspiring account about how rethinking and redesigning work could transform our lives and companies.
