NPTEL :: Mechanical Engineering - Mechanical Measurements ... Measurement is the process of comparing unknown magnitude of certain parameter with the known predefined standard of that parameter. For the measurements results to be accurate, two conditions should be met. Firstly, the standard which is used for comparison must be defined accurately and it should be universally accepted. The second important condition to be met for measurements is that the ... What is Measurement? What are Mechanical Measurements ... Mechanical Measurements 6th edition gives students a methodical, well thought-out presentation that covers fundamental issues common to all areas of measurement in Part One, followed by individual chapters on applied areas of measurement in Part Two. This modular format fits several different course formats and accommodates a wide variety of skill levels.
