CAMRYN NOBLE

The Wisdom of Unicorns Harper Collins

A one-of-a-kind blend of art, nature, and conservation, The Underwater Museum re-creates an awe-inspiring dive into the dazzling under-ocean sculpture parks of artist Jason deCaires Taylor. Taylor casts his life-size statues from a special kind of cement that facilitates reef growth, and sinks them to the ocean floor. There, over time, the artworks attract corals, algae, and fish, and evolve into beautiful and surreal installations that are also living reefs. This volume brings readers face to face with these wonders and explains the science behind their creation. Ocean enthusiasts, divers, art lovers, and anyone entranced by the natural world will be instantly engrossed by this pearl of a book.

The threatened species categories used in Red Data Books and Red Lists have been in place for almost 30 years. The IUCN Red List Categories and Criteria provide an easily and widely understood system for classifying species at high risk of global extinction, so as to focus attention on conservation measures designed to protect them. This latest version of the classification system was adopted by the IUCN Council in February 2001 and reflects comments from the IUCN and SSC memberships and the final meeting of the Criteria Review Working Group.

A boy looks up. He sees a Cardassian's hand on his shoulder and knows that this is usually a prelude to a beating or, if he is

fortunate enough, arrest. The boy knows how many disappeared during the Occupation of Bajor. So he does the one thing he can think of: he bites the Cardassian. Then the nightmare begins. He is ripped from the family that took him in as an orphan, clothed him, fed him, always loved him unconditionally. And no matter how earnest, how caring the commander of Deep Space 9 is, the boy knows this is all a horrible mistake. How can someone from Starfleet judge him by what he looks like, not by what he is? He prays to the Prophets; he is Bajoran. They all keep telling him that the test proves the large Cardassian man is his father, that the other Cardassian -- that oily gul -- took him away from his father. But the boy keeps telling them that he is Bajoran, he only wants to go home with his father. So they send Rugal home -- to Cardassia. On the homeworld of the Cardassian Union where sacrifice and devotion to the state are surpassed only by the government's need to keep its people in check, one very lonely boy discovers that if he doesn't resist, his life -- like those of so many others -- will be added to the tally of the never-ending sacrifice.

NEW YORK TIMES BESTSELLER "I come from a family forged by

tragedies and bound by a remarkable, unbreakable love," Hunter Biden writes in this deeply moving memoir of addiction, loss, and survival. When he was two years old, Hunter Biden was badly injured in a car accident that killed his mother and baby sister. In 2015, he suffered the devastating loss of his beloved big brother, Beau, who died of brain cancer at the age of forty-six. These hardships were compounded by the collapse of his marriage and a years-long battle with drug and alcohol addiction. In *Beautiful Things*, Hunter recounts his descent into substance abuse and his tortuous path to sobriety. The story ends with where Hunter is today—a sober married man with a new baby, finally able to appreciate the beautiful things in life.

Eyetracking Web Usability is based on one of the largest studies of eyetracking usability in existence. Best-selling author Jakob Nielsen and coauthor Kara Pernice used rigorous usability methodology and eyetracking technology to analyze 1.5 million instances where users look at Web sites to understand how the human eyes interact with design. Their findings will help designers, software developers, writers, editors, product managers, and advertisers understand what people see or don't see, when they look, and why. With their comprehensive three-year study, the authors confirmed many known Web design conventions and the book provides additional insights on those standards. They also discovered important new user behaviors that are revealed here for the first time. Using compelling eye gaze plots and heat maps, Nielsen and Pernice guide the reader through hundreds of examples of eye movements, demonstrating why some designs work and others don't. They also provide valuable advice for page layout, navigation menus, site elements, image selection, and advertising. This book is essential reading for anyone who is serious about doing business on the Web.

Meddy Teddy Simon and Schuster

În volumul *Filosofia Erosului* autorul luptă, asemenea lui Don Quijote, cu morile de vânt ale societății, mutilată de ipocrizie, ale moralei care sufocă sentimentele curate, consubstanțiale omului, și ale politicii dezumanizate. În capitolul intitulat *Erotonomia*, autorul încearcă să ne convingă de faptul că dreptul omului de a alege nu este mai important decât dreptul lui de a opta pentru modul în care vrea să iubească, dreptul la sănătate nu este mai important decât afecțiunea, fără care nu poate exista sănătatea, dreptul la educație nu este mai important decât obligația societății de a crea instituții de învățământ bazate pe valoarea

sentimentelor, iar dreptul la cultură este o iluzie atâta timp cât școala, societatea, statul nu asigură accesul individului la simboluri, la modele și la valori ale iubirii. Lucrarea utilizează un volum uriaș de informații din domeniul artei, culturii, religiei, dreptului și politicii, care constituie nu doar argumente pentru a schimba mentalitatea erotică, dar și pentru fundamentarea unei filosofii a iubirii. În capitolul intitulat *Erotosofia*, autorul destructurează prejudecățile și stereotipurile care mențin individul într-o mlaștină a simțurilor. Autorul relevă faptul că dușmanul iubirii nu este ura, ci falsitatea, impostura, minciuna, ridicate la rang de lege în cupluri, în familii, în secte și în comunități „supraerotice”. Din cauza lipsei de valori, erosul a ajuns să fie confundat cu sexualitatea, fiind considerat un apendice al senzualității.
