Cats are gorgeous pets, but just like humans, they are prone to a great number of diseases and problems that do not only damage the cat, but also the emotional stability of its loving owners. This book is designed and written for people who are considering to introduce their cats to essential oils and aromatherapy. It is a

wonderful and natural way to deal with problems that felines experience on a daily basis. It has been used for ages to treat different kinds of diseases and disorders and has been proven effective for both animals and humans. However, it is crucial to know what kinds of oils to use in different situations, especially when it comes to such fragile and sensitive creatures as cats. This book provides essential rules and basic information on aromatherapy for cats, as well as other uses for essential oils. The main issues covered in this book include; the types of oils to avoid when treating your cat, precautions and dangers concerning the use of essential oils on cats, importance of

pure essential oils, the types of oils suitable for cats, application techniques and methods of use for essential oils and 30 practical recipes to deal with the most common problems when using essential oils.

The use of essential oils has become increasingly widespread over the last few years. While wildly popular, scientific support about the positive health effects is limited and contradictory. This is particularly true when discussing health effects on your pet.

Before using any essential oil in or around your pet, it is important to remember that not all essential oils are the same.

Many essential oils on the market may say "100 percent pure" on the label, but they could contain substances that are actually quite toxic to animals and should be avoided. This book teaches you how essential oils work on animals and how to

introduce them to your pets. It explains the safety tips and procedures you should follow when applying essential oils to animals. You'll even discover how to treat sensitive cats!

Essential oils are known for their use in aromatherapy and alternative medicine. They're made from the highly concentrated scents of plants, herbs, and flowers, which are steamed or pressed to extract the "essence" out of the plant. Fans of essential oils say they have health benefits including stress relief, energy and mood boosting abilities, for use as digestive aids, and even as topical agents

for pain relief. But while herbal remedies have been used for centuries, many of the potential benefits touted as natural solutions have yet to be proven in scientific studies, or have not yet been approved by the FDA for therapeutic use. And for cat owners, it's best to use caution around essential oils, since eating or being exposed to many essential oils can actually be toxic to cats so A Scent-Sitive Subject and Your Cat will help you.
