This resource is designed for UK teachers. Charles Darwin and Evolution | Teaching Resources "Survival of the fittest" is a phrase that originated from Darwinian evolutionary theory as a way of describing the mechanism of natural selection. The biological concept of fitness is defined as reproductive success. In Darwinian terms the phrase is best understood as "Survival of the form that will leave the most copies of itself in successive generations." Herbert Spencer first used the phrase, after reading Charles Darwin's On the Origin of Species, in his Principles of Biology, in which he Survival of the fittest - Wikipedia Darwin was RIGHT: PhD student proves one of Darwin's theories of evolution after 140 years CHARLES DARWIN'S theory of evolution radically changed how scientists understand the

natural world and a ... Darwin's theory of evolution proof: Student confirms ... Natural selection is the idea that species that acquire adaptations favorable for their environment will pass those adaptations to their offspring. Eventually, only individuals with those favorable adaptations will survive, which is how the species changes over time or evolves through speciation. In the 1800s, after Darwin first published his book "On the Origin of Species," British economist Herbert Spencer used the term "survival of the fittest" in relation to Darwin's idea of natural ...
