"[An] excellent volume on the navy's air war in the Pacific during WWII . . . the author has almost certainly created the best one-volume study of the subject" (Booklist). In a grand sweeping narrative, *Pacific Air* tells the inspiring story of how, despite initial disastrous defeats, a generation of young naval aviators ultimately vanquished a superior Japanese air force and fleet in the Pacific. The instruments of the United States aviators' triumphs were the elegantly designed F4F Wildcat, F6F Hellcat, and the lethal TBF Avenger torpedo bomber. With superbly trained U.S. Navy and Marine Corps aviators at their controls, these planes became the most successful aerial weapons in naval history. A majestic portrait of a proud era from dual perspectives—the inventive minds of young aeronautical engineers and the deadly skills of even younger combat pilots—*Pacific Air* brings this important yet underappreciated chapter of World War II vividly to life.

In the City, the Werewolves are restless. Gabi is striving to get back to life as usual. Dealing with the aftermath of being kidnapped and tortured by Dante, wrapping her head around being a Dhampir, and trying to figure out Julius's unexpected

attitude as he withdraws from her and becomes cool and distant. As if that isn't enough to cope with, she receives the disturbing news that someone she cares about has been dragged unwillingly into her world after a brutal and calculated Werewolf attack. As rogue Werewolves run rampant through the City, it becomes clear there will be no gentle reintroduction to Gabi's duties as Hunter for the Societas Malus Venatori. Once again the Vampires join forces with the SMV to contain the threat, but the odds seem stacked against them and the casualties keep mounting. Tensions run high as the perpetrators manage to stay one step ahead of the Hunters and the senseless violence continues. No one suspects betrayal from within, until Gabi's pets unmask a traitor. But the traitor isn't the real threat and the war has only just begun. This time their nemesis isn't playing by any rules and no one is safe in this deadly, new game. Not even the Master Vampire of the City. As the undeniable chemistry between Gabi and Julius reignites, they realise the danger isn't only to the human population of the City, but threatens to overwhelm them all. What they finally uncover brings Gabi into very real conflict with the SMV Council and leaves her questioning her life-long allegiances. Not all monsters come in obvious monster packages and sometimes what you're fighting to protect is what you should be fighting against. Not everyone will walk away from this fight intact. Strap in, hang on and grab a breath while you can. All hell is about to break loose! "The Hellcat series is one wild ride ... one of the best new series to hit the dark urban fantasy world, ever! Two words: more, please." Diane Nelson (Sand in my Shoes Reviews)

The story of the Battle of Saipan has it all. Marines at war: on Pacific beaches, in hellish volcanic landscapes in places like Purple Heart Ridge, Death Valley, and Hell's Pocket, under a

commander known as "Howlin' Mad." Naval combat: carriers battling carriers from afar, fighters downing Japanese aircraft, submarines sinking carriers. Marine-army rivalry. Fanatical Japanese defense and resistance. A turning point of the Pacific War. James Hallas reconstructs the full panorama of Saipan in a way that no recent chronicler of the battle has done. In its comprehensiveness, attention to detail, scope of research, and ultimate focus on the men who fought and won the battle on the beaches and at and above the sea, it rivals Richard Frank's modern classic Guadalcanal. This is the definitive military history of the Battle of Saipan.

First flown in 1940, the prototype Vought F4U Corsair instantly became the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine driving an enormous 13 feet 4 inch propeller, the first Corsairs were capable of 417mph. This figure would rise to nearly 450mph in later versions despite the fact that fuel load and overall weight was increased. Production began in 1941, not only by Vought but also by Goodyear and Brewster. The F4U entered service with the US Navy in September 1942, although carrier-borne operations were initiated a little later not by the Americans but by the British Fleet Air Arm. The aircraft subsequently came to be extensively used from land and sea by the US Marines, Royal Navy, and Royal New Zealand Air Force. Famous squadrons like VMF-214 'The Black Sheep' and VF-17 'Jolly Rogers', along with many others, maintained total ascendancy over the Japanese for the rest of the war - a remarkable achievement for a single type. After the Second World War, the Corsair stayed in production and was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have achieved significant success in

air races and more and more are being restored to fly for museums and warbird enthusiasts the world over. Martin Bowman's comprehensive new book combines technical information and detailed development history with a fascinating combat history told, in many cases, by the Second World War pilots themselves. Well researched, readable, and illustrated with dozens of rare and previously unpublished photographs, *The Men Who Flew the Vought F4U Corsair* is the perfect book for any fan of the 'bent wing bird'.

The last Pacific campaign of World War II was the most violent on record. Vice Admiral Marc Mitscher's Task Force 58 carriers had conducted air strikes on mainland Japan and supported the Iwo Jima landings, but his aviators were sorely tested once the Okinawa campaign commenced on 1 April 1945. Rain of Steel follows Navy and Marine carrier aviators in the desperate air battles to control the kamikazes directed by Vice Admiral Matome Ugaki. The latter would unleash ten different Kikusui aerial suicide operations, one including a naval force built around the world's most powerful battleship, the 71,000-ton Yamato. These battles are related largely through the words and experiences of some of the last living U.S. fighter aces of World War II. More than 1,900 kamikaze sorties—and thousands more traditional attack aircraft—would be launched against the U.S. Navy's warships, radar picket ships, and amphibious vessels during the Okinawa campaign. In this time, Navy, Marine, and Army Air Force pilots would claim some 2,326 aerial victories. The most successful four-man fighter division in U.S. Navy history would be crowned during the fight against Ugaki's kamikazes. The Japanese named the campaign *tetsu no ame* ("rain of steel"), often referred to in English as "typhoon of steel."
