After more than 30 years
of reformations in
agriculture,
manufacturing and trade
and industry, China's
economy has grown to
become the second
largest in the world. This
book examines the
contributions of dynamic
entrepreneurs to the
economic development of
mainland China and Hong
Kong - an analysis that is
largely lacking in existing
studies China's economic
stronghold. This book
adopts theories of
entrepreneurship and
market processes as

major analytical frameworks to conclude that entrepreneurship is the true engine of growth in mainland China and Hong Kong. Chinese Entrepreneurship focuses on the knowledge drivers and systemic challenges of these businesses to examine how entrepreneurs under uncertainty identify and pursue profit opportunities, and how their efforts have enhanced China's economic dynamics. This book offers vital insight to students, teachers and

researchers of Chinese business and economics, along with Chinese culture and expanding economies.

Go-to-Market Strategies for Women Entrepreneurs

Social entrepreneurship is a growing area, and we frequently hear of new ventures committed to social change. In academia, however, social entrepreneurship has typically been taught as a 'version' of entrepreneurship, ignoring the unique structure, challenges and

goals of the social venture. In their new book, Coleman and Kariv draw on the latest theory and research to provide boundaries to the definition of social entrepreneurship, discussing both what it is, and what it is not. The book answers several key questions: Who are social entrepreneurs? What is the process for identifying and solving a social need? What are the differences between for-profit and not-for-profit social ventures? What is the role of innovation? How do we

develop high performing firms? How do we measure success? The focus on context allows students to appreciate how social entrepreneurship develops and operates in different countries and cultures, lending a global perspective to the book. Combined with rich pedagogy and a companion website, it provides students with all the learning tools they need to grasp this important subject.

What is innovation and what does it take to make it work? How can innovation management and governance help to create and capture new value towards a sustainable future? This reader contains several 'op-eds' (op-ed = short for 'opposite the editorial page') on innovation management and urban sustainability matters written between 2012 and 2020 for Singapore-based

print media aimed at providing interested readers with deeper insights into key enablers of effective innovation governance at corporate levels. The bite-sized commentaries on innovation matters are loosely structured with regards to Leadership & Strategy, People & Organisational Culture, Innovation Processes, Knowledge & Learning as well as Innovation Governance. Besides three case studies of innovation award winners (Singapore Airlines;

National Library Board Singapore; Qian Hu Corporation Ltd.), the book also entails reflections about the 'smart city' strategies of Singapore, Berlin (Germany) and Barcelona (Spain) aimed at enhancing sustainability and liveability. This resource book is essential reading for anyone interested in acquiring innovation management and governance know how — from graduate students and advanced undergraduates to innovation practitioners in

business and society as well as start-up founders and municipal leaders.

Creating and Exploring Success

IGI Global This Research Handbook argues that the study of entrepreneurs as leaders is a gap in both the leadership and the entrepreneurship literatures. With conceptual and empirical chapters from a wide range of cultures and entrepreneurship and leadership ecosystems, the Research Handbook for the first time produces a systematic overview of

the entrepreneurial leadership field, providing a state of the art perspective and highlighting unanswered questions and opportunities for further research. It consolidates existing theory development, stimulates new conceptual thinking and includes path-breaking empirical explorations.

A Global Research Perspective Edward Elgar Pub
Global Business Leadership discusses the urgent issues facing

global business leaders and presents seven strategies found necessary for successful intercultural business ventures. It provides business professionals and students with insight into the failure of businesses to prepare leaders for stepping into complex cultural contexts. The Geoleadership Model developed by Dr. Wibbeke is applied to global business situations using cases taken from leading companies such as Google and eBay. The book uses a case study

format to present salient issues related to intercultural leadership and then principles of the model are applied to the case in discussion format. The concepts of care, communication, consciousness, change, capability and others are analyzed in relation to how each concept is seen in different parts of the business world. Each chapter concludes with a "bottom line" example of how each Geoleadership concept directly affects business results. Global Business Leadership also

provides instruction about entry into cultural contexts, negotiating, preventing and managing cultural-based local-global conflict, and preparing global leaders to increase intercultural awareness and sensitivity. Dr. Wibbeke founded and managed the leading Internet website (Web of Culture) for cross-cultural information on the Internet and shares such global experiences with other would-be globetrotters. This book examines the vital nature of the subject of leadership in Asia and looks, in particular, at the processes and practices within the Asia Pacific region. It describes how leadership processes differ across various regions and teaches managers how to better employ these processes in order to improve the success of their organisations. The work moves beyond looking only at Western ideas and explores further

leadership perspectives based on differing cultural foundations. It considers the influences of Confucianism, Daoism, Mohism and Legalism and also reflects the character of different leadership styles, such as paternalistic, benevolent transactional and transformational styles, as well as authentic and entrepreneurial approaches. Throughout the text, a wide range of international contributors adopt an array of leadership and other theories, cases, sectors

and methods to discuss leadership in Asia. This book was originally published as a special issue of the Asia Pacific Business Review.

Contextual Embeddedness of Women's Entrepreneurship brings together a range of research that provides powerful insights into the influences and restraints within a diverse set of

gendered contexts including social, political, institutional, religious, patriarchal, cultural, family, and economic, in which female entrepreneurs around the world operate their businesses. In doing so, the contributing authors demonstrate not only the importance of studying the contexts in how they shape women's entrepreneurial activities, but also how female entrepreneurs through their endeavours modify these contexts. Collectively, the edited

collection's studies make a substantial contribution to the contextual embeddedness of women's entrepreneurial activity, provide numerous insights, and provoke fruitful directions for future research on the important role of the contexts in which women's entrepreneurial activities take place. This innovative and wide-ranging research anthology seeks to reframe and redirect research on gender and entrepreneurship and will appeal to all those

interested in learning more about female entrepreneurship. *Global Business Leadership Development for the Fourth Industrial Revolution* IGI Global Drawing upon research and practitioner narratives from management, leadership, organizational studies, entrepreneurship and sustainable business domains, this book explores the many pathways that enable emerging countries to transform knowledge into action to achieve

economic and sustainable development. The authors take a holistic approach to 'transforming knowledge' that goes beyond the mere 'application of knowledge' to include the assimilation, adaptation, and contextualization of knowledge to suit the unique contexts, needs and conditions existing in emerging countries. They then presents success stories and case studies comprising innovative solutions for emerging economies that practitioners can utilize. Current research in

management is highlighted by bringing together academics, practitioners, policy-makers and interest groups from diverse regions and perspectives.

Innovative Case Studies and Solutions for Emerging Economies

Academic Conferences limited Entrepreneurship is the capability to be an entrepreneur. Beyond that idea is an ideology that a person's business actions result in industrial growth or technical advances, making that

person a leader in the economic world. The contributors to this latest volume in the Praxiology Series, now available in paperback, are united in claiming that resourcefulness is a characteristic of people who take effective action, and that effectiveness is dependent on good, ethical purposes. The wide-angle definition of entrepreneurship presented in this volume demands that people and organizations engage in more than simple self-interest, but also display

awareness of the prospects for wider growth and advances resulting from their decisions. In a period of financial crisis caused by irresponsible behavior by eminent would-be "entrepreneurs" the significance of this perspective should be evident. The editors claim that growth, not stagnation, advantage, not decline, are irreversible traits of business activity. This is why the very concept of entrepreneurship calls for values and

responsibility—even more than in the past. The contributors develop the idea of entrepreneurship from both theoretical approaches religious and practical, or applied perspectives. This inter- and multidisciplinary approach offers readers a chance to rebuild trust in entrepreneurship.

Entrepreneurship and Leadership World Scientific

Business competencies are very complex, and entrepreneurs' beliefs, actions, and aspirations for their businesses are

widely influenced by their sense of values and beliefs. This influences the actions they take, especially in challenging situations. Successful entrepreneurs can accept challenges, learn to make responsible choices, and make sure to weigh all possible outcomes.

Developing Entrepreneurial Competencies for Start-Ups and Small Business is an assortment of innovative research on the methods and applications of strategic models for

entrepreneurship competency. While highlighting topics including intellectual capital, risk management, and entrepreneurship education, this book is ideally designed for entrepreneurs, business executives, industry professionals, academicians, students, and researchers seeking to reduce the level of failure of entrepreneurial activity within the global business community.

Toward Entrepreneurial
Community Development

is about developing entrepreneurial communities, and goes beyond theories of the firm to demonstrate how local and regional society contributes in important ways to the vitality of entrepreneurs. The literature is rich with insights about leadership and culture within SMEs, and the behaviours and attitudes of their founders, founding teams, and managers. Since most of the attention in the entrepreneurship literature is focused on firms, we wish to explore

everyone else: The social environment surrounding the entrepreneur, and how leadership and culture outside the firm can have pervasive effects on the business. This book reaches across disciplinary boundaries, integrating and advancing knowledge on entrepreneurial community development. The book identifies actionable leadership strategies that can be used by literally anyone to help make a community or region a more culturally-supportive,

interactive home for entrepreneurial minds. We draw from original research to compare high and low entrepreneurship communities, and present an emergent picture of how community-level actors can (or fail to) work together to support entrepreneurship in places that are culturally distant from the Silicon Valley (i.e., most places). *Toward Entrepreneurial Community Development* then offers techniques for entrepreneurial community leadership, including how to build

lasting alliances, create an image, and harness the local culture for entrepreneurial advantage. The result is a book that provides the reader with the latest advancements and techniques in entrepreneurship development in a straightforward, readable format. No matter the reader, *Toward Entrepreneurial Community Development* demonstrates how anyone, in any position, can lead a local entrepreneurship movement starting

anywhere, anytime. *Exploring the Co-Creation Pathways of Structural Change and Innovation* Business Expert Press This innovative book combines theoretical and practical perspectives with the power of storytelling to present a new understanding of leadership as a concept and endeavour in the small business organisation. With the assertion that leadership capability is a key function of small firm survival and growth, it underlines the importance

of addressing the phenomenon within small business. Employing storytelling as a fresh alternative to a traditional case study approach, the narrative of leading with purpose in real time is captured alongside

relevant and current academic debate. In building upon the Harvard model of purpose driven leadership, the author offers a new definition and discussion of leadership that connects theory to real impact,

based on research carried out with UK small business organisations. The overall aim of the book is to provoke interest in small business leadership and generate new knowledge of leading with purpose.
