A New York Times and Wall Street Journal bestseller – What happened that night on Dead Mountain? The mystery of Dead Mountain: In February 1959, a group of nine experienced hikers in the Russian Ural Mountains died mysteriously on an elevation known as Dead Mountain. Eerie aspects of the incident—unexplained violent injuries, signs that they cut open and fled the tent without proper clothing or shoes, a strange final photograph taken by one of the hikers, and elevated levels of radiation found on some of their clothes—have led to decades of speculation over what really happened. As gripping and bizarre as Hunt for the Skin Walker: This New York Times bestseller, Dead Mountain: The Untold True Story of the Dyatlov Pass Incident,

is a gripping work of literary nonfiction that delves into the mystery of Dead Mountain through unprecedented access to the hikers' own journals and photographs, rarely seen government records, dozens of interviews, and the author's retracing of the hikers' fateful journey in the Russian winter. You'll love this real-life tale: Dead Mountain is a fascinating portrait of young adventurers in the Soviet era, and a skillful interweaving of the hikers' narrative, the investigators' efforts, and the author's investigations. Here for the first time is the real story of what happened that night on Dead Mountain.

As seen on the Oxygen mini-series *The Disappearance of Maura Murray* When an eleven year old James Renner fell in love with Amy Mihaljevic, the missing girl seen on posters all over his neighborhood, it was the beginning of a lifelong obsession with true crime. That obsession leads James to a successful career as an investigative journalist. It also gave him PTSD. In 2011, James began researching the strange disappearance of Maura Murray, a UMass student who went missing after wrecking her car in rural New Hampshire in 2004. Over the course of his investigation, he uncovers numerous important and shocking new clues about what may have happened to Maura, but also finds himself in increasingly dangerous situations with little regard for his own well-being. As his quest to find Maura deepens, the case starts taking a toll on his personal life, which begins to spiral out of control. The result is an absorbing dual investigation of the complicated story of the All-American girl who went missing and James's own equally complicated true crime addiction. James Renner's *True Crime Addict* is the story of his spellbinding investigation of the missing person's case of Maura Murray, which has taken on a life of its own for armchair sleuths across the web. In the spirit of David Fincher's *Zodiac*, it is a fascinating look at a case that has eluded authorities and one man's obsessive quest for the answers.

[The Untold True Story of the Dyatlov Pass Incident](#) Wadsworth Publishing Company

Perfect for readers of Jon Krakauer and Douglas Preston, this "authentic and

encyclopedic" book examines real-life cases of those who vanish in the wilderness without a trace (Roman Dial)—and those eccentric, determined characters who try to find them. These are the stories that defy conventional logic. The proverbial vanished without a trace incidences, which happen a lot more (and a lot closer to your backyard) than almost anyone thinks. These are the missing whose situations are the hardest on loved ones left behind. The cases that are an embarrassment for park superintendents, rangers and law enforcement charged with Search & Rescue. The ones that baffle the volunteers who comb the mountains, woods and badlands. The stories that should give you pause every time you venture outdoors. Through Jacob Gray's disappearance in Olympic National Park, and his father Randy Gray who left his life to search for him, we will learn about what happens when someone goes missing. Braided around the core will be the stories of the characters who fill the vacuum created by a vanished human being. We'll meet eccentric bloodhound-handler Duff and R.C., his flagship purebred, who began trailing with the family dog after his brother vanished in the San Gabriel Mountains. And there's Michael Neiger North America's foremost backcountry Search & Rescue expert and self-described "bushman" obsessed with missing persons. And top researcher of persons missing on public wildlands Ex-San Jose, California detective David Paulides who is also one of the world's foremost Bigfoot researchers. It's a tricky thing to write about missing persons because the story is the absence of someone. A void. The person at the heart of the story is thinner than a smoke ring, invisible as someone else's memory. The bones you

dig up are most often metaphorical. While much of the book will embrace memory and faulty memory—history—The Cold Vanish is at its core a story of now and tomorrow. Someone will vanish in the wild tomorrow. These are the people who will go looking.

For twelve years, Andrea Lankford lived in the biggest, most impressive national parks in the world, working a job she loved. She chaperoned baby sea turtles on their journey to sea. She pursued bad guys on her galloping patrol horse. She jumped into rescue helicopters bound for the heart of the Grand Canyon. She won arguments with bears. She slept with a few too many rattlesnakes. Hell yeah, it was the best job in the world!

Fortunately, Andrea survived it. In this graphic and yet surprisingly funny account of her and others' extraordinary careers, Lankford unveils a world in which park rangers struggle to maintain their idealism in the face of death, disillusionment, and the loss of a comrade killed while holding that thin green line between protecting the park from the people, the people from the park, and the people from each other. Ranger Confidential is the story behind the scenery of the nation's crown jewels—Yosemite, Grand Canyon, Yellowstone, Great Smokies, Denali. In these iconic landscapes, where nature

and humanity constantly collide, scenery can be as cruel as it is redemptive.

Missing 411- A Sobering Coincidence is  
 the fifth book in the acclaimed series  
 about people who have mysteriously  
 disappeared. The books have been  
 vetted by some of the top journalists in  
 the world with statements such as;  
 "David Paulides has shined a light onto  
 one of the greatest and most disturbing  
 mysteries of our time." Another

comment; "The paper trail uncovered by  
 Paulides through sheer doggedness is  
 impressive, the evidence indisputable."  
 Survivorman Les Stroud was interviewed  
 about the series and stated, "Paulides  
 presents pure facts. Facts that can't be  
 disputed."The author continues with his  
 profile points involving the  
 disappearances and applies them to a  
 series of incidents involving young men  
 and women, mostly college age. Many of  
 the victims vanished within the confines  
 of their college or university town. These  
 individuals were brilliant scholars,  
 athletes and stellar people in their  
 community. They disappear under  
 unusual circumstances and are often  
 found in areas that were previously  
 searched. Medical examiners in these  
 cases often cannot determine the cause  
 of death. Many times the victim was  
 recovered in water, yet autopsies show  
 the body was not in the water the entire  
 time the victim was missing. The  
 majority of the families in these cases  
 believe their loved ones were abducted  
 and held, then later dumped in the  
 water. These allegations are generally  
 ignored by authorities until pressured by  
 facts presented through secondary  
 autopsies that families requested and  
 paid for.This is a chilling and shocking  
 series of stories that will cause many  
 parents and young people to rethink  
 their nighttime activities.Readers can

Hosts of the podcast Stuff They Don't Want You to Know, Ben Bowlin, Matthew Frederick, & Noel Brown discern

conspiracy fact from fiction regarding "stuff" the government doesn't want you to know. Conspiracies didn't always seem so clear and present. It used to be that people with tin-foil hats who were convinced of secret messages coming through the radio were easily disregarded as kooks and looney tunes. But these days, conspiracies feel alive and well. From internet rumors to lying politicians to the tinderbox that is social media, it's become remarkably clear that a vast swath of people believe really bonkers things. Why is that? How did these theories proliferate? Is there a kernel of truth to it or are they fully fiction? Ben Bowlin, Matt Frederick, and Noel Brown are the hosts of the popular iHeart podcast that seeks to answer these questions. With cool heads and extensive research, they regularly break down the wildest conspiracy theories: from chemtrails and biological testing to the secrets of lobbying and why the Kennedy assassination is of perennial interest. Written in smart, witty, and conversational style, and with amazing illustrations, *Stuff They Don't Want You to Know* is a vital book in helping to understand the unexplainable and use truth as a powerful weapon against ignorance, misinformation, and lies.

WOODS David Paulides and Chris Williams Unexplained mysteries, thriller stories, detective missions, dogs strange behavior and more terrifying unsolved cases

*Science Confronts the Unexplained at a Remote Ranch in Utah* Createspace Independent Publishing Platform ([www.canammissing.com](http://www.canammissing.com)) People have been disappearing under mysterious circumstances for centuries. During the last 150 years the media has covered many of these cases and has attempted to put a rational spin on a very unusual event. After 3+ years and 7000 hours of intensive research there is a new paradigm being presented on people missing in the wilds of North America. "Missing 411" identifies 28 clusters of missing people who have vanished in remote areas of the continent. The finding is a troubling fact questioning why and how these people have disappeared. Some of the victims are found and tell a very interesting and mind bending story of their experience, others are never found, a fact that confounds searchers and law enforcement. There are many children that have disappeared under highly unusual circumstances. After weeks of searching and failing to find any evidence of the child being in a remote location, many parents and law enforcement draw the conclusion that the victim was kidnapped, yes, taken by someone lurking in remote areas of our national parks, forests, farms and even ranches. There are two editions of this research, "Missing 411-Eastern United States" and "Missing 411-Western United States." The eastern United States copy has a list of every person who is listed in each book as well as a final conclusion to the investigation. You will be shocked by the lack of interest and documentation

that many of our governmental bodies have committed to missing people. After reading these books you will never look at our wildlands the same. Chapters;

Index"Major news organizations do a deplorable job of covering major stories and issues which are deemed too unusual or too far outside the box. Chances are, they will find a way to trivialize or ignore the disturbing evidence accumulated by David Paulides, a former law man turned investigative journalist. The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable. People are vanishing without a trace from our national parks and forests, yet government agencies are saying nothing. At a minimum, this story deserves space on the front page of every newspaper in the country, and it warrants a formal high level inquiry by the federal agencies whose files leave little doubt that something very strange is unfolding in our wilderness."George Knapp, Host, Coast to Coast AM
