The Intersection of Adult Development and Learning is the first handbook to explore the ways in which adult roles, functions, interests, motivations, and contexts lead to synchronous development and learning. The chapters in this volume, written by leaders in their respective areas, elaborate on topics that show the interplay between adult development and learning. As the chapter contributors ably demonstrate, it is now abundantly clear that adult learning and development reinforce each other.

This volume presents the reader with a stimulating rich tapestry of essays exploring the nature of action and intentionality, and discussing their role in human development. As the contributions make clear, action is an integrative concept that forms the bridge between our psychological, biological, and sociocultural worlds. Action is also integrative in the sense of entailing motivational, emotional, and cognitive systems, and this integration too is well represented in the chapters. Action is defined, and distinguished from behavior, according to its intentional quality. Thus, a constantly recurring theme in the volume involves the dialectic of action-intentionality, and specifically the questions of how and when these concepts are to be distinguished. A Topical Approach -- Combo Access Card SAGE Publications

In *The Liar in Your Life*, psychology professor Robert Feldman, one of the world's leading authorities on deception, draws on his immense body of knowledge to give fresh insights into how and why we lie, how our culture has become increasingly tolerant of deception, the cost it exacts on us, and what to do about it. His work is at once surprising and sobering, full of corrections for common myths and explanations of pervasive oversimplifications. Feldman examines marital infidelity, little white lies, career-driven resumé lies, and how we teach children to lie. Along the way, he reveals—despite our beliefs to the contrary—how it is nearly impossible to spot a liar (studies have shown no relationship between nervousness, lack of eye contact, or a trembling voice, and acts of deception). He also provides startling evidence of just how integral lying is to our culture; indeed, his research shows that two people, meeting for the first time, will lie to each other an average of three times in the first ten minutes of a conversation. Feldman uses this discussion of deception to explore ways we can cope with infidelity, betrayal, and mistrust, in our friends and family. He also describes the lies we tell ourselves: Sometimes, the liar in your life is the person you see in the mirror. With incisive clarity and wry wit, Feldman has written a truthful book for anyone whose life has been touched by deception.
