This book contains 25 true reports of real-life encounters with the paranormal and the supernatural; accounts which are, indeed, stranger than fiction. Drawn from the files of FATE—the magazine Stephen King says gave him many of his “best ideas”, and the world’s leading publication of the strange and unknown—the testimonials in this series come from a wide variety of people, places and decades. To read this book is to enter the world of ESP, prophetic dreams, magic, ghosts, poltergeists, miraculous healings, the occult, and the paranormal. You may begin reading this classic collection as a skeptic, but we are sure you will be more of a believer by the time you finish. Here are just a few of the fascinating, thought-provoking reports and personal accounts you will find in this fantastic-but-true book, personally selected by the editors of FATE Magazine: Eye-witness to a Miracle Healing We Heard Voices from the Dead The Exorcist Fought Five Demons for One Woman’s Soul The Navy Blimp Returned to Earth—Minus its Crew The Witches’ Salve The Little Man Who Was Sometimes There ESP Demonstrated in Cross-Country Test Ghost Soldier in Their Attic Two Watches Stopped at the Moment of Death The Poltergeist That Could Write The World’s Strangest True Encounters is an extraordinary collection of extraordinary tales by those who have encountered the inexplicable, and of first-hand investigations by FATE’s writers into reports of the extraordinary and unexplained. Wikipedia calls FATE “the longest-running magazine devoted to the paranormal. ...it has published expert opinions and personal experiences relating to UFOs, psychic abilities, ghosts and hauntings, cryptozoology, alternative medicine, divination methods, belief in the survival of personality after death, Fortean phenomena, predictive dreams, mental telepathy, archaeology, warnings of death, and other paranormal topics.” FATE is a true journalistic pioneer. Launched in 1948, it covered controversial topics like electronic voice phenomena, cattle mutilations, life on Mars, telepathic communication with animals, and UFOs at a time when discussing such things was almost taboo. Recently, FATE celebrated the 67th anniversary of its founding and the publication of its 727th issue, a rare feat of longevity achieved by only a select few U.S. periodicals. FATE hopes you enjoy the books in FATE's Library of the Paranormal and the Unknown.

Gobeklitepe, the oldest temple in the world, awakened from its 12,000 years of sleep to tell hacker

Kamil a secret. A secret, locked behind the sealed tongue of its guardian, that can only be heard by to the wise and capable... Kamil is forced to unravel Gobeklitepe's mysteries when a stranger from the southeastern Turkish town of Urfa arrives on his doorstep, asking to buy his house. Kamil, the only Jew left in ancient Carian city of Milas, just buried his linguist mother, but he has no time to mourn when the stranger is murdered and he becomes the prime suspect. With police bearing down on him and the daughter of the murdered man on his trail, Kamil locks himself in his room. He opens his computer as if entering a temple, and codes and information fly around him. His journey will take him far into the past, into his own history, his mother's life, and to Gobeklitepe, where humanity was transformed, the world's oldest beliefs rediscovered, and space and time were surpassed.

Girardian Conversations at Catalhöyük InterVarsity Press

Reveals Gobekli Tepe as a center of civilizing knowledge for the ancient world • Details how symbolic elements at Gobekli Tepe link a pre-Vedic cult in India to cosmological myths and traditions in Africa, Egypt, Tibet, and China • Discusses how carved animal images at Gobekli Tepe relate to stages of creation and provide an archaic foundation for symbolic written language • Defines how classical elements of ancient Egyptian myth and religion characterize an archaic cosmological tradition that links ancestrally back to Gobekli Tepe How could multiple ancient cultures, spanning both years and geography, have strikingly similar creation myths and cosmologies? Why do the Dogon of Africa and the civilizations of ancient Egypt, India, Tibet, and China share sacred words and symbols? Revealing the existence of a long-forgotten primal culture and the world’s first center of higher learning, Laird Scranton shows how the sophisticated complex at Gobekli Tepe in Turkey is the definitive point of origin from which all the great civilizations of the past inherited their

cosmology, esoteric teachings, and civilizing skills, such as agriculture, metallurgy, and stone masonry, fully developed. Scranton explains how the carved images on Gobekli Tepe's stone pillars were the precursors to the sacred symbols of the Dogon, Egyptians, Tibetans, and Chinese as well as the matriarchal Sakti cult of ancient Iran and India. He identifies Gobekli Tepe as a remote mountain sanctuary of higher knowledge alluded to in Sakti myth, named like an important temple in Egypt, and defined in ancient Buddhist tradition as Vulture Peak. Scranton reveals how Gobekli Tepe's enigmatic "H" carvings and animal symbolism, symbolic of stages of creation, was presented as a kind of prototype of written language accessible to the hunter-gathers who inhabited the region. He shows how the myths and deities of many ancient cultures are connected linguistically, extending even to the name of Gobekli Tepe and the Egyptian concept of Zep Tepi, the mythical age of the "First Time." Identifying Gobekli Tepe not only as the first university but also as the first temple, perhaps built as a civilizing exercise, Scranton definitively places this enigmatic archaeological site at the point of origin of civilization, religion, and ancient science.

Prehistory Decoded Iboo

Never before has there been a real discovery where all the physical characteristics of a proposed location matched Plato's description of Atlantis. Not even the original Santorini hypothesis could sufficiently meet the given criteria. After years of extensive research, in conjunction with new archeological evidence, and with the aid of satellite technology, Christos A. Djonis credibly reveals that Plato based his story of Atlantis on a real prehistoric setting, now beneath 400 feet of water. We now have a real discovery where all the physical characteristics, along with Plato's given chronology, flawlessly match, and they are precisely in the exact order as Plato depicted. Moreover, DNA and archaeological evidence of an advanced Neolithic civilization occupying the prehistoric submerged island, at around 9600 BC, further confirm a perfect case scenario. "Finally, a study that gives a logical and well-supported documentation for the existence of Plato's Atlantis! I was totally enthralled with this exciting piece of history..." C.A Schultz, Schultz Studios

Archaeology Cambridge University Press

In the Neolithic Near East, the Anatolian landmass of modern day Turkey functioned as an over reaching land bridge, connecting the three continents of Europe, Asia and Africa to one another. The larger geographical landscape of today's Middle East was surrounded by the five major seas of antiquity. The Mediterranean Sea, the Black Sea, the Persian Gulf, the Red Sea, and the Caspian Sea. The rivers of Tigris and Euphrates ran across the hills, mountain ranges and plains, and volcanic fields of the Armenian highlands provided invaluable obsidian rocks, suitable for making sharp, razor-edged stone tools. As the late Klaus Schmidt once put it, the slopes of the Taurus mountains were a hunter's dream, and a prime piece of paradise coming true. In this region, humans and the environment were brought so close to one another, and plants and animals appeared so abundant, that the early hunter gatherers scattered across the land for the first time adopted primary storage and conservation methods. The strategies which gave way to the rise of agriculture and domestication of animals in the course of the coming millennia. Göbekli Tepe was at the heart of this cultural and economic transition. Here, the Neolithic Revolution was begun.

Epic in scope, yet filled with detail, this illustrated guide takes readers through the whole of our

human past. Spanning the dawn of human civilization through the present, it provides a tour of every site of key archaeological importance. From the prehistoric cave paintings of Lascaux to Tutankhamun's tomb, from the buried city of Pompeii to China's Terracotta Army, all of the world's most iconic sites and discoveries are here. So too are the lesser-known yet equally important finds, such as the recent discoveries of our oldest known human ancestors and of the world's oldest-known temple, Göbekli Tepe in Turkey. A masterful combination of succinct analysis and driving narrative, this book also addresses the questions that inevitably arise as we gradually learn more about the history of our species. Written by an international team of archaeological experts and richly illustrated throughout, *Archaeology: The Essential Guide to Our Human Past* offers an unparalleled insight into the origins of humankind.

Narratives of Continuity and Change iUniverse

This volume explores the role of religion and ritual in the origin of settled life in the Middle East, focusing on the repetitive construction of houses or cult buildings in the same place. Prominent archaeologists, anthropologists, and scholars of religion working at several of the region's most important sites—such as Çatalhöyük, Göbekli Tepe, Körtik Tepe, and Aşıklı Höyük—contend that religious factors significantly affected the timing and stability of settled economic structures. Contributors argue that the long-term social relationships characteristic of delayed-return agricultural systems must be based on historical ties to place and to ancestors. They define different forms of history-making, including nondiscursive routinized practices as well as commemorative memorialization. They consider the timing in the Neolithic of an emerging concern with history-making in place in relation to the adoption of farming and settled life in regional sequences. They explore whether such correlations indicate the causal processes in which history-making, ritual practices, agricultural intensification, population increase, and social competition all played a role. *Religion, History, and Place in the Origin of Settled Life* takes a major step forward in understanding the adoption of farming and a settled way of life in the Middle East by foregrounding the roles of history-making and religious ritual. This work is relevant to students and scholars of Near Eastern archaeology, as well as those interested in the origins of agriculture and social complexity or the social role of religion in the past. Contributors: Kurt W. Alt, Mark R. Anspach, Marion Benz, Lee Clare, Anna Belfer-Cohen, Morris Cohen, Oliver Dietrich, Güneş Duru, Yılmaz S. Erdal, Nigel Goring-Morris, Ian Hodder, Rosemary A. Joyce, Nicola Lercari, Wendy Matthews, Jens Notroff, Vecihi Özkaya, Feridun S. Şahin, F. Leron Shults, Devrim Sönmez, Christina Tsoraki, Wesley Wildman

A Novel Oxbow Books

Due to government secrecy, the public never learned of the numerous UFO incursions at strategic nuclear weapons installations where they disabled ICBM missiles and even activated their launch codes. They never heard about UFO encounters reported by police officers, civilian and military pilots and astronauts, and they were never told the real facts of the Roswell event. The volume of evidence suggesting we are not alone, and probably never have been, is overwhelming. It suggests an alien agenda to accelerate the evolution of the human race. To understand what is happening requires knowledge of what is going on today as well as the past, particularly during the biblical era. Much has been learned through the Freedom of Information Act, from whistleblowers, and government and military officials. This book connects the dots suggesting what aliens have been

doing for the past several thousand years.

Cultural Science John Hunt Publishing

Excavation of Gobekli Tepe has revealed the hitherto unknown religion of the "Neolithic Revolution." Almost twelve millennia ago the cult was established, at the northern end of the Fertile Crescent, by priests who were hunter-shamans, miners of flint and weapon-makers. Progress in weapon manufacture resulted in overhunting, a temporary surplus of meat, too many human hunters, and a decline in prey animal populations. Shortages of prey animals elicited a priestly cult that specialized in the regeneration of life. Priestly minds rationalized taking control of plants and animals and thereby encouraged domestication--which led to "hyper-domestication," or, what evolved as our history of civilization and our history of religions.

This book is primarily for researchers and students in the archaeology of the Ancient Near East. The volume results from intense interaction between archaeologists at these sites and a group of theorists studying the scholarship of René Girard.

Science and the World's Religions Birdwood

A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-

gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

The Guardian of Gobeklitepe: The World's Oldest Temple Smithsonian Institution

Discover the world's best and most beautiful archaeological sites *Incredible Archaeology* offers a journey through the best archaeological sites the world has to offer. With stunning photography, it serves as both a dazzling spectacle and travel inspiration, making it perfect for armchair travelers and world adventurers alike! Archaeological sites tell a story spanning thousands of years, and the ones in this book range from the well-known to hidden gems, handpicked for their desirability as destinations. Explore the cliff dwellings at Mesa Verde (the largest archaeological preserve in the United States), the Abu Simbel twin temples in Egypt that commemorate Pharaoh Ramesses II and his queen Nefertari, the Terracotta Army in China, the Nazca Lines in Peru that feature large geoglyphs in the desert soil, and the hill fort known as Maiden Castle in England. These are just a sampling of the top-notch sites you'll find in this book. *Incredible Archaeology* takes a striking tour through human history, so come along!

Amen and Jesus' Revelation Bloomsbury Publishing

A Best Book of 2020 (NPR) A Best Book of 2020 (The Economist) A Top Ten Best Science Book of 2020 (Smithsonian) A Best Science and Technology Book of 2020 (Library Journal) A Must-Read Book to Escape the Chaos of 2020 (Newsweek) Starred review (Booklist) Starred review (Publishers Weekly) A historically unprecedented disconnect between humanity and the heavens has opened. Jo Marchant's book can begin to heal it. For at least 20,000 years, we have led not just an earthly existence but a cosmic one. Celestial cycles drove every aspect of our daily lives. Our innate relationship with the stars shaped who we are—our art, religious beliefs, social status, scientific advances, and even our biology. But over the last few centuries we have separated ourselves from the universe that surrounds us. It's a disconnect with a dire cost. Our relationship to the stars and planets has moved from one of awe, wonder and superstition to one where technology is king—the cosmos is now explored through data on our screens, not by the naked eye observing the natural world. Indeed, in most countries, modern light pollution obscures much of the night sky from view. Jo Marchant's spellbinding parade of the ways different cultures celebrated the majesty and mysteries of the night sky is a journey to the most awe-inspiring view you can ever see: looking up on a clear dark night. That experience and the thoughts it has engendered have radically shaped human civilization across millennia. The cosmos is the source of our greatest creativity in art, in science, in life. To show us how, Jo Marchant takes us to the Hall of the Bulls in the caves at Lascaux in France, and to the summer solstice at a 5,000-year-old tomb at Newgrange, Ireland. We discover Chumash cosmology and visit medieval monks grappling with the nature of time and Tahitian sailors navigating by the stars. We discover how light reveals the chemical composition of the sun, and we

are with Einstein as he works out that space and time are one and the same. A four-billion-year-old meteor inspires a search for extraterrestrial life. The cosmically liberating, summary revelation is that star-gazing made us human.

Gobekli Tepe Smithsonian Institution

This volume, with essays by leading archaeologists and prehistorians, considers how prehistoric humans attempted to recognise, understand and conceptualise death.

Death Shall Have No Dominion Penguin

Göbekli Tepe just doesn't make sense. The neolithic archaeological ruins were first uncovered in the '60s, but their significance wasn't truly realized until 1994. The site is located in southeastern Turkey - although it predates the establishment of the country by a significant amount of time. In fact, Göbekli Tepe is so old and complex that it is rewriting our understanding of not just Turkish history, but the entire history of humanity. Based on everything we know about how modern civilization got its start, Göbekli Tepe should not exist. However, exist it does, and has for nearly 12,000 years. In this *The World's First Temple* book, you will discover the plausible connections to this monument from a wide range of disciplines by the author who studied Ancient Egyptian language for over 30 years. This is a comparison study in various areas to get to the partial root of this kind of culture with a starting point of what the culture might have been like. Get your copy today!

The Cygnus Key Bear

Non-Fiction. What drove the building of the first megalithic monuments? Here is new perspective for anyone with an interest in prehistory and human development in its most pivotal days. From Gobekli Tepe in Anatolia to the megalithic temples of Malta to the passage tombs of Ireland, the world's oldest buildings and the newest scientific research combine for a look at the Stone Age Neolithic Revolution that goes where no one has gone before. With original photos and illustrations, includes data from the worlds of Archaeology, Architecture, Anthropology, Genetics, Physics, Physiology. Fascinating pieces of evidence are set side by side, resulting in a stunning premise.

Gobekli Tepe and the Spiritual Matrix for the World's Cosmologies Simon and Schuster

The internationally bestselling thriller—an audacious blend of science, history, and suspense—from the author of *The Marks of Cain* and *The Lost Goddess* War-reporter Rob Luttrel is expecting a soft assignment when he's sent to Kurdistan to cover the excavation of the world's oldest human civilization. But, soon after he arrives, the site is violated, first by sabotage-and then by death. Meanwhile, a Scotland Yard detective investigating a series of spectacularly grisly murders discovers a link between the victims and what is happening in Kurdistan. As the two men race to prevent more deaths, they close in on a biblical era secret that will shake the foundations of the modern world. For readers of Raymond Khoury, Kate Mosse, and Douglas Preston and Lincoln Child.

Following My Thumb Digital Parchment Press

Does God exist? In one incisive volume, philosopher W. David Beck offers a narrative of pre-Christian, Jewish, Buddhist, Christian, and Islamic arguments for God's existence. In this history of answers to an essential question, readers will encounter both classical and contemporary arguments, including cosmological, teleological, moral, and ontological arguments.
