HARRISON CRUZ

Emotion, Risk and Decision-Making

CRC Press

A state-of-the-art, one-stop resource, *Public Administration in South Asia: India, Bangladesh, and Pakistan* examines public administration issues and advances in the Indian subcontinent. The book fulfills a critical need. These nations have the largest public administration programs in South Asia, yet existing knowledge on them is fragmented at best. Bringing together leading scholars from these countries, this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region. Focusing on the machinery of government, the book explores questions such as: What is the history of public administration development? How are major decisions made in the

agencies? Why are anti-corruption efforts so much a challenge? What is the significance of intergovernmental relations? What is the success of administrative reform? What are examples of successful social development programs? How successful is e-government, and what are its challenges? Why is civil service reform difficult to achieve? How is freedom of information being used as a means to combat corruption and invoke grassroots activism? What can be learned from the successes and failures? While public administration practice and education have become considerably professionalized in the last decade, a sufficiently in-depth and well-rounded reference on public administration in these countries is sorely lacking. Most

available books tackle only aspects of public administration such as administrative reforms, civil service, economic developments, or public policy, and are country specific. None provide the in-depth analysis of the sphere of public action in South Asia found in this book. It supplies an understanding of how public administration can be either the source of, or solution to, so many of the problems and achievements in the Indian subcontinent.

Agriculture plays a pivotal role in the economy and development of Pakistan providing food to consumers, raw materials to industries, and a market for industrial goods. Unfortunately, agricultural production is stagnant due to several barriers including a fixed cropping pattern, reliance on a few major crops, a narrow genetic pool, poor seed quality, and a changing climate. In addition, the high cost of production, weak phytosanitary compliance mechanisms, and a lack of cold chain facilities makes Pakistan agriculturally uncompetitive in export markets. Despite all these issues, agriculture is the primary industry in Pakistan and small farmers continue to dominate the business. Small farmers grow crops for subsistence under a fixed cropping

pattern and a holistic approach is required to develop agriculture to improve the livelihoods of the rural populace. This book presents an exhaustive look at agriculture in Pakistan. Chapters provide critical analyses of present trends, inadequacies in agriculture, strategic planning, improvement programs and policies while keeping in view the natural resources, plant- and animal-related agricultural production technologies, input supplies, population planning, migration and poverty, and balanced policies on finance, credit, marketing, and trade.

Annual Plan Business Expert Press
Focusing on the specific challenges of research design and exploring the opportunities of conducting research in

humanitarian logistics and supply chain management, this handbook is a significant contribution to future research. Chapters include extensive descriptions of methods used, highlighting their advantages and disadvantages, and the challenges in scoping, sampling, collecting and analysing data, as well as ensuring the quality of studies. Covering a wide variety of topics including risk and resilience and the impact of humanitarian logistics on capacity building, sustainability and the local economy, it also explores the need for scalability and co-ordination in the humanitarian network. Contributors provide important insight on future directions and offer crucial guidance for researchers conducting projects within

the field.

Developing Sustainable Agriculture in Pakistan 1122

This book looks at how legal frameworks can and do reduce risks arising out of disasters. The volume: analyses existing disaster laws and the challenges on the ground; brings together case studies from some of the most vulnerable regions; and proposes solutions to avert existing and possible future crises. The book offers appropriate legal frameworks for disaster management which could not only offer sustainable institutional reforms towards community resilience and preparedness but also reduce risk within the frameworks of justice, equity and accountability. It examines the intricacies of governance within which governments function and discusses how

recent trends in infrastructure development and engineering technology could be balanced within the legal principles of ethics, transparency and integrity. The chapters in the volume suggest that legal frameworks ought to resonate with new challenges of resource management and climate change. Further, these frameworks could help secure citizens' trust, institutional accountability and effective implementation through an unceasing partnership which keeps the community better prepared and more resilient. This volume will be indispensable to scholars and researchers of disaster management, law, public policy, environment and development studies as well as policymakers and those in administrative, governmental, judicial

and development sectors.

Rescue 1122 World Bank Publications

This book is a pioneering regional work and provides a balanced approach of theory and practice in disaster risk reduction (DRR) in Pakistan. The book analytically discusses the status of DRR and draws examples and lessons from national and community-level programs and projects and events in the country. The book covers different types of disasters facing Pakistan, including geo-physical and hydro-meteorological hazards. This work incorporates and draws some of the key lessons learned from the pre-disaster and disaster phases to the post-disaster phase, providing an effective framework in the form of those lessons. The rich content is based on a selection of available

documents, a consultative workshop with academicians from different universities undertaking DRR higher education programs, and the editors' own knowledge and experience in the field. Special emphasis is given to analyzing field experiences from academic perspectives, and pinpointing key issues and the policy relevance of DRR. *Disaster Risk Reduction Approaches in Pakistan* is organized into three sections with a total of 20 chapters. Section one provides the outline and basics of DRR strategies applied at the national level with supporting examples from a global review. Section two specifically highlights the wide ranges of hazards experienced in Pakistan and presents examples, policy options, institutional

set-ups, risk reduction strategies, and key lessons learned. The third section of the book is given to approaches and issues of DRR practices with examples of disaster responses.

Masquerade Taylor & Francis

There are different perceptions and opinions which are either built through our lack of exposure and interaction with people from different cultures or the way media presents the news to us. The book aims to show a positive side of human interaction and connection which is hardly mentioned in the mainstream media. Although not a travelogue, but *Stories & Glories from Pakistan & Australia* is a personal collection and reflection of events that I experienced during my stay in the two countries, as I experienced the cultural shock and

learned different values from wonderful people of both the countries. Inserted in the book are over a 1000 pictures from Pakistan, some are related to tourism and others are related to people who have made important contributions in their work. The book also features success stories and ways to improve our society. As a big fan of Roxette and Mohammad Hafeez 'Professor', the book reflects what their work meant for me and how it shaped me and my thinking. Resource Material Series Springer Nature Logged On offers a new mobile technology model and five solutions that can improve citizens' interactions with a more effective and efficient government. The book presents a number of examples from around the world, but focuses on South Asia countries -- some

of the most challenging in the world.

Disaster Risk Management Springer

Report on Rescue 1122 Lulu.com

"The Global status report on road safety 2015, reflecting information from 180 countries, indicates that worldwide the

total number of road traffic deaths has plateaued at 1.25 million per year, with the highest road traffic fatality rates in low-income countries. In the last three years, 17 countries have aligned at least one of their laws with best practice on seat-belts, drink-driving, speed, motorcycle helmets or child restraints. While there has been progress towards improving road safety legislation and in making vehicles safer, the report shows that the pace of change is too slow. Urgent action is needed to achieve the ambitious target for road safety reflected in the newly adopted 2030 Agenda for Sustainable Development: halving the global number of deaths and injuries from road traffic crashes by 2020. Made possible through funding from Bloomberg Philanthropies, this

report is the third in the series, and provides a snapshot of the road safety situation globally, highlighting the gaps and the measures needed to best drive progress."--Publisher's description.

Resilience and Post-Trauma Symptoms
Springer Nature

The brutal bombings which had long been the fate of several cities of Pakistan caused a great number of deaths and massive destruction throughout the country. Out of the many incidents, one which is vividly remembered is that of the bombing which took place at the GPO building that is situated in Lahore. The images of such an incident may be difficult to be erased from the memories of those people who have worked in the middle of the chaos and ruins, such as the rescue

workers. This research is an attempt at exploring the impact that such traumatic incidents have over the lives of individuals who are working for the Rescue 1122. There are two outcomes that are generally experienced by people who undergo such events, which consist of either becoming susceptible to having PTSD or developing a high level of resilience. Therefore, the overall prevalence and severity of PTSD symptoms was explored among the workers along with assessing their levels of resilience. This research should be particularly useful for other psychologists and researchers that are interested in investigating in this specific area and want to provide services to individuals who have experienced traumatic incidents.

Proceedings of MoSICom 2020 Springer Nature

The study in this research examined the relationship between high performance work system (HPWS) and work place safety (WPS). At the company level the study examine the outcomes and the moral of the employees, specially the book contains the results from emergency services providing organization. This book is useful for researcher and practitioners who are interested in linking the utilization of high performance work system and work place safety.

Smart Governance for Cities: Perspectives and Experiences LAP

Lambert Academic Publishing
In the book "Mental Illnesses - Understanding, Prediction and Control"

attention is devoted to the many background factors that are present in understanding public attitudes, immigration, stigma, and competencies surrounding mental illness. Various etiological and pathogenic factors, starting with adhesion molecules at one level and ending with abuse and maltreatment in childhood and youth at another level that are related to mental illness, include personality disorders that sit between mental health and illness. If we really understand the nature of mental illness then we should be able to not only predict but perhaps even to control it irrespective of the type of mental illness in question but also the degree of severity of the illness in order to allow us to predict their long-term outcome and begin to reduce its

influence and costs to society. How can we integrate theory, research evidence, and specific ways to deal with mental illness? An attempt will be made in the last conclusive chapter of this volume.

Earth Day CRC Press

The concept of rescuing humans in man-made or natural disasters is marked with risk, and demands commitment, training, accuracy, timeliness and deliverance. The vision, scope and goals of RESCUE 1122 as life saving organization are all well-tethered into its organizational structure, training, resources and operational practices [R1]. However, the fast evolving dynamics of Pakistani society as in urbanization and its parallel rural co-exist have an interplay with ever increasing mandate of RESCUE 1122 to cover a wider ambit

of activities. This confluence gives rise to a a new spectrum of problems ranging from traffic congestion in cities to a inertial nonacceptance in rural settings. Such retarding factors to RESCUE 1122 services undermine the operational preparedness and efficiency of the organization. The observership was undertaken with an avid focus on the technological aspects of RESCUE 1122 to identify areas where the technology could be optimized as such or if need be, a new suite of IT-solutions could be suggested to address emerging issues. This consolidated report takes a stepwise approach to understand intra-RESCUE 1122 technology-based departmental activities, the interfacing with external agencies including patients, hospitals, traffic wardens, and

service providers such as TPL, IDS, ISPs, PTCL, and other government bodies. It then identifies the obvious and non-obvious ineptness through the personal exposure of the observer in rescue missions and through the feedback received from the staff. As the most important and final step, concrete recommendations are made which serve in two ways; a) to address the shortcomings of the operational areas in order to meet desired goals in a better way, and b) to augment altogether new dimensions to the services which compliment the existing ones. Extraneous to the purview, but highly relevant problems of national significance including terrorism and sabotage and power crisis are also taken into broader consideration to make the

report adept to incumbent and more strategic national needs.

When second-grader Eugene and his family move to a new neighborhood and he starts at a new school, he has a chance to bring out his superhero alter ego, Captain Awesome, to find the kidnapped class hamster.

The Herald Springer

Applying Occupational Psychology in the Fire Service: Emotion, Risk and Decision-Making provides readers with an overview of the latest research informing the policies, procedures and practices of those working on the ground in the UK Fire Service. Using best-practice principles and cutting-edge theory, the current text demonstrates how occupational psychology can be applied

to fire services around the globe to improve individual, management, and organisational decisions. The authors aim to provide students, trainees, practitioners and fire personnel with a unique insight into a range of topics, including resilience, injury, work related wellbeing, community engagement as well as decision making and operational preparedness. This book represents a call to arms for more robust practices to support the Fire Service, highlighting the psychological factors involved in the firefighter occupation and paving the way towards a better understanding of emotion, risk, safety, and decision-making within the fire context.

**19th International Conference,
CISIM 2020, Bialystok, Poland,
October 16-18, 2020, Proceedings**

LAP Lambert Academic Publishing
This book constitutes the proceedings of the 19th International Conference on Computer Information Systems and Industrial Management Applications, CISIM 2020, held in Bialystok, Poland, in October 2020. Due to the COVID-19 pandemic the conference has been postponed to October 2020. The 40 full papers presented together with 5 abstracts of keynotes were carefully reviewed and selected from 62 submissions. The main topics covered by the chapters in this book are biometrics, security systems, multimedia, classification and clustering, industrial management. Besides these, the reader will find interesting papers on computer information systems as applied to wireless networks, computer graphics,

and intelligent systems. The papers are organized in the following topical sections: biometrics and pattern recognition applications; computer information systems and security; industrial management and other applications; machine learning and high performance computing; modelling and optimization.

Community Safety Urdu Movies

This book provides theoretical perspectives and practical experiences on smart governance for smart cities. It presents a balanced linkage between research, policies and practices on this area. The authors discuss the sustainability challenges raised by rapid urbanization, challenges with smart governance models in various countries, and a new governance paradigm seen as

a capable approach able to overcome social, economic and environmental sustainability problems. The authors include case studies on transformation, adaption and transfers; and country, regional, municipal contextualization. Also included are best practices on monitoring and evaluating smart governance and impact assessment. The book features contributions from researchers, academics, and practitioners in the field. Analyzes smart governance for cities from a variety of perspectives and a variety of sectors – both in theory and in practice Features information on the linkage between United Nations Sustainable Development Goals and smart governance Covers the connection between research, policies and practice in smart governance for

smart cities
