In the most suspenseful installment of the New York Times bestselling Body Farm series to date, forensic anthropologist Dr. Bill Brockton investigates a bizarre murder—and confronts a deadly enemy he thought he'd put behind bars for good. Forensic anthropologist Bill Brockton has spent twenty-five years solving brutal murders—but none so bizarre and merciless as his latest case: A ravaged set of skeletal remains is found chained to a tree on a remote mountainside. As Brockton and his assistant Miranda dig deeper, they uncover warning signs of a deadly eruption of hatred and violence. But the shocking case is only the beginning of Brockton's trials. Mid-case, the unthinkable happens: The deadliest criminal Brockton has ever foiled—the sadistic serial killer Nick Satterfield—escapes from prison, bent on vengeance. But simply killing Brockton isn't enough. Satterfield wants to make him suffer first, by destroying everything he holds dear: Brockton's

son, daughter-in-law, grandsons; even Miranda, his longtime graduate assistant, now on the verge of completing her Ph.D. and launching a forensic career of her own. The dangers from all directions force Brockton to question two things on which he's based his entire career—the justice system, and the quality of mercy—and to wonder: can the two co-exist? If not, which will Brockton choose in his ultimate moment of truth?

The Body Farm Harper Collins

There is a patch of ground in Tennessee dedicated to the science of death, where human remains lie exposed to be studied for their secrets. The real-life scientist who founded the "Body Farm" has broken cold cases and revolutionized forensics . . . and now he spins an astonishing tale inspired by his own experiences. Renowned anthropologist Dr. Bill Brockton has spent his career surrounded by death at the Body Farm. Now he's being called upon to help solve a baffling puzzle in a remote mountain community. The mummified corpse of a young woman dead for thirty years has been discovered in a cave, the body bizarrely preserved and transformed by the environment's unique chemistry. But

Brockton's investigation is threatening to open old wounds among an insular people who won't forget or forgive. And a long-buried secret prematurely exposed could inflame Brockton's own guilt—and the dangerous hostility of bitter enemies determined to see him fail . . . by any means necessary. 'If you like Kathy Reichs, you'll like Jefferson Bass' The Times. A woman's charred body has been found inside a burned car atop a hill in Knoxville. Was this an accidental death, or murder? Forensic anthropologist Bill Brockton is on the case, torching bodies to research how fire consumes flesh and bone. Days later, he receives a mysterious package - a set of cremated remains that seems entirely unreal. As Dr Brockton investigates, he uncovers a truth too horrifying to believe... Little does Dr Brockton know that his research is about to collide with reality. Disgraced medical examiner, and Dr Brockton's nemesis, Garland Hamilton, has escaped from custody on the way to his trial. So begins a deadly game of cat and mouse with Dr Brockton's life at stake. Finally running Hamilton to ground, Brockton finds only the incinerated remains of his enemy, or does he?

Medieval Bodies: Life and Death in the Middle Ages Body Farm

The first three Body Farm novels—Carved in Bone, Flesh and Bone, and The Devil's Bones—took readers deep into the backwoods of East Tennessee, where fascinating forensic science mixed with extraordinary characters, including the Farm's charismatic founder. Now, in the latest installment of the New York Times bestselling series Kathy Reichs calls "the

real deal," truth, lies, war, and history intertwine in a story that reaches new heights of suspense. This is Jefferson Bass's most ambitious and enthralling book yet. Bones of Betrayal Dr. Bill Brockton is in the middle of a nuclear-terrorism disaster drill when he receives an urgent call from the nearby town of Oak Ridge—better known as Atomic City, home of the Bomb, and the key site for the Manhattan Project during World War II. Although more than sixty years have passed, could repercussions from that dangerous time still be felt today? With his graduate assistant Miranda Lovelady, Brockton hastens to the death scene, where they find a body frozen facedown in a swimming pool behind a historic, crumbling hotel. The forensic detectives identify the victim as Dr. Leonard Novak, a renowned physicist and designer of a plutonium reactor integral to the Manhattan Project. They also discover that he didn't drown: he died from a searing dose of radioactivity. As that same peril threatens the medical examiner and even Miranda, Brockton enlists the help of a beautiful, enigmatic librarian to peel back the layers of Novak's life to the secret at its core. The physicist's house and personal life yield few clues beyond a faded roll of undeveloped film, but everything changes when Brockton chances upon Novak's ninety-year-old ex-wife, Beatrice. Charming and utterly unreliable, she takes him on a trip back into Oak Ridge's wartime past, deep into the shadows of the nuclear race where things were not quite as they seemed. As Beatrice drifts between lucidity and dementia, Brockton wonders if her stories are fact or fancy, history or myth. But he knows one thing—that she holds the key to a mystery that is becoming increasingly labyrinthine. For as the

radiation count steadily rises, and the race to find the truth intensifies, the old woman's tales hint at something far darker and more complex than the forensic anthropologist himself could have ever imagined.

 'If you like Kathy Reichs, you'll like Jefferson Bass' The Times. Dr Bill Brockton is hard at work on a troubling new case. A young man's battered body has been found in nearby Chattanooga, and it's up to the talented Dr Brockton to assemble pieces of the forensic puzzle. Brockton is brought into the case by the rising star of the state's medical examiners, Jess Carter. Just as they are on the verge of breaking the case open, events take a terrifying turn. Brockton has recreated the Chattanooga death scene at the Body Farm, but a killer tampers with it in a shocking way: placing another corpse at the setting, putting Brockton's career and life in jeopardy. Soon Brockton himself is accused of the horrific new crime and the once beloved professor becomes an outcast. As the net around him tightens, Brockton must use all his forensic skills to prove his own innocence... before he ends up behind bars with some of the very killers he's helped to convict.

The Devil's Bones Harper Collins
 Contains free paperback of *Bones of Betrayal*! Bill Brockton is exhuming a body to obtain a bone sample for a paternity test. A simple enough job until he discovers that the body's limbs have all been removed. Digging deeper, he soon finds himself embroiled in the massive and very illegal market for human body parts. He becomes drawn into the enterprise, selling donated corpses to the postmortem chop shop - in league with the FBI, hoping to bring the organization down. All the while, his

friend and Medical Examiner, Eddie Garcia, is struggling with the aftermath of their last case. A massive dose of radiation has left him missing one hand and most of the fingers from the other. He's on the waiting list for a transplant, but with so many parts around, Brockton is sorely tempted to jeopardize the investigation - and his own principles - to help his friend. Will he be able to live with himself if he does? Will he be able to live with himself if he doesn't?

In Ellison Cooper's new standalone novel *Cut to the Bone*, a bus full of high school students has disappeared from Washington D.C. and FBI neuroscientist Sayer Altair must hunt down the culprit who has a link to her own past. After grieving the death of her fiancé and almost losing her job, Agent Sayer Altair is finally starting to rebuild her life. Her research into the minds of psychopaths is breaking new ground and her strange little family is thriving. But Sayer's newfound happiness is threatened when she is called in to investigate a girl's body left inside a circle of animal figurines below a cryptic message written in blood. When they discover that the dead girl is one of twenty-four missing high school students, Sayer quickly realizes that nothing in this case is what it seems. As the investigation draws her in to a tangled web of fake identities and false leads, the trail soon begins to point directly to her own life. Now, Sayer must confront her painful past to uncover her connection to the deranged killer if she hopes to save the missing teens and protect everything that she loves.

Even though Dorothy Thompson excavated the Agora Bone Well in 1938,

the well and its remarkable finds have never been fully studied until now. Located outside the northwest corner of the Athenian Agora and dating to the second quarter of the 2nd century B.C., the well contained the remains of roughly 460 newborn infants, as well as a few older individuals. Also found in the well were the bones of over 150 dogs and an assortment of other animals, plus various artifacts, including an intriguing herm (treated here by Andrew Stewart) and an ivory chape. In addition to a thorough examination of the contents of the well, the authors provide a thoughtful analysis of the neighborhood in which the well was located and carefully compare the deposit with similar accumulations found elsewhere in the Mediterranean. The product of close cooperation between archaeological, palaeoanthropological, and faunal scholars, this interdisciplinary work will be of interest to a large audience across a variety of fields.

'If you like Kathy Reichs, you'll like Jefferson Bass' *The Times*. Early summer brings warm weather to the Body Farm in East Tennessee, but Dr Bill Brockton's about to get more heat than he's bargained for. A former student who's now an agent with the Florida Department of Law Enforcement seeks his help in identifying a partial skull found in the woods in rural Florida. The victim appears to have been a young male who died from lethal blows to the head. While leading a search for the remaining bones, Brockton and his graduate assistant Miranda Lovelady find a series of shallow graves on the overgrown grounds of a shuttered reform school for boys. According to local lore, the school's poor, troubled students understood that one wrong move could land them in their own plot in the de facto cemetery. As Brockton and his team close in on the truth, they find skeletons in some surprisingly prominent closets... and learn that the ghosts of the past are ever present.

There is no scientist in the world like Dr. Bill Bass. A pioneer in forensic anthropology, Bass created the world's first laboratory dedicated to the study of human decomposition—three acres of land on a hillside in Tennessee where human bodies are left to the elements. His research at "the Body Farm" has revolutionized forensic science, helping police crack cold cases and pinpoint time of death. But during a forensics career that spans half a century, Bass and his

work have ranged far beyond the gates of the Body Farm. In this riveting book, the bone sleuth explores the rise of modern forensic science, using fascinating cases from his career to take readers into the real world of C.S.I. Some of Bill Bass's cases rely on the simplest of tools and techniques, such as reassembling—from battered torsos and a stack of severed limbs—eleven people hurled skyward by an explosion at an illegal fireworks factory. Other cases hinge on sophisticated techniques Bass could not have imagined when he began his career: harnessing scanning electron microscopy to detect trace elements in knife wounds; and extracting DNA from a long-buried corpse, only to find that the female murder victim may have been mistakenly identified a quarter-century before. In *Beyond the Body Farm*, readers will follow Bass as he explores the depths of an East Tennessee lake with a twenty-first-century sonar system, in a quest for an airplane that disappeared with two people on board thirty-five years ago; see Bass exhume fifties pop star "the Big Bopper" to determine what injuries he suffered in the plane crash that killed three rock and roll legends on "the day the music died"; and join Bass as he works to decipher an ancient Persian death scene nearly three thousand years old. Witty and engaging, Bass dissects the methods used by homicide investigators every day, leading readers on an extraordinary journey into the high-tech science that it takes to crack a case.

Death's Acre Harper Collins
Jefferson Bass's *Cut to the Bone*, the long-awaited prequel to his New York Times bestselling mystery series, turns the clock back to reveal the Body Farm's creation—and Dr. Bill Brockton's deadly duel with a serial killer. In the summer of

1992, Arkansas Governor Bill Clinton and Tennessee Senator Albert Gore begin their long-shot campaign to win the White House. In the sweltering hills of Knoxville at the University of Tennessee, Dr. Bill Brockton, the bright, ambitious young head of the Anthropology Department, launches an unusual—some would call it macabre—research facility, unlike any other in existence. Brockton is determined to revolutionize the study of forensics to help law enforcement better solve crime. But his plans are derailed by a chilling murder that leaves the scientist reeling from a sense of *déjà vu*. Followed by another. And then another: bodies that bear eerie resemblances to cases from Brockton's past. But as the body count rises, the victims' fatal injuries grow more and more distinctive—a spiral of death that holds dark implications for Brockton...and everyone he holds dear.

On a patch of land in the Tennessee hills, human corpses decompose in the open air, aided by insects, bacteria, and birds, unhindered by coffins or mausoleums. This is Bill Bass's "Body Farm," where nature takes its course as bodies buried in shallow graves, submerged in water, or locked in car trunks serve the needs of science and the cause of justice. In *Death's Acre*, Bass invites readers on an unprecedented journey behind the gates of the Body Farm where he revolutionized forensic anthropology. A master scientist and an engaging storyteller, Bass reveals his most intriguing cases for the first time. He

revisits the Lindbergh kidnapping and murder, explores the mystery of a headless corpse whose identity astonished police, divulges how the telltale traces of an insect sent a murderous grandfather to death row—and much more. INCLUDES PHOTOGRAPHS

Shatter Me Harper Collins

With wit, wisdom, and a sharp scalpel, Jack Hartnell dissects the medieval body and offers a remedy to our preconceptions. Just like us, medieval men and women worried about growing old, got blisters and indigestion, fell in love, and had children. And yet their lives were full of miraculous and richly metaphorical experiences radically different from our own, unfolding in a world where deadly wounds might be healed overnight by divine intervention, or where the heart of a king, plucked from his corpse, could be held aloft as a powerful symbol of political rule. In this richly illustrated and unusual history, Jack Hartnell uncovers the fascinating ways in which people thought about, explored, and experienced their physical selves in the Middle Ages, from Constantinople to Cairo and Canterbury. Unfolding like a medieval pageant, and filled with saints, soldiers, caliphs, queens, monks and monstrous beasts, this book throws light on the medieval body from head to toe—revealing the surprisingly sophisticated medical knowledge of the time. Bringing together medicine, art, music, politics, philosophy, religion, and social history, Hartnell's work is an excellent guide to what life was really like for the men and women who lived and died in the Middle Ages. Perfumed and decorated with gold, fetishized or tortured, powerful even beyond death, these medieval bodies are not passive and buried away; they

can still teach us what it means to be human. Some images in this ebook are not displayed due to permissions issues. *Bone Factory* LSU Press

'If you like Kathy Reichs, you'll like Jefferson Bass' The Times. Dr Bill Brockton is leaving the Body Farm and heading to Europe for the most fascinating case of his career, *The Bones of Avignon*. But first, in this exclusive short story prequel, trouble awaits.

Inspector René Descartes of the French National Police is awoken in the middle of the night to investigate a break-in at the Petit Palais in Avignon - the medieval town's museum. What Descartes discovers plunges him into a labyrinth of art-lined walls, leading to a master forger's lair. And inside, a charred corpse. And as he closes this case, he will be called to an altogether more intriguing death scene - and one of the greatest mysteries of human history.

Integrating both Maori myth and New Zealand reality, *The Bone People* became the most successful novel in New Zealand publishing history when it appeared in 1984. Set on the South Island beaches of New Zealand, a harsh environment, the novel chronicles the complicated relationships between three emotional outcasts of mixed European and Maori heritage. Kerewin Holmes is a painter and a loner, convinced that "to care for anything is to invite disaster." Her isolation is disrupted one day when a six-year-old mute boy, Simon, breaks into her house. The sole survivor of a mysterious shipwreck, Simon has been adopted by a widower Maori factory worker, Joe Gillayley, who is both tender and horribly brutal toward the boy. Through shifting points of view, the novel reveals each character's thoughts and feelings as they struggle with the

desire to connect and the fear of attachment. Compared to the works of James Joyce in its use of indigenous language and portrayal of consciousness, *The Bone People* captures the soul of New Zealand. After twenty years, it continues to astonish and enrich readers around the world.

For a small New England town, Shadow Grove has an uncanny ability to attract the worst kind of trouble. Not that the residents are too concerned about the various horrors living among them. As the leaves change color and the weather grows colder, a foul presence is making itself known by leaving peculiar gifts for the students of Ridge Crest High. At first, the presents seem harmless--and a rash of accidents seem coincidental--but when seniors Rachel Cleary and her Scottish cousin, Dougal Mackay, find a boneless body in the boiler room, things take an ominous turn. Something vicious is on the loose in Shadow Grove, but with Orion Nebulius gone, Rachel has little hope of anyone getting out alive.
