How to Survive in America CreateSpace

You're alone in the forest on a fine autumn day with nothing but a multitool. You're stuck there for a week. Should you be more worried about finding a source of uncontaminated water or about a bear that might be in the area? Neither, says Les Stroud. The bear will most likely avoid you, and dehydration will affect you faster than parasites in untreated water. Your bigger worry should

be shelter—the daytime might be nice, but it's likely going to be cold at night. And that's just the beginning. The concept of Survivorman is simple: left in a remote location, Les must survive for seven days on his own without food, water or equipment. Now, he shares his expert knowledge in *Survive!*, a fully illustrated guide based on his experiences on six continents and filled with field-tested advice. Many books on survival are culled from Second World War-era training techniques that are out-of-date or just plain wrong. *Survive!* debunks these dated myths, exploring basic and advanced tactics that show you how to cope in any survival situation. Brought to life with Les's own anecdotes and the tales of others, *Survive!* is the perfect manual for anyone -- from beginner to armchair traveller to seasoned explorer -- who wants to meet nature's dangers with confidence. As Les writes, "If you believe you can make it through the bad times, and you are not intimidated by the forces of nature, you will markedly increase your chances of survival." *SURVIVE!* includes detailed information on the following: preparing for survival, mentally and physically fire-making techniques basic survival kit components finding, collecting and making water sources of food types of shelter

Table of Contents Introduction Survival Tactics Necessary Tools for Survival Dangerous Animals to Watch Out Coping With unfavorable daytime weather How to Cope With the Freezing Night Temperatures Conclusion Author Bio Publisher Introduction It is everybody's dream to travel safely, arrive at their destination in time and with minimal challenges. While hoping for the best, it is always important to be prepared for anything. If you're thinking of travelling across a desert, then you must be prepared because you never know when something will go wrong. You must know what to do in case your car breaks down or somehow you find yourself in the middle of the desert. The desert is characterized by endless miles of nothing but extremely high temperatures, desert plants and desert features such as sand dunes. While in the desert, you might travel for several hours or even days without seeing any sign of human civilization. This means that the only way you can come out of the desert alive is by knowing how to survive in it. Because of poor or no cellphone network coverage in most parts of deserts, you won't be able to call for help. Since the roads in most deserts are rarely used, it might take several days or even weeks before a single car passes through them. This means that you should be prepared to survive alone as nobody will come to your rescue while in the desert. The book, "How to Survive in a Desert" is designed to help anybody survive in the desert for as long as possible. With this book, you'll know what to carry when travelling across a desert. You'll also learn what to do and what not to do while in the desert. Although it is quite difficult

to call for help while in the desert, this book is equipped with tips on how to send a distress signal to other people. By reading the book, you'll also learn how you can travel to the next town so as to get some help. Don't travel across a desert blindly; before starting the journey, read the book, "How to survive in a Desert."
