A Study of Its Nature, Its Problems, Methods, and Representative Personalities to which is Added a Bibliography University of Chicago Press
The first edition of this book, *The Study of Ethnomusicology: Twenty-Nine Issues and Concepts*, has become a classic in

the field. This revised edition, written twenty-two years after the original, continues the tradition of providing engagingly written analysis that offers the most comprehensive discussion of the field available anywhere. This book looks at the field of ethnomusicology--defined as the study of the world's musics from a comparative perspective, and the study of all music from an anthropological perspective--as a field of research. Nettl selects thirty-one concepts and issues that have been the subjects of continuing debate by

ethnomusicologists, and he adds four entirely new chapters and thoroughly updates the text to reflect new developments and concerns in the field. Each chapter looks at its subject historically and goes on to make its points with case studies, many taken from Nettl's own field experience. Drawing extensively on his field research in the Middle East, Western urban settings, and North American Indian societies, as well as on a critical survey of the available literature, Nettl advances our understanding of both the diversity and universality of the world's music. This revised edition's four new chapters deal with the doing and writing of musical ethnography, the scholarly study of instruments, aspects of women's music and women in music, and the ethnomusicologist's study of his or her own culture.

Known affectionately as "The Red Book," Bruno Nettl's *The Study of Ethnomusicology* became a classic upon its original publication in 1983. Scholars and students alike have hailed it not just for its insights but for a disarming, witty style able to engage and entertain even casual readers while providing essential grounding in the field. In this third edition, Nettl revises the text throughout, adding new chapters and discussions that take into account recent developments across the field and reflecting on how his thinking has changed or even reversed itself during his sixty-year career. An updated bibliography rounds out the volume.

Worlds of Music: An Introduction to the Music of the World's Peoples, Shorter Version Cengage Learning
In 'Music as Social Life', Thomas Turino explores why it is that music and dance

are so often at the centre of our most profound personal and social experiences.

A study of its nature, its problems, methods and representative personalities to which is added a bibliography Oxford University Press
The Cultural Study of Music is an anthology of new writings that serves as a basic textbook on music and culture. Increasingly, music is being studied as it relates to specific cultures--not only by ethnomusicologists, but by traditional musicologists as well. Drawing on writers from music, anthropology, sociology, and the related fields, the book both defines the field--i.e., "What is the relation between music and culture?"--and then presents case studies of particular issues in world musics.

Ethnomusicology is an academic discipline with a very broad mandate: to understand why and how human beings are musical through the study of music in all its geographical and historical diversity. Ethnomusicological scholarship, however, has been remiss in articulating such goals, methods, and theories. A renowned figure in the field, Timothy Rice is one of the few scholars to regularly address this problem. In this volume, he offers a compilation of essays drawn from across his career that finds implicit and yet largely unrecognized patterns unifying ethnomusicology over its recent history.

Modeling Ethnomusicology summarizes thirty years of thinking about the field of ethnomusicology as Rice frames and reframes the content of eight of his most important essays from their original context in relation to the environment of today's ethnomusicology. Rice proposes a variety of models meant to guide students and researchers in their study of ethnomusicology. Some of these models pull together disparate strands of the field, while others propose heuristic models that generate questions for researchers as they plan and conduct their research. A new introduction to these essays reviews the history of his writing about ethnomusicology and proposes an innovative model for theorizing in ethnomusicology by ethnomusicologists. This book will be an enduring, essential text in undergraduate and graduate ethnomusicology classrooms, as well as a must-buy for established scholars in the field.

Debussy's Paris takes readers on a tour of Belle Époque Paris through detailed descriptions of the city's delights and the exquisite piano music Debussy wrote to accompany them. Kautsky reveals little known aspects of Parisian life and weaves the music, the man, the city, and the era into an indissoluble whole.

Re-Envisioning Past Musical Cultures

Rowman & Littlefield

Studying Gregorian chant presents many problems to the researcher because its most important stages of development were not recorded in writing. From the sixth to the tenth century, this form of music existed only in song as medieval musicians relied on their memories and voices to pass each verse from one generation to the next. Peter Jeffery

offers an innovative new approach for understanding how these melodies were created, memorized, performed, and modified. Drawing on a variety of disciplines, including anthropology and ethnomusicology, he identifies characteristics of Gregorian chant that closely resemble other oral traditions in non-Western cultures and demonstrates ways music historians can take into account the social, cultural, and anthropological contexts of chant's development.

In *The Tango Machine*, ethnomusicologist Morgan Luker examines the new and different ways contemporary tango music has been drawn upon and used as a resource for cultural, social, and economic development in Buenos Aires, Argentina. In doing so, he addresses broader concerns about how the value and meaning of musical culture has been profoundly reframed in the age of expediency where music and the arts are called upon and often compelled to address social, political and economic problems that were previously located outside the cultural domain. Long hailed as Argentina's so-called national genre of popular music and dance, tango has not been musically or socially popular in Argentina since the late 1950s, and today the vast majority of Argentines consider tango to be little more than a kitschy remnant of an increasingly distant past. Nevertheless, tango continues to have salience as a potent symbol of Argentine culture within the national imaginary and global representations. Ultimately, Luker argues that tango in Buenos Aires is not exceptional, but in fact emblematic of musical culture in the age of expediency,

where the value and meaning of music and the arts are largely defined by their usability within broader social, political, and economic projects. Luker tackles here some of the core conceptual challenges facing critical music scholarship; the book will be an important resource for readers in ethnomusicology and music, anthropology, cultural studies, and Latin American studies."

This booklet hardly needs a preface; the contents, I think, speak for themselves. It contains a short and carefully brought up to date resume of all that I, as a private University Lecturer in Amsterdam, have tried to teach my pupils. It is intended as a general introduction to ethnomusicology, before going on to the study of the forms of separate music-cultures. I sincerely hope that those, who wish to teach themselves and to qualify in this branch of knowledge, will find a satisfactory basis for self-tuition in the matter here brought together. Regarding the possibility of a new edition, any critical remarks or information as to possible desiderata would be very gratefully received. J.K. PREFACE TO THE SECOND EDITION My request for critical remarks and desiderata has not been ignored. My sincere thanks to all who took the trouble to let me know what they missed in my booklet. Through their collaboration the contents have undergone a considerable improvement and enlargement as compared to the original edition issued in 1950 by the Royal Tropical Institute, Amsterdam, under the title 'Musicologica'. I have taken care to add many particulars from non-European sources, with the result that now the book is no longer so Europe-centric as it was. Furthermore, I

have done my best to mention in a special bibliography all the more important ethnomusicological publications, with the exception of those issued in the Russian, Arabic, Chinese, Indonesian, Javanese.

How does the immediate experience of musical sound relate to processes of meaning construction and discursive mediation? This question lies at the heart of the studies presented in *Experience and Meaning in Music Performance*, a unique multi-authored work that both draws on and contributes to current debates in a wide range of disciplines, including ethnomusicology, musicology, psychology, and cognitive science. Addressing a wide range of musical practices from Indian raga and Afro-Brazilian Congado rituals to jazz, rock, and Canadian aboriginal fiddling, the coherence of this study is underpinned by its three main themes: experience, meaning, and performance. Central to all of the studies are moments of performance: those junctures when sound and meaning are actually produced. Experience-what people do, and what they feel, while engaging in music-is equally important. And considered alongside these is meaning: what people put into a performance, what they (and others) get out of it, and, more broadly, how discourses shape performances and experiences of music. In tracing trajectories from moments of musical execution, this volume a novel and productive view of how cultural practice relates to the experience and meaning of musical performance. A model of interdisciplinary study, and including access to an array of audio-visual materials available on an

extensive companion website, Experience and Meaning in Music Performance is essential reading for scholars and students of ethnomusicology and music psychology. Applied ethnomusicology is an approach guided by principles of social responsibility, which extends the usual academic goal of broadening and deepening knowledge and understanding toward solving concrete problems and toward working both inside and beyond typical academic contexts (International Council for Traditional Music 2007). This edited volume is based on the first symposium of the ICTM's Study Group on Applied Ethnomusicology in Ljubljana, Slovenia in 2008 that brought together more than thirty specialists from sixteen countries worldwide. It contains a Preface, an extensive Introduction, and twelve selected peer-reviewed articles by authors from Australia, Austria, Canada, Germany, Slovenia, Serbia, South Africa, the United Kingdom, and the United States of America, divided into four thematic groups. These groups encompass: diverse perspectives on the growing field of applied ethnomusicology in various geographical and problem-solving contexts; research and teaching-related connotations; the potential in contributing to sustainable music

cultures; and the use of music in conflict resolution situations. The edited volume Applied Ethnomusicology: Historical and Contemporary Approaches brings together previously dispersed knowledge and perspectives, and offers new insights to various disciplines within the humanities and social sciences. Rooted in diverse scholarly traditions, it addresses a variety of challenges in today's world and aims to benefit the quality of human existence.

From one of the most lauded scholars in ethnomusicology comes this enlightening and highly personal narrative on the evolution and current state of the field of ethnomusicology. Surveying the field he helped establish, Bruno Nettl investigates how concepts such as evolution, geography, and history serve as catalysts for advancing ethno-musicological methods and perspectives. Nettl's entertaining collection covers his scholarly interests ranging from Native American to Mediterranean to Middle Eastern contexts while laying out the pivotal moments of the field and conversations with the giants of its past. Bruno Nettl is professor emeritus of music and anthropology at the University of Illinois Urbana-Champaign and the author of The Study of Ethnomusicology: Thirty-One Issues and Concepts and many other books.

Whether regarded as a perplexing object, a morally captivating force, an

ineffable entity beyond language, or an inescapably embodied human practice, music has captured philosophically inclined minds since time immemorial. In turn, musicians of all stripes have called on philosophy as a source of inspiration and encouragement, and scholars of music through the ages have turned to philosophy for insight into music and into the worlds that sustain it. In this Handbook, contributors build on this legacy to conceptualize the rich interactions of Western music and philosophy as a series of meeting points between two vital spheres of human activity. They draw together key debates at the intersection of music studies and philosophy, offering a field-defining overview while also forging new paths. Chapters cover a wide range of musics and philosophies, including concert, popular, jazz, and electronic musics, and both analytic and continental philosophy.

Hailed as a national hero and musical revolutionary, Thomas Mapfumo, along with other Zimbabwean artists, burst onto the music scene in the 1980s with a unique style that combined electric guitar with indigenous Shona music and instruments. The development of this music from its roots in the early Rhodesian era to the present and the ways this and other styles articulated with Zimbabwean nationalism is the focus of Thomas Turino's new study. Turino examines the emergence of cosmopolitan culture among the black middle class and how this gave rise to a variety of urban-popular styles modeled on influences ranging from the Mills Brothers to Elvis. He also shows how cosmopolitanism gave rise to the nationalist movement itself, explaining the combination of "foreign" and indigenous elements that so often define nationalist art and cultural projects. The first book-length look at the role of music in African nationalism, Turino's work delves deeper than most books about popular music and challenges the reader to think about the lives and struggles of the people behind the surface appeal of world music.

 In *Heartland Excursions*, a legendary ethnomusicologist takes the reader along for a delightful, wide-ranging tour of his workplace. Bruno Nettl provides an insightful, sometimes tongue-in-cheek, always pithy ethnography of midwestern university schools of music from a different perspective in each of four chapters, alternating among three distinct voices: the longtime professor, the "native informant," and the outside observer, an "ethnomusicologist from Mars." If you've ever been to a concert or been connected to a university with a school of music, you'll discover yourself--or someone you know--in these pages. "In the music building you can't tell the quick from the dead without a program."--Chapter 1, "In the Service of the Masters" "The great ability of a violin student whom I observed was established when his dean was persuaded to accompany him."--Chapter 2, "Society of Musicians" "Some teachers of music history would accuse students who listen to Elvis Presley not only of taking time away from hearing Brahms, but also of polluting themselves."--Chapter 3, "A Place for All Musics?" At commencement, the graduates "were perhaps not aware that they had just participated in an event in which the principal values of the Western musical world . . . had been taken out of storage bins for annual exercise."--Chapter 4, "Forays into the Repertory"

 This shorter version of the best-selling *WORLDS OF MUSIC* provides much of the authoritative coverage of the comprehensive version in a format that's accessible to students without any background or training in music. Using a

case-study approach, the text presents in-depth explorations of music of several cultures from around the world. The authors, all ethnomusicologists working in their fields of expertise, base their discussions of music-cultures on their own fieldwork, and give students a true sense of both the music and culture that created it. General editor, Jeff Todd Titon, has written the text's opening chapter that introduces students to ethnomusicology and relates each chapter's music heard on the accompanying CDs to the fundamentals of music in a worldwide context. The text concludes with a chapter that invites students to participate by undertaking a fieldwork research project that increases a student's understanding of music in daily life. The supplementary three-CD set works hand in hand with the authors' prose, providing students with access to a wide range of music-cultures and include authentic recordings from the authors' fieldwork. Leading off is the long-standing jewel in the *WORLDS OF MUSIC* crown -- James Koetting's magnificent recording of postal workers canceling stamps at the University of Ghana post office. A Western-sounding hymn tune performed against African rhythms, this piece, more than any other, lets the student hear contrasting music-cultures.  This is a comprehensive approach to music from the point of view of anthropology. The author maintains that ethnomusicology, by definition, must not divorce the sound-analysis of music from its cultural context of people thinking, acting, and creating.
