Drawing on
research into
autobiographi

cal video production by young learners to present a theory of curatorship and new media, this work explores facets of literacy and identity theory which provided the initial frames for examining the work and shows how 'curatorship' works as a metaphor for new cultural and literacy practices. An Indigenous Peoples' History of the United States (10th Anniversary Edition) Taylor

& Francis We Interrupt This Program tells the story of how Indigenous people are using media tactics in the realms of art, film, television, and journalism to rewrite Canada's national narratives from Indigenous perspectives. Miranda Brady and John Kelly showcase the diversity of these interventions by offering personal accounts and reflections on key moments - witnessing

survivor testimonies at the Truth and Reconciliation Commission, attending the opening night of the ImagineNative Film + Media Festival, and discussing representations of Indigenous people with artists such as Kent Monkman and Dana Claxton and with CBC journalist Duncan McCue. These scene-setting moments bring to life their argument that media tactics, as articulations

of Indigenous sovereignty, have the power not only to effect change from within Canadian institutions and through established mediums but also to spark new forms of political and cultural expression in Indigenous communities and among Indigenous youth. Theoretically sophisticated and eminently readable, *We Interrupt This Program* reveals how seemingly unrelated acts by Indigenous

activists across Canada are decolonizing our cultural institutions from within, one intervention at a time. *Un/Covering the North* University of Arizona Press John Martin Crawford is a serial sex killer, but his crimes have gone almost unnoticed in the media and he is currently serving out his three concurrent life sentences in virtual anonymity. In addition to a prior sentence for

manslaughter, Crawford has been convicted of three murders, all of them women, all of them Native. He is also suspected in at least three other murders or mysterious disappearances of aboriginal women. His name should be as notorious as those of Paul Bernardo and Charles Ng, yet few people have heard of him. Author Warren Goulding raises disturbing questions about racism

in both the police force and the media treatment of John Crawford and his victims. He lays bare the assumptions and attitudes that resulted not only in Crawford's obscurity, but the public dismissal of the deaths of Mary Jane Serloin, Shelley Napope, Eva Taysup, and Calinda Waterhen. The result is a gripping and disquieting book that questions the value a predominantly white society

places on aboriginal lives.

Critical Race Media Literacy

Springer
Since the end of the Mexican Revolution in 1917, the state has engaged in vigorous campaign to forge a unified national identity. Within the context of this effort, Indians are at once both denigrated and romanticized. Often marginalized, they are nonetheless subjects of constant

national interest. Contradictory policies highlighting segregation, assimilation, modernization, and cultural preservation have alternately included and excluded Mexico's indigenous population from the state's self-conscious efforts to shape its identity. Yet, until now, no single book has combined the various elements of this process to provide a comprehensive look at the

Indian in Mexico's cultural imagination. Indigeneity in the Mexican Cultural Imagination offers a much-needed examination of this fickle relationship as it is seen through literature, ethnography, film and art. The book focuses on representation of indigenous peoples in post-revolutionary literary and intellectual history by examining key cultural texts. Using these analyses as a foundation, Analisa Taylor links her critique to national Indian policy, rights, and recent social movements in Southern Mexico. In addition, she moves beyond her analysis of indigenous peoples in general to take a gendered look at indigenous women ranging from the villainized Malinche to the highly romanticized and sexualized Zapotec women of the Isthmus of Tehuantepec. The contradictory treatment of the Indian in Mexico's cultural imagination is not unique to that country alone. Rather, the situation there is representative of a phenomenon seen throughout the world. Though this book addresses indigeneity in Mexico specifically, it has far-reaching implications for the study of indigenaety across Latin America and

beyond. Much like the late Edward Said's Orientalism, this book provides a glimpse at the very real effects of literary and intellectual discourse on those living in the margins of society. This book's interdisciplinary approach makes it an essential foundation for research in the fields of anthropology, history, literary critique, sociology, and cultural studies. While the book is

ideal for a scholarly audience, the accessible writing and scope of the analysis make it of interest to lay audiences as well. It is a must-read for anyone seeking a deeper understanding of the politics of indigeneity in Mexico and beyond. We Interrupt This Program IWGIA Cited in the Chicago Manual of Style The groundbreaking Indigenous style guide every writer needs A new

editorial team continues the paradigm-shifting conversation started by the late Gregory Younging in his foundational Elements of Indigenous Style. Trusted by writers, editors, publishers, researchers, scholars, journalists, and communications professionals around the world, the second edition of Elements continues to offer crucial guidance to everyone who works with

words on how to accurately, collaboratively, and ethically participate in projects involving Indigenous Peoples. This second conversation updates and annotates Younging's twenty-two succinct style principles and recommendations to reflect up-to-date, Indigenous-led best practices. The new edition also includes: - Advice on culturally appropriate writing and publishing practices, and guidance on

specific editorial issues such as spelling and terminology - Five new chapters covering author-editor relationships, identity and community affiliation, Two-Spirit and Indigiqueer identities, Indigenous citation practices, sensitivity reading, the representation of Indigenous languages and oral narratives in print, emerging issues in the digital world, and more - Examples of projects and

institutions that demonstrate best practices - An expanded table of contents and full index for easy navigation
Electronic Media and Indigenous Peoples
Calgary : Fifth House Publishers
Edmund Snow Carpenter (1922-2011), shaped by an early encounter with Marshall McLuhan, was a renegade anthropologist who would plumb the connection between anthropology

and media studies over a thoroughly unconventional career. As co-conspirators in the founding of the legendary journal *Explorations* (1953–59), Carpenter and McLuhan established the groundwork for media studies. After ten years teaching anthropology at the University of Toronto, hosting radio and television shows on the CBC, and doing major research in

the Arctic, Carpenter left Toronto and became an itinerant anthropologist. He took up a position in Papua New Guinea, where he countered anthropological practice by handing his camera to the Papuans. Carpenter's marriage to the artist and heiress Adelaide de Menil made him a truly independent scholar. With the support of the Rock Foundation, founded by de Menil, he collected ethnographica

l art, curated exhibitions, and edited the materials for a twelve-volume study of social symbolism based on the massive archives created by Carl Schuster. Richard Cavell shows Carpenter – austere, generous, and unpredictable – to also be unwavering in working throughout his career within the framework established by *Explorations*. The anthropological impetus for media studies has largely been

forgotten. This study restores that memory, tracing Carpenter's work in media and in anthropology over a lifetime of cultural achievements and intellectual convolutions. **Reclaiming Indigenous Voice and Vision** IDRC Cultural property, aboriginal people, ethnobiology, legal status, laws. **Climate Change and Indigenous Peoples in the United States** Multilingual

Matters Digital Media and the Preservation of Indigenous Languages in Africa: Toward a Digitalized and Sustainable Society presents cutting-edge epistemologic al debates, academic case studies, and empirical research from African scholars on the intersection of digital media technologies, artificial intelligence, and the preservation of Indigenous languages in the continent.

This edited collection provides a methodology for African researchers, practitioners, and marginalized communities to integrate digital technologies into their lives to foster innovation, advance the documentation and preservation of underrepresented languages, and promote African-centered epistemologies. Contributors to this edited volume argue that African

societies should acknowledge and embrace digital media platforms. Despite these platforms' potential as sites of epistemic colonialism, they are essential for promoting ways of life that reflect the diversity and importance of Indigenous cultures. For Indigenous languages and local epistemologies to flourish in this rapidly evolving technological era, African communities

must employ a variety of contemporary practices and strategies to document, protect, and preserve ways of being that have formerly been relegated to the periphery. *Indigenous Interfaces* Boydell & Brewer As changing technologies open up additional channels of communication around the world, alternative voices are demanding to be heard. *Electronic Media and Indigenous*

Peoples provides the first guide to the efforts of indigenous peoples to present themselves on radio, television, and audio- and videocassettes. Based largely on field research, the book documents the program-making of the Welsh in Wales, Irish-speakers in Ireland, Native Americans in the United States and Canada, Sami in Scandinavia, Aboriginals in Australia, Maori in New

Zealand, Basque in France, and many others. **Information Technology and Indigenous People** UBC Press
The first book to examine the role of Canada's newspapers in perpetuating the myth of Native inferiority. Seeing Red is a groundbreaking study of how Canadian English-language newspapers have portrayed Aboriginal peoples from 1869 to the

present day. It assesses a wide range of publications on topics that include the sale of Rupert's Land, the signing of Treaty 3, the North-West Rebellion and Louis Riel, the death of Pauline Johnson, the outing of Grey Owl, the discussions surrounding Bill C-31, the "Banded Elbow" standoff at Kenora, Ontario, and the Oka Crisis. The authors uncover overwhelming evidence that the colonial

imaginary not only thrives, but dominates depictions of Aboriginal peoples in mainstream newspapers. The colonial constructs ingrained in the news media perpetuate an imagined Native inferiority that contributes significantly to the marginalization of Indigenous people in Canada. That such imagery persists to this day suggests strongly that our country lives in denial, failing to live

up to its cultural mosaic boosterism. *Decolonizing Methodologies* UBC Press Exploring Indigenous activism through the lens of media practices, this book examines the Indigenous media that has emerged in Argentina since the introduction of legislation in 2009 intended to promote diversity and access in radio and television media production. Francesca Belotti

provides insights into the political and cultural matrix, attitudes of resistance and empowerment, and the outward and inward direction of Indigenous activism by unpacking the media practices that unfold in Indigenous radio and television stations in Argentina. The theoretical framework combines studies on indigeneity, social/decolonial movements and media practices, and

draws on interviews conducted with Indigenous media practitioners from different Indigenous populations around Argentina. The book examines how media practices can help support and sustain Indigenous political and cultural activism and the process of identity self-ascription. It also addresses the complex negotiation between indigenizing media and assimilating

the mainstream, as well as coping with other practical constraints. This book will be of interest both to students and scholars of Indigenous Studies, Decolonial and Postcolonial Studies, Cultural Studies, Latin American Studies, Media Studies, and Social Movements, as well as media activists and practitioners globally.

Digital Media and the Preservation

of Indigenous Languages in Africa
Routledge
How do we talk about the environment? Does this communication reveal and construct meaning? Is the environment expressed and foregrounded in the new landscape of digital media? The Environment in the Age of the Internet is an interdisciplinary collection that draws together research and answers from media and

communication studies, social sciences, modern history, and folklore studies. Edited by Heike Graf, its focus is on the communicative approaches taken by different groups to ecological issues, shedding light on how these groups tell their distinctive stories of "the environment". This book draws on case studies from around the world and focuses on activists of

radically different kinds: protestors against pulp mills in South America, resistance to mining in the Sámi region of Sweden, the struggles of indigenous peoples from the Arctic to the Amazon, gardening bloggers in northern Europe, and neo-Nazi environmentalists in Germany. Each case is examined in relation to its multifaceted media coverage, mainstream and digital,

professional and amateur. Stories are told within a context; examining the "what" and "how" of these environmental stories demonstrates how contexts determine communication, and how communication raises and shapes awareness. These issues have never been more urgent, this work never more timely. The Environment in the Age of the Internet is essential reading for everyone

interested in how humans relate to their environment in the digital age. Beyond Intellectual Property UBC Press Reclaiming Indigenous Governance examines the efforts of Indigenous peoples in four important countries to reclaim their right to self-govern. Showcasing Native nations, this timely book presents diverse perspectives of both practitioners and

researchers involved in Indigenous governance in Canada, Australia, New Zealand, and the United States (the CANZUS states). Indigenous governance is dynamic, an ongoing relationship between Indigenous peoples and settler-states. The relationship may be vigorously contested, but it is often fragile—one that ebbs and flows, where hard-won gains can be swiftly lost by

the policy reversals of central governments. The legacy of colonial relationships continues to limit advances in self-government. Yet Indigenous peoples in the CANZUS countries are no strangers to setbacks, and their growing movement provides ample evidence of resilience, resourcefulness, and determination to take back control of their own destiny. Demonstrating the

struggles and achievements of Indigenous peoples, the chapter authors draw on the wisdom of Indigenous leaders and others involved in rebuilding institutions for governance, strategic issues, and managing lands and resources. This volume brings together the experiences, reflections, and insights of practitioners confronting the challenges of governing, as well as researchers seeking to

learn what Indigenous governing involves in these contexts. Three things emerge: the enormity of the Indigenous governance task, the creative agency of Indigenous peoples determined to pursue their own objectives, and the diverse paths they choose to reach their goal. *In the Way of Development* Open Book Publishers Investigates the

significance of a range of digital technologies in contemporary Indigenous musical performance, exploring interdisciplinary issues of music production, representation, and transmission. Decolonising Digital Media and Indigenisation of Participatory Epistemologies U of Nebraska Press Authored as a result of a remarkable collaboration between

indigenous people's own leaders, other social activists and scholars from a wide range of disciplines, this volume explores what is happening today to indigenous peoples as they are enmeshed, almost inevitably, in the remorseless expansion of the modern economy and development, at the behest of the pressures of the marketplace and government. It is particularly timely, given

the rise in criticism of free market capitalism generally, as well as of development. The volume seeks to capture the complex, power-laden, often contradictory features of indigenous agency and relationships. It shows how peoples do not just resist or react to the pressures of market and state, but also initiate and sustain "life projects" of their own which embody local history and

incorporate plans to improve their social and economic ways of living. **Global Indigenous Media** Duke University Press Fray Bernardino de Sahagún-INAH Award in Mexico for Best Research Work in Anthropology Gabriela Zamorano Villarreal examines the political dimension of indigenous media production and distribution as a means by which

indigenous organizations articulate new claims on national politics in Bolivia, a country experiencing one of the most notable cases of social mobilization and indigenous-based constitutional transformation in contemporary Latin America. Based on fieldwork in Bolivia from 2005 to 2007, Zamorano Villarreal details how grassroots indigenous media production

has been instrumental to indigenous political demands for a Constituent Assembly and for implementing the new constitution within Evo Morales's controversial administration . On a day-to-day basis, Zamorano Villarreal witnessed the myriad processes by which Bolivia's indigenous peoples craft images of political struggle and enfranchisement to produce films about their role in

Bolivian society. Indigenous Media and Political Imaginaries in Contemporary Bolivia contributes a wholly new and original perspective on indigenous media worlds in Bolivia: the collaborative and decolonizing authorship of indigenous media against the neoliberal multicultural state, and its key role in reimagining national politics. Zamorano Villarreal unravels the negotiations

among indigenous media makers about how to fairly depict a gender, territorial, or justice conflict in their films to promote grassroots understanding of indigenous peoples in Bolivia's multicultural society. *Digital Media, Cultural Production and Speculative Capitalism* Wiley-Blackwell Examines how indigenous people in Australia, New Zealand, the South Pacific Island

countries and Canada make use of their own communications technologies as cultural, social and political resources. <i>Indigenous Media in Mexico</i> Taylor & Francis Deals with the controversy in defining indigenous people and indogeneity. Discusses standard-setting activities in international law and ethno-nationalist interpretations in Asia, including 15	country profiles focusing on terms used, government positions, and recognized indigenous nationalities. Makes reference to the LO Indigenous and Tribal Populations Convention, 1957 (No. 107) and the ILO Indigenous and Tribal Peoples Convention, 1989 (No. 169). <i>A World of Indigenous Languages</i> Rowman & Littlefield Tracing the development of new	technological skills and digital cultures, this book looks at the rise of new digital divides and reveals how these inequalities affect cross-cultural communication from a cultural discourse studies perspective in various ethnic and cultural groups across the world. The authors discuss the development of multicultural societies across the globe under new
---	---	--

challenges brought by digitalization, such as digital exclusion, new professional and personal demands in terms of digital engagement. In addition to highlighting digital inequalities in access, use and benefits of using ICTs, case studies from different national contexts demonstrate the ways minority ethnic and cultural groups are adapting to the new digital environment;

explore the transformations that multicultural affairs and communication undergo in the new digital setting; and analyse policy measures aimed at fostering digital inclusion of minor groups. The book advances knowledge of the digital divide, showing its development from a technological access- and skill-based problem into a social and culture-oriented one.

This resourceful text will be of interest to students and scholars of social inequality, digital media and communication studies and anyone interested in learning how multicultural discourses are developing in varied national contexts today.

The New Media Nation

Berghahn Books

This volume offers deeper exploration and advancement

of critical race media literacy, a concept which fuses the genres of media literacy and critical media literacy with critical race theory to bring a new and salient frame to the discussion of media literacy across all levels of education in today's globalized, race-based, and media-saturated climate. Bridging the gap in research that has not addressed the ways in which media is a

conduit of racial dialogue and ideology, the book brings together a diverse group of scholars that explore their perspectives on critical race media literacy as it is experienced from the interface and consumption of a variety of media texts and social phenomena. Topics addressed include news literacy, children's literature, Black political movements, media protests, and

ethnic rock—Critical Race Media Literacy addresses these topics within existing media literacy contexts to enhance media literacy scholarship and educational pedagogy. This book will provide a timely and important resource not only for scholars and students of media literacy and media education but also for educators working in diverse learning settings.
