This report presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It

analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases. It provides an overview of industrial policy models for countries at different development levels and the role of investment policies within each model. It analyses the investment policy implications of the new industrial revolution for high-, middle- and low-income countries and offers a toolkit for investment policymakers on how to use investment policies for new industrial development strategies.

Emilio Sereni's classic work is now available in an English language edition. *History of the Italian Agricultural Landscape* is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this

sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics,

archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. *Protecting the Quality of Our Environment* HarperCollins UK For more than 120

years (1714–1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the

burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

Over the past few decades, relationships between social workers and the media have become increasingly challenging. Social workers feel aggrieved by media reporting of

their profession and believe that journalists lack sufficient knowledge and experience of the social services to report matters adequately and sensitively, whilst some journalists have urged social workers to adopt a more proactive public relations strategy. This book, first published in 1991, analyses the causes and consequences of the negative portrayal of social work within the media and considers various ways in which this image might be improved. The authors consider a variety of developments during the 1990s designed to redress imbalances in media reporting and present a more accurate picture of social workers and the

people with whom they work. This title remains very relevant in light of the high profile cases related to the social service that continue to feature in the British press, and will be of particular value to students and researchers with an interest in the relationship between the media and social policy.

This classic work presents a stimulating survey of the most exciting and innovative period in the history of architecture. Lotz also goes beyond the more

familiar locations, architects and buildings to conquer less well-known territories, exploring Piedmont and Vitozzi and ending with a study of bizzarrie. *Nanotechnology in Agriculture* HarperCollins UK Music in Film: Soundtracks and Synergy discusses a broad range of films - from classical Hollywood through to American independents and European art films - and offers a brief history of the development of music in film from the silent era to the present day. In particular, this book explores how music operates as a narrative device, and also emotionally and culturally. By focusing on the increasing

synergy between film and music texts, it includes an extended case study of *Magnolia* as a film script which developed from a pop song. Emphasis is also placed on the divide between the 'high culture' of the orchestral score and the 'low culture' of the pop song.

On the occasion of the 90th anniversary of Pininfarina, a marque synonymous with style and elegance applied to car design, Pininfarina is a book that surveys, for the first time, the entire output of the Turin coachbuilder, model by model. Produced in close collaboration with the company, it draws on invaluable photographic material

accompanying brief contextualising texts. Tracing the history of Pininfarina from its origins to the present day entails reviewing some of the most iconic models in automotive history: from the numerous Ferraris bodied by the historic partner of the Maranello firm to cars such as the Cisitalia 202, the Lancia Aurelia, the Alfa Romeo Duetto and 164, the Maserati GranTurismo through to the current models born under the aegis of the Indian firm Mahindra. The book also covers the numerous Pininfarina concept cars that have written glorious pages in the history of design, raising the bar every time in terms of the excellence of the car product.
