Climate Change is geared toward a variety of students and general readers who seek the real science behind global warming. Exquisitely illustrated, the text introduces the basic science underlying both the natural progress of climate change and the effect of human activity on the deteriorating health of our planet. Noted expert and author Edmond A. Mathez synthesizes the work of leading scholars in climatology and related fields, and he concludes with an extensive chapter on energy production, anchoring this volume in economic and technological realities and suggesting ways to reduce greenhouse-gas emissions. Climate Change opens with the climate system fundamentals: the workings of the atmosphere and ocean, their chemical interactions via the carbon cycle, and the scientific framework for understanding climate change. Mathez then brings the climate of the past to bear on our present predicament, highlighting the importance of paleoclimatology in understanding the current climate system. Subsequent chapters explore the changes already occurring around us and their implications for the future. In a special feature, Jason E. Smerdon, associate research scientist at Lamont-Doherty Earth Observatory of Columbia University, provides an innovative appendix for students.

For courses in computer programming C How to Program is a comprehensive introduction to programming in C. Like other texts of the Deitels' How to Program series, the book serves as a detailed beginner source of information for college students looking to embark on a career in coding, or instructors and software-development professionals seeking to learn how to program with C. The Eighth Edition continues the tradition of the signature Deitel "Live Code" approach--presenting concepts in the context of full-working programs rather than incomplete snips of code. This gives students a chance to run each program as they study it and see how their learning applies to real world programming scenarios. MyProgrammingLab® not included. Students, if MyProgrammingLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN and course ID. MyProgrammingLab should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information.

MyProgrammingLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts.

Ethical concerns are among the most common problems public administrators face, yet the issues are often complex, and the correct choices are not always clear. Living up to the public trust is much more than just an act of compliance. It also involves perceiving, preventing, avoiding, and resolving accusations of illegal or unethical behavior, including appearances of inappropriate behavior. *Ethics Moments in Government: Cases and Controversies* examines how to identify, assess, and resolve the ethical issues and dilemmas that often confront those who govern the cities, counties, states, and federal agencies throughout America. *Real Situations, Real Advice* Providing a one-stop resource for all those who must contend with thorny ethical issues, this volume presents case studies that vary in complexity and context and are based on real situations. Each case scenario is followed by discussion questions and case assessments by expert practitioners who describe how they would handle the situation. Using a "total immersion" technique, the book encourages readers to be reflexive and analytical in addressing the problems presented and arriving at appropriate solutions. A supplemental CD is included which contains PowerPoint® slide presentations, articles, workshop programs, tests, and links to organizations. For many of the scenarios presented in this volume, there are no easy answers. Practical guidance on reasoning through difficult decision-making situations enables public administrators to acquire the ethical knowledge, skills, abilities, and instincts that will ultimately help them gain the trust of their citizens and advance in their careers.

Lucy B. Parker is running for class president! Sure, Lucy could let her frister (friend + sister), teen superstar Laurel Moses, campaign for her, but Lucy wants to win as Lucy, not as Laurel Moses' less-pretty-less- talented stepsister. To make matters worse, Lucy's feeling totally ignored by her dad and his girlfriend, who are preparing for their new baby. How is Lucy going to manage her famous frister, a soon-to-exist baby, and the campaign of the year all at once?

Carrots and Sticks Don't Work: Build a Culture of Employee Engagement with the Principles of RESPECT Brooks/Cole Publishing Company

Advance praise for Carrots and Sticks Don't Work: "Paul Marciano provides a wealth of prescriptive advice that absolutely makes sense. You can actually open the book to any chapter and gain ideas for immediate implementation." -- Beverly Kaye, coauthor of Love 'Em or Lose 'Em "This book should be in the hands of anyone

who has to get work done through other people! It's an invaluable tool for any manager at any level." -- John L. Rice, Vice President Human Resources, Tyco International "Carrots and Sticks Don't Work provides a commonsense approach to employee engagement. Dr. Marciano provides great real-world insights, data, and practical examples to truly bring the RESPECT model to life." -- Renee Selman, President, Catalina Health Resources "The RESPECT model is one of the most dynamic, engaging, and thought-provoking employee engagement tools that I have seen. Dr. Marciano's work will help you provide meaningful long-term benefits for your employees, for your organization, and for yourself." -- Andy Brantley, President and CEO, College and University Professional Association for Human Resources "This book provides clear advice and instruction on how to engage your team members and inspire them to a higher level of productivity, work satisfaction, and enjoyment. I am already utilizing its techniques and finding immediate positive changes." -- Robert Roth, Director, Accounting and Reporting, Colgate Palmolive Company The title says it all: Carrots and Sticks Don't Work. Reward and recognition programs can be costly and inefficient, and they primarily reward employees who are already highly engaged and productive performers. Worse still, these programs actually decrease employee motivation because they can make individual recognition, rather than the overall success of the team, the goal. Yet many businesses turn to these measures first—unaware of a better alternative. So, when it comes to changing your organizational culture, carrots and sticks don't work! What does work is Dr. Paul Marciano's acclaimed RESPECT model, which gives you specific, low-cost, turnkey solutions and action plans-- based on seven key drivers of employee engagement that are proven and supported by decades of research and practice—that will empower you to assess, troubleshoot, and resolve engagement issues in the workplace: Recognition and acknowledgment of employees' contributions Empowerment via tools, resources, and information that set employees up to succeed Supportive feedback through ongoing performance coaching and mentoring Partnering to encourage and foster collaborative working relationships Expectations that set clear, challenging, and attainable performance goals Consideration that lets employees know that they are cared about Trust in your employees' abilities, skills, and judgment Carrots

and Sticks Don't Work delivers the same proven resources and techniques that have enabled trainers, executives, managers, and owners at operations ranging from branches of the United States government to Fortune 500 corporations to twenty-person outfits to realize demonstrable gains in employee productivity and job satisfaction. When you give a little RESPECT you get a more effective organization, with reduced turnover and absenteeism and employees at all levels who are engaged, focused, and committed to succeed as a team. In short, you get maximum ROI from your organization's most powerful resource: its people!

Automating with PROFINET McGraw Hill Professional PROFINET is the first integrated Industrial Ethernet Standard for automation, and utilizes the advantages of Ethernet and TCP/IP for open communication from the corporate management level to the process itself. PROFINET CBA divides distributed, complex applications into autonomous units of manageable size. Existing fieldbuses such as PROFIBUS and AS-Interface can be integrated

using so-called proxies. This permits separate and cross-vendor development, testing and commissioning of individual plant sections prior to the integration of the solution as a whole. PROFINET IO, with its particularly fast real-time communication, fulfills all demands currently placed on the transmission of process data and enables easy integration of existing fieldbus systems. Isochronous real-time (IRT) is used for isochronous communication in motion control applications. PROFINET depends on established IT standards for network management and teleservice. Particular to automation control engineering it offers a special security concept. Special industrial network technology consisting of active network components, cables and connection systems, together with recommendations for installation, complete the concept. This book serves as an introduction to PROFINET technology. Configuring engineers, commissioning engineers and technicians are given an overview of the concept and the fundamentals they need to solve PROFINET-based automation tasks. Technical relationships and practical applications are described using SIMATIC products as example. Human Behavior and the Social Environment, Macro Level Oxford University Press, USA

Examining a century of university history, Larry Cuban tackles the age-old question: What is more important, teaching or research? Using two departments (history and medicine) at Stanford University as a case study, Cuban shows how universities have organizationally and politically subordinated teaching to research for over one hundred years. He explains how university reforms, decade after decade, not only failed to dislodge the primacy of research but actually served to strengthen it. He examines the academic work of research and teaching to determine how each has influenced university structures and processes, including

curricular reform. Can the dilemma of scholars vs. teachers ever be fully reconciled? This fascinating historical journey is a must read for all university administrators, faculty, researchers, and anyone concerned with educational reform.

Relative Truth, Ultimate Truth is a clear and remarkably practical presentation of a core Buddhist teaching on the nature of reality. Geshe Tashi Tsering provides readers with an excellent opportunity to enhance not only their knowledge of Buddhism, but also a powerful means to profoundly enhance their view of the world. The Buddhist teaching of the "two truths" is the gateway to understanding the often-misunderstood philosophy of emptiness. This volume is an excellent source of support for anyone interested in cultivating a more holistic and transformative understanding of the world around them and ultimately of their own consciousness.

Yours Truly, Lucy B. Parker: Vote for Me! Columbia University Press

A timely revision in this global age, Human Behavior and the Social Environment, Macro Level develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. * Integrates up-to-date research findings, models, and government statistics * Enhanced discussions of theory, group dynamics, family, community, and the environment * Theoretical concepts

and practice implications in each chapter * Highlights the importance of the natural environment and ecology--the "community of the earth"--to human and group behavior * Sets forth a refined understanding of the role of spirituality--the "community of faith"--in people's lives * Focuses on evidence-based theory and research * Teaches from a global, cross-

cultural, perspective, highlighting themes of empowerment and social justice * Features dynamic readings, personal narratives, and photographs that highlight each chapter's topic * Accompanied by an online instructor's manual with lecture presentations, chapter summaries, key terms, suggested

classroom activities, and a test bank with essay and multiple choice questions at www.oup.com/us/HBSE/ Don't miss the companion volume, *Human Behavior and the Social Environment, Micro Level, Second Edition*, which offers an eye-opening view of how biological, psychological, and cultural forces influence individuals' behavior.
