The "Roswell Incident" has assumed a central place in American folklore since the events of the 1940s in a remote area of New Mexico. Because the Air Force was a major player in those events, we have played a key role in executing the General Accounting Office's tasking to uncover all records regarding that incident. Our objective throughout this inquiry has been simple and consistent: to find all the facts and bring them to light. If documents were classified, declassify them; where they were dispersed, bring them into a single source for public review.

NEW YORK TIMES BESTSELLER Edward Snowden, the man who risked everything to expose the US government's system of mass surveillance, reveals for the first time the story of his life, including how he helped to build that system and what motivated him to try to bring it down. In 2013, twenty-nine-year-old Edward Snowden shocked the world when he broke with the American intelligence establishment and revealed that the United States government was secretly pursuing the means to collect every single phone call, text message, and email. The result would be an unprecedented system of mass surveillance with the ability to pry into the private lives of every person on earth. Six years later, Snowden reveals for the very first time how he helped to build this system and why he was moved to expose it. Spanning the bucolic Beltway suburbs of his childhood and the clandestine CIA and NSA postings of his adulthood, Permanent Record is the extraordinary account of a bright young man who grew up online—a man who became a spy, a whistleblower, and, in exile, the Internet's conscience. Written with wit, grace, passion, and an unflinching candor, Permanent Record is a crucial memoir of our digital age and destined to be a classic.

Secrets and Suppressed Evidence. Hidden plots, cover-ups, and misleading statements. Coincidences or Lies? Sifting through hundreds of historical and government documents, interviewing multitudes of participants, and tracking countless leads, a former army officer, trained as an intelligence officer, presents a case for government incompetence and, potentially, malfeasance. Shining a harsh light on the government and its secrets, *The Government UFO Files: The Conspiracy of Cover-Up* investigates what the government knows about encounters with UFOs, alien life, and mysterious activities. The government has long collected information and assembled files on unidentified objects, extraterrestrial encounters, and strange convergences in the skies, but with new government secrets constantly being revealed (including finally admitting the existence of Area 51) is it too much to believe that it is hiding important information on close encounters, UFOs, and alien life? Combing FBI, FAA, and other government files, this revealing book thoroughly examined nearly 100 sightings and other occurrences, including ... Alien abductions and encounters Foo Fighters Silver Disks, Ghost Rockets, and Fireballs The SETI search for extraterrestrial life And much, much more The Government UFO Files sorts through the information, sources, and it lets you decide whether the government is being deliberately misleading or whether the conspiracy theories have gotten out of control.

A comprehensive & authoritative history of the CIA's manned overhead reconnaissance program (MORP), which from 1954 to 1974 developed & operated 2 extraordinary aircraft, the U-2 & the A-12 OXCART. Describes not only the program's technological & bureaucratic aspects, but also its political & international context. The MORP, along with other overhead systems that emerged from it, changed the CIA's work & structure in ways that were both revolutionary & permanent. The formation of the Directorate of S&T in the 1960s, principally to develop & direct reconnaissance programs, is the most obvious legacy of the events in this study.

The incredible story of spaceflight before the establishment of NASA. NASA's history is a familiar story, one that typically peaks with Neil Armstrong taking his small step on the Moon in 1969.

But America's space agency wasn't created in a vacuum. It was assembled from pre-existing parts, drawing together some of the best minds the non-Soviet world had to offer. In the 1930s, rockets were all the rage in Germany, the focus both of scientists hoping to fly into space and of the German armed forces, looking to circumvent the restrictions of the Treaty of Versailles. One of the key figures in this period was Wernher von Braun, an engineer who designed the rockets that became the devastating V-2. As the war came to its chaotic conclusion, von Braun escaped from the ruins of Nazi Germany, and was taken to America where he began developing missiles for the US Army. Meanwhile, the US Air Force was looking ahead to a time when men would fly in space, and test pilots like Neil Armstrong were flying cutting-edge, rocket-powered aircraft in the thin upper atmosphere. *Breaking the Chains of Gravity* tells the story of America's nascent space program, its scientific advances, its personalities and the rivalries it caused between the various arms of the US military. At this point getting a man in space became a national imperative, leading to the creation of the National Aeronautics and Space Administration, otherwise known as NASA.

Discover the definitive history of DARPA, the Defense Advanced Research Project Agency, in this Pulitzer Prize finalist from the author of the New York Times bestseller *Area 51*. No one has ever written the history of the Defense Department's most secret, most powerful, and most controversial military science R&D agency. In the first-ever history about the organization, New York Times bestselling author Annie Jacobsen draws on inside sources, exclusive interviews, private documents, and declassified memos to paint a picture of DARPA, or "the Pentagon's brain," from its Cold War inception in 1958 to the present. This is the book on DARPA -- a compelling narrative about this clandestine intersection of science and the American military and the often frightening results.

[The Government UFO Files](#) Mufon

An extraordinary 95 percent of all Americans have at least heard or read something about UFOs, and 57 percent believe they are real. In late 1993, after being pressured by UFOlogists for the release of information on UFOs, the CIA ordered a review of all Agency files. Using CIA records compiled from that review in 1994, this study traces CIA interest and involvement in the UFO controversy from the late 1940s to 1990. It chronologically examines the Agency's efforts to solve the mystery of UFOs, its programs that had an impact on UFO sightings, and its attempts to conceal CIA involvement in the entire UFO issue. What emerges from this examination is that, while Agency concern over UFOs was substantial until the early 1950s, CIA has since paid only limited and peripheral attention to the phenomena. Before that time, responsibility for taking out America's enemies abroad was even more shrouded in mystery. Despite Hollywood notions of last-minute rogue-operations and external secret hires, covert action is actually a cog in a colossal foreign policy machine, moving through, among others, the Bureau of

Intelligence and Research, the House and Senate Select Committees. At the end of the day, it is the President, not the CIA, who is singularly in charge. For the first time, Pulitzer Prize finalist and New York Times bestselling author Annie Jacobsen takes us deep inside this top-secret history. With unparalleled access to former operatives, ambassadors, and even past directors of the Secret Service and CIA operations, Jacobsen reveals the inner workings of these teams, and just how far a U.S. president may go, covertly but lawfully, to pursue the nation's interests.

In this seminal work, published by the C.I.A. itself, produced by intelligence veteran Richards Heuer discusses three pivotal points. First, human minds are ill-equipped ("poorly wired") to cope effectively with both inherent and induced uncertainty. Second, increased knowledge of our inherent biases tends to be of little assistance to the analyst. And lastly, tools and techniques that apply higher levels of critical thinking can substantially improve analysis on complex problems.

The definitive history of the military's decades-long investigation into mental powers and phenomena, from the author of Pulitzer Prize finalist *The Pentagon's Brain* and international bestseller *Area 51*. This is a book about a team of scientists and psychics with top secret clearances. For more than forty years, the U.S. government has researched extrasensory perception, using it in attempts to locate hostages, fugitives, secret bases, and downed fighter jets, to divine other nations' secrets, and even to predict future threats to national security. The intelligence agencies and military services involved include CIA, DIA, NSA, DEA, the Navy, Air Force, and Army-and even the Joint Chiefs of Staff. Now, for the first time, New York Times bestselling author Annie Jacobsen tells the story of these radical, controversial programs, using never before seen declassified documents as well as exclusive interviews with, and unprecedented access to, more than fifty of the individuals involved. Speaking on the record, many for the first time, are former CIA and Defense Department scientists, analysts, and program managers, as well as the government psychics themselves. Who did the U.S. government hire for these top secret programs, and how do they explain their military and intelligence work? How do scientists approach such enigmatic subject matter? What interested the government in these supposed powers and does the research continue? Phenomena is a riveting investigation into how far governments will go in the name of national security.

In 1968, the USS Pueblo was seized while conducting electronic surveillance in international waters along the coast of North Korea, and its crew was held captive until it confessed to conducting intelligence within North Korean waters. This study examines the incident in light of concurrent historical events, recently declassified CIA documents, a naval briefing, contemporary newspaper accounts, and testimony by two members of the crew including Lloyd M. "Pete" Bucher, the commander of the ship. It finds that the main task of the Pueblo was not the surveillance of North Korea but rather a survey of the Russian fleet; nor was the incident a North Korean attempt to catch an American spy ship in the act--instead, it was probably aimed at "generating diversionary pressures on the U.S. at a time when Communist forces in South Vietnam are poised to launch a major country-wide offensive."

In this real life spy saga, James E. David reveals the extensive and largely hidden interactions between NASA and U.S. defense and intelligence departments. The story begins with the establishment of NASA in 1958 and follows the agency through its growth, not only in scope but also in complexity. In *Spies and Shuttles*, David digs through newly declassified documents to ultimately reveal how NASA became a strange bedfellow to the Department of Defense (DoD) and the Central Intelligence Agency (CIA). He tracks NASA's early cooperation—supplying cover stories for covert missions, analyzing the Soviet space program, providing weather and other scientific data from its satellites, and monitoring missile tests—that eventually devolved into NASA's reliance on DoD for political and financial support for the Shuttle. David also examines the restrictions imposed on such activities as photographing the Earth from space and the intrusive review mechanisms to ensure compliance. The ties between NASA and

the intelligence community have historically remained unexplored, and David's riveting book is the first to investigate the twists and turns of this labyrinthine relationship.

This edition of *Global Trends* revolves around a core argument about how the changing nature of power is increasing stress both

within countries and between countries, and bearing on vexing transnational issues. The main section lays out the key trends, explores their implications, and offers up three scenarios to help readers imagine how different choices and developments could play out in very different ways over the next several decades.

Two annexes lay out more detail. The first lays out five-year forecasts for each region of the world. The second provides more context on the key global trends in train.
