Improve Your Chess Tactics SCB Distributors

Confused by esoteric chess terms like castling, forking, and making Luft? Can't tell whether you've got your opponent in check or checkmate? This book will tell you everything you need to know to become a budding Kasparov, from the names of pieces and their movements to tactics and strategies, from advanced maneuvers to setting up chess tournaments and clubs where you can test your skills. Also covered: a history of chess, from its beginnings in ancient India to how it became the world's most played game; all the basics of the board and the pieces; elementary rules and object of the game; famous openings and well-know tactics; sneak attacks and other tricky plays; exercises that explain strategies and chess-move annotations (often found in newspapers); and advice for using the Internet and computer programs to better your game and tips on starting a chess club or tournament.

A Beginner's Guide to Learning the Chess Game, Pieces, Board, Rules, & Strategies CRB Publishing

A power move, explains experienced chess teacher Charles Hertan, is a winning master tactic that requires thinking ahead. To become one of the best chess players in your school you need to be able to think just 1,5 moves ahead, and this book teaches the four basic tricks do so. You will learn how to weed out silly moves and just consider a few important ones. Forget about learning openings and endgames, power moves will help you win in all stages of the game. Charles Hertan introduces the four main characters who will help you to learn these basic skills: Zort (a teenaged computer from the planet Zugszwang), the Dinosaurs, Power Chess Kid and the Chess Professor . The most complete and fun kids book ever on learning how to win games!

THE POLGAR WAY TO BETTER CHESS! Learn Chess the Right Way is a five-volume chess puzzle book series aimed at the novice, beginner and intermediate level player, using the unique methods of the award-winning coach and former world champion Susan Polgar. It introduces the most important checkmate and material-winning tactics, as well as defensive techniques to the new chess player. Each of the five volumes will consist of 500 puzzles. In Book 1, the focus is on one-move checkmate

exercises. In each of the first five chapters, a specific piece delivers checkmate (in Chapter 1 - the queen, Chapter 2 - the rook, and so on). In Chapters 6-8, checkmates which involve special tactics (such as pins, discovered attacks, etc.) are introduced. Chapter 9 has a mixed collection of puzzles, without any hint about which piece is to deliver checkmate. Chapter 10 builds on the previous 9 chapters, and introduces basic patterns of checkmate in two moves. With over 40 years of experience as a world-class player and coach, international grandmaster Susan Polgar has developed the most effective way to help young players and beginners - Learn Chess the Right Way. Let her show you the way to understanding the most common and critical patterns and let her show you the way to becoming a better player. SUSAN POLGAR is a winner of four Women's World Championships and the top-ranked woman chess player in the United States. She became the #1 woman player in the world at 15 and remained in the top 3 for over 20 years. In 2013, she received the U.S. Coach of the Year Award and the following year, she was named the Chess Trainer of the Year by the International Chess Federation (FIDE). She thus became the first person in history to be accorded both honors. Under her guidance, SPICE chess teams at both Texas Tech University and Webster University have won a combined five consecutive National Division I Collegiate Chess Championships.

The Last Book in the Universe New In Chess

This fast-paced action novel is set in a future where the world has been almost destroyed. Like the award-winning novel *Freak the Mighty*, this is Philbrick at his very best. It's the story of an epileptic teenager nicknamed Spaz, who begins the heroic fight to bring human intelligence back to the planet. In a world where most people are plugged into brain-drain entertainment systems, Spaz is

the rare human being who can see life as it really is. When he meets an old man called Ryter, he begins to learn about Earth and its past. With Ryter as his companion, Spaz sets off an unlikely quest to save his dying sister -- and in the process, perhaps the world.

The Polgar Way to Better Chess! Learn Chess the Right Way is a five-volume chess puzzle book series aimed at the novice, beginner and intermediate level player, using the unique methods of the award-winning coach and former world champion Susan Polgar. It introduces the most important checkmate and material-winning tactics, as well as defensive techniques to the new chess player. Each of the five volumes will consist of over 500 puzzles. In Volume 3, you will be introduced to 500 must-know defensive techniques. Each chapter will start with a few introductory examples and explanation about to what to look for in the puzzles that follow. In chapter 1, the task is to move an attacked piece. In each puzzle, there is only one good solution by moving the attacked piece to a safe square. In chapter 2, one of the kings is in check. The goal is to find the correct response. In chapter 3, a piece is attacked, but has no good square to which to move. So, rather than moving the attacked piece(s), you will need to look for a way to protect it with another piece. In chapter 4, we focus on defensive ideas against a direct checkmate threat. In chapter 5, one side "defends" by counter-attacking. In chapters 6 and 7, you will be introduced to the game-saving techniques of drawing by stalemate or perpetual check. In chapter 8, the task is to catch a pawn that is about to promote. In chapter 9, a certain piece is about to get "trapped." The task is to prepare for the attack and avoid material loss. Finally, in chapter 10, you can practice solving a variety of defensive ideas, with the goal to avoid or minimize material losses or being checkmated. With over 40 years of experience as a world-class player and coach, international grandmaster Susan Polgar has developed the most effective way to help young players and beginners - Learn Chess the Right Way. Let her show you the way to understanding the most common and critical patterns and let her show you the way to becoming a better player.

Learn a new talent, stay relevant, reinvent yourself, and adapt to whatever the workplace throws your way. Ultralearning offers nine principles to master hard skills quickly. This is the essential guide to future-proof your career and maximize your competitive advantage through self-education. In these tumultuous times of economic and technological change, staying ahead depends on continual self-education—a lifelong mastery of fresh ideas, subjects, and skills. If you want to accomplish more and stand apart from everyone else, you need to become an ultralearner. The challenge of learning new skills is that you think you already know how best to learn, as you did as a student, so you rerun old routines and old ways of solving problems. To counter that, Ultralearning offers powerful strategies to break you out of those mental ruts and introduces new training methods to help you push through to higher levels of retention. Scott H. Young incorporates the latest research about the most effective learning methods and the stories of other ultralearners like himself—among them Benjamin Franklin, chess grandmaster Judit Polgár, and Nobel laureate physicist Richard Feynman,

as well as a host of others, such as little-known modern polymath Nigel Richards, who won the French World Scrabble Championship—without knowing French. Young documents the methods he and others have used to acquire knowledge and shows that, far from being an obscure skill limited to aggressive autodidacts, ultralearning is a powerful tool anyone can use to improve their career, studies, and life. Ultralearning explores this fascinating subculture, shares a proven framework for a successful ultralearning project, and offers insights into how you can organize and execute a plan to learn anything deeply and quickly, without teachers or budget-busting tuition costs. Whether the goal is to be fluent in a language (or ten languages), earn the equivalent of a college degree in a fraction of the time, or master multiple tools to build a product or business from the ground up, the principles in Ultralearning will guide you to success.

How can math magic surprise an audience? What is the "personality" of decimals and fractions? What is the best order to teach integer operations? What is the "fence law"? Can we have two cosine laws? How can two words help us study trigonometry? What function equals its inverse? These and many more topics are thoroughly explored in this book. Follow Dr. C as he takes you on a journey filled with unique cases and entertaining stories. Each of the 100 sections focuses on a different topic and introduces readers to an entirely new way of learning smart mathematics. This book represents the author's life-long teaching experience in three countries through which he developed his trademark style of conveying complex concepts with ease. The book is written in two parts and closely follows math curriculum widely used in the US and Canada. Part 1 covers material from grade 1 to 8. Part 2 is developed for high school and up. Teachers teaching any grade can find it a useful tool while students will appreciate its light-hearted but insightful delivery as a reference.
