This volume presents the state of the art
 in digital scholarly editing. Drawing
 together the work of established and
 emerging researchers, it gives pause at
 a crucial moment in the history of
 technology in order to offer a sustained
 reflection on the practices involved in
 producing, editing and reading digital
 scholarly editions—and the theories that

underpin them. The unrelenting progress
 of computer technology has changed the
 nature of textual scholarship at the most
 fundamental level: the way editors and
 scholars work, the tools they use to do
 such work and the research questions
 they attempt to answer have all been
 affected. Each of the essays in *Digital
 Scholarly Editing* approaches these
 changes with a different methodological
 consideration in mind. Together, they
 make a compelling case for re-
 evaluating the foundation of the
 discipline—one that tests its assertions
 against manuscripts and printed works
 from across literary history, and the
 globe. The sheer breadth of *Digital
 Scholarly Editing*, along with its
 successful integration of theory and
 practice, help redefine a rapidly-

changing field, as its firm grounding and future-looking ambit ensure the work will be an indispensable starting point for further scholarship. This collection is essential reading for editors, scholars, students and readers who are invested in the future of textual scholarship and the digital humanities.

Judgment recognition and enforcement (JRE) between the US states, between EU Member States, and between mainland China, Hong Kong and Macao, are all forms of 'interregional JRE'. This extensive comparative study of the three most important JRE regimes focuses on what lessons China can draw from the US and the EU in developing a multilateral JRE arrangement for mainland China, Hong Kong and Macao. Mainland China, Hong Kong and Macao share economic, geographical, cultural, and historical proximity to one another. The policy of 'One Country, Two

Systems' also provides a quasi-constitutional regime for the three regions. However, there is no multilateral JRE scheme among them, as there is in the US and the EU; and it is harder to recognise and enforce sister-region judgments in China than in the US and the EU. The book analyses the status quo of JRE in China and explores its insufficiencies; it proposes a multilateral JRE arrangement for Chinese regions to alleviate current JRE difficulties; and it also provides solutions for the macro and micro challenges of establishing a multilateral arrangement, drawing upon the rich literature on JRE regimes found in the US and the EU. ENDORSEMENTS 'Professor Huang has completed a highly readable and comprehensive study of the issues

governing recognition and enforcement of judgments among the three distinct legal regimes of the People's Republic of China...Her ideas will surely enrich the Chinese debate as well as provide interesting scholarly material for non-Chinese seeking greater understanding of legal reform in the PRC'. Peter D Trooboff, Senior Counsel, Covington & Burling LLP, Washington DC, USA 'The book shows meticulous, analytical and comparative scholarship. Dr Huang's proposal of a multilateral arrangement makes an original and valuable contribution to the study of interregional judgment recognition and enforcement among Mainland China, Hong Kong, and Macao'. Renshan Liu, Professor and Dean, Law School of Zhongnan University of Economics and Law, China

'Dr Huang's timely work provides an insightful analysis of one of the more vexed aspects of the inter-regional legal relations in Greater China. Her careful investigation makes a valuable contribution to the academic and practical work on the recognition and enforcement of judgments between China and her two special administrative regions. The comparative approach she adopts represents the true utility of comparativism for legal scholarship'.

This timely and much-needed Handbook reconsiders an old topic from a fresh perspective, raising a number of new, interesting and worthwhile issues in the wake of ten years of globalization. This comprehensive analysis illustrates that old-style industrial policies whereby the government directly intervened in markets, and was often the producer itself, are no longer relevant. Structural changes occurring in economies summarized in the term globalization are triggering the definition and implementation of new industrial policies. The contributors, leading experts in their field, unite to evaluate this shift of over a decade ago.

rule, South Korea transformed itself in just fifty years into an economic powerhouse and a democracy that serves as a model for other countries. With no natural resources and a tradition of authoritarian rule, Korea managed to accomplish a second Asian miracle. Daniel Tudor is a journalist who has lived in and written about Korea for almost a decade. In *Korea: The Impossible Country*, Tudor examines Korea's cultural foundations; the Korean character; the public sphere in politics, business, and the workplace as well as the family, dating, and marriage. In doing so, he touches on topics as diverse as shamanism, clan-ism, the dilemma posed by North Korea, the myths about doing business in Korea, the Koreans' renowned hard-partying ethos, and why

the infatuation with learning English is now causing massive social problems. South Korea has undergone two miracles at once: economic development and complete democratization. The question now is, will it become as some see Japan, a prosperous yet aging society, devoid of energy and momentum? Or will the dynamism of Korean society and its willingness to change—as well as the opportunity it has now to welcome outsiders into its fold—enable it to experience a third miracle that will propel it into the ranks of the world's leading nations regarding human culture, democracy, and wealth? More than just one journalist's account, *Korea: The Impossible Country* also draws on interviews with many of the people who made South Korea what it is today.

These include: Choi Min-sik, the star of "Old Boy." Park Won-soon, Mayor of Seoul. Soyeon Yi, Korea's first astronaut Hong Myung-bo, legendary captain of Korea's 2002 FIFA World Cup team. Shin Joong-hyun, the 'Godfather of Korean Rock.' Ko Un, poet. Hong Seok-cheon, restaurateur, and the first Korean celebrity to 'come out.' And many more, including a former advisor to President Park Chung-hee; a Shaman priestess ('mudang'); the boss of Korea's largest matchmaking agency; a 'room salon' hostess; an architect; as well as chefs, musicians, academics, entrepreneurs, homemakers, and chaebol conglomerate employees.

(Book Jacket Status: Jacketed) Written during the golden age of Chinese philosophy, and composed partly in prose and partly in verse, the "Tao Te Ching" is surely the most terse and economical of the world's great religious texts. In a series of short, profound chapters it elucidates the idea of the

Tao, or the Way-an idea that in its ethical, practical, and spiritual dimensions has become essential to the life of China's enormously powerful civilization. In the process of this elucidation, Lao-tzu both clarifies and deepens those central religious mysteries around which our life on earth revolves. Translation of the Ma Wang Tui Manuscripts by D. C. The Lexicon brings together lexical material from a wide range of published and non-published sources to create an extensive compilation of the vocabulary of Fulfulde as it is spoken in that part of central Mali known as Masina (in Fulfulde, Maasina). The Lexicon is intended primarily for non-Fulfulde speakers who are learning the language at the intermediate or advanced levels and who need access to a comprehensive reference source on Fulfulde vocabulary. Scholars, development workers, and others whose research or fieldwork involves use of the Fulfulde of Masina may find it helpful as well in clarifying nuances of meaning and standardized spelling for the less

familiar terms they might encounter. It is also intended that the present work, beyond the matter of organizing vocabulary, will contribute significantly to the expanding lexicographical and linguistic investigations of Fulfulde. Mankato, MN : Creative Education

For every fan of K-Pop music, Korean Wave dramas and Kimchi—or anyone intrigued by Korea and Korean culture—A Geek in Korea is a hip, new guide to the land of the Samsung smartphone and Gangnam Style. Author Dan Tudor first arrived in Korea on the eve of the 2002 World Cup when South Korea played Italy in the finals. What he saw inspired him to return and work in Korea. He served as The Economist magazine's Korea correspondent for three years, and he writes regular

columns for the national daily JoongAng Ilbo newspaper. Along the way, he has developed a great love and admiration for Korean culture and the Korean people. A Geek in Korea reinvents the culture guide for the Internet age. Packed with articles and photographs, it covers all the touchstones of Korean culture—from Buddhism and Confucianism to chapters on the traditional arts and disciplines like Taekwondo. There are chapters on cultural code words and norms; personal relationships; business and technology; and symbols and practices that are peculiarly Korean. A number of chapters are devoted to Korean pop culture, with attention to the stars, idols, and urban subcultures associated with them. For visitors to Korea, the author includes a

mini-guide to his favorite neighborhoods in Seoul and other places of outstanding interest. Spotlighting the originality and creativity of the Koreans, debunking myths about them, and answering nagging questions like why they're so obsessed with education and success—Tudor has created the perfect book for the growing ranks of Koreaphiles in this inspired, insightful, and highly informative guide.
