Exam 1Z0-815 Project Management Institute
The Standard for Business Analysis – First Edition is a new PMI foundational standard, developed as a basis for business analysis for portfolio, program, and project management. This standard illustrates how project management processes and business analysis processes are complementary activities,

where the primary focus of project management processes is the project and the primary focus of business analysis processes is the product. This is a process-based standard, aligned with A Guide to the Project Management Body of Knowledge (PMBOK® Guide) – Sixth Edition, and to be used as a standard framework contributing to the business analysis body of knowledge.

It is our pleasure to present the second edition of this book. The first edition was released couple of years back. Since then we wanted to add several things to enable revision of BABOK more meaningful and quicker. So, here we are. Our objective to write this book was to create a concise revision guide for Business Analysis Body of Knowledge (BABOK) guide v3.0. BABOK is a big book with around five hundred pages and revising BABOK can be cumbersome. So, how does it help you in

revising? One of the proven revision approaches is to create notes. We conceptualized this revision guide as notes. So, the first edition was written as notes based on BABOK. It simply summarized BABOK v3 and was much smaller than BABOK. However, we wanted to make it more meaningful for all the readers. So, we have now added concept notes, mock questions, crosswords, and matchmaking. We have also added examples at the end of Techniques

chapter. The examples are added to help you see the real-life usage of the technique. It is added for selected techniques. The guide is meant for professionals who are planning to undertake ECBA certification examination. This revision guide covers these BABOK chapters - key concepts, all the six Knowledge Areas, Perspectives, and all the 50 Techniques. For the best results, this revision guide must be picked up after you have gone through the BABOK guide once. You will find

all the key aspects of BABOK in this guide. This means that you do not need to pick up BABOK again. Cheers and all the best for your exam! Abhishek Srivastava Amit Lingarchani

Optimize the Role of the Project Sponsor The project sponsor is critical to project success, yet it

is a role that is often assigned to a member of the organization with little knowledge or training in project management practices. This creates challenges not only for the sponsor but for the project manager. The organization suffers too if key members of the project team are not fully utilized, as valuable resources are wasted. In Strategies for Project Sponsorship, the authors address this challenge from all three vantage points—that of the project manager, the project

sponsor, and the organization. Based on their practical experience and solid research, they offer practical methods that project managers can use to optimize the participation of the sponsor. They also offer clear and straightforward guidance for project sponsors on how to properly execute their duties and contribute to project success. Executives will gain valuable perspective on the organization's projects and key players. From defining the roles and

responsibilities of the project sponsor to suggesting specific practices that maximize the working relationship between the sponsor and project manager, this book is the ultimate guide. Examples from real-world sponsor experiences, as well as tips, techniques, and tools, enhance its applicability and practicality. This book should be given to every newly assigned project sponsor, read and referred to by every project manager, and on

the desk of every organizational executive as a reference.
