Little Ida liked the student, who always had a tale to tell, a lot. So, one morning, when little Ida's flowers had all withered, she asked the student what could have happened to them. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Celebrated for children's literature, his most cherished fairy tales include "The Emperor's New Clothes", "The Little Mermaid", "The Nightingale", "The Steadfast Tin Soldier", "The Snow Queen", "The Ugly Duckling" and "The Little Match Girl". His books have been translated into every living language, and today there is no child or adult that has not met Andersen's whimsical characters. His fairy tales have been adapted to stage and screen countless times, most notably by Disney with the animated films "The Little Mermaid" in 1989 and "Frozen", which is loosely based on "The Snow Queen", in 2013. Thanks to Andersen's contribution to children's literature, his birth date, April 2, is celebrated as International Children's Book Day.

In August 2009, former madam Dalia Dippolito conspired with a hit man to arrange her ex-con husband's murder. Days later, it seemed as if all had gone according to plan. The beautiful, young Dalia came home from her health club to an elaborate crime scene, complete with yellow tape outlining her townhome and police milling about. When Sgt. Frank Ranzie of the Boynton Beach, Florida, police informed her of her husband Michael's apparent murder, the newlywed Dippolito can be seen on surveillance video collapsing into the cop's arms, like any loving wife would—or any wife who was pretending to be loving would. The only thing missing from her performance were actual tears. ... And the only thing missing from the murder scene was an actual murder. Tipped off by one of Dalia's lovers, an undercover detective posing as a hit man met with Dalia to plot her husband's murder while his team planned, then staged the murder scenario—brazenly inviting the reality TV show Cops along for the ride. The Cops video went viral, sparking a media frenzy: twisted tales of illicit drugs, secret boyfriends, sex-for-hire, a cuckolded former con man, and the defense's ludicrous claim that the entire hit had been staged by the intended victim for reality TV fame. In *Poison Candy*, case prosecutor Elizabeth Parker teams with bestselling crime writer Mark Ebner take you behind and beyond the courtroom scenes with astonishing never-before-revealed facts, whipsaw plot twists, and exclusive photos and details far too lurid for the trial that led to 20 years in state prison for Dalia Dippolito.

My life is a lovely story, happy and full of incident. If, when I was a boy, and went forth into the world poor and friendless, a good fairy had met me and said, "Choose now thy own course through life, and the object for which thou wilt strive, and then, according to the development of thy mind, and as reason requires, I will guide and defend thee to its attainment," my fate could not, even then, have been directed more happily, more prudently, or better. The history of my life will say to the world

what it says to me—There is a loving God, who directs all things for the best. My native land, Denmark, is a poetical land, full of popular traditions, old songs, and an eventful history, which has become bound up with that of Sweden and Norway. The Danish islands are possessed of beautiful beech woods, and corn and clover fields: they resemble gardens on a great scale. Upon one of these green islands, Funen, stands Odense, the place of my birth. Odense is called after the pagan god Odin, who, as tradition states, lived here: this place is the capital of the province, and lies twenty-two Danish miles from Copenhagen. In the year 1805 there lived here, in a small mean room, a young married couple, who were extremely attached to each other; he was a shoemaker, scarcely twenty-two years old, a man of a richly gifted and truly poetical mind. His wife, a few years older than himself, was ignorant of life and of the world, but possessed a heart full of love. The young man had himself made his shoemaking bench, and the bedstead with which he began housekeeping; this bedstead he had made out of the wooden frame which had borne only a short time before the coffin of the deceased Count Trampe, as he lay in state, and the remnants of the black cloth on the wood work kept the fact still in remembrance. Instead of a noble corpse, surrounded by crape and wax-lights, here lay, on the second of April, 1805, a living and weeping child,—that was myself, Hans Christian Andersen. During the first day of my existence my father is said to have sate by the bed and read aloud in Holberg, but I cried all the time. "Wilt thou go to sleep, or listen quietly?" it is reported that my father asked in joke; but I still cried on; and even in the church, when I was taken to be baptized, I cried so loudly that the preacher, who was a passionate man, said, "The young one screams like a cat!" which words my mother never forgot. A poor emigrant, Gomar, who stood as godfather, consoled her in the mean time by saying that the louder I cried as a child, all the more beautifully should I sing when I grew older.

Do You Control Your Phone—Or Does Your Phone Control You? Within a few years of its unveiling, the smartphone had become part of us, fully integrated into the daily patterns of our lives. Never offline, always within reach, we now wield in our hands a magic wand of technological power we have only begun to grasp. But it raises new enigmas, too. Never more connected, we seem to be growing more distant. Never more efficient, we have never been

more distracted. Drawing from the insights of numerous thinkers, published studies, and his own research, writer Tony Reinke identifies twelve potent ways our smartphones have changed us—for good and bad. Reinke calls us to cultivate wise thinking and healthy habits in the digital age, encouraging us to maximize the many blessings, to avoid the various pitfalls, and to wisely wield the most powerful gadget of human connection ever unleashed.

Guy Bourdin, who died in 1991, was a legend in the world of fashion photography. He was the most radical and audacious photographer of his generation but his reputation has been surrounded in secrecy - he rarely allowed his photographs to appear outside the pages of French Vogue. No book of his work has previously been published. His estate was frozen by the courts until 1997, after which his son, Samuel, gained control of his work as a result of which this long-awaited book can be published. Bourdin was originally a painter and a friend of Man Ray. His fashion photographs began to incorporate his surrealist influences. Fashion photography became an arena for his personal obsessions. The results are as shocking and astonishing as any commercial photograph ever published. They were executed meticulously. Despite his intense eroticism, subversion and, as Cecil Beaton described, 'his grotesque little gamines', Beaton referred to him in 1975 as 'unquestionably the most interesting fashion photographer in Paris today'. His work was said to have represented 'the look of an era - glamorous, hard-edged, cleverly spiced with vulgarity.. .rich with implied narratives and strong erotic undercurrents'

The Problem with Survey Research makes a case against survey research as a primary source of reliable information. George Beam argues that all survey research instruments, all types of asking—including polls, face-to-face interviews, and focus groups—produce unreliable and potentially inaccurate results. Because those who rely on survey research only see answers to questions, it is impossible for them, or anyone else, to evaluate the results. They cannot know if the answers correspond to respondents' actual behaviors (objective phenomena) or to their true beliefs and opinions (subjective phenomena). Reliable information can only be acquired by observation, experimentation, multiple sources of data, formal model building and testing, document analysis, and comparison. In fifteen chapters divided into six parts—Ubiquity of Survey Research, The Problem, Asking Instruments, Asking Settings, Askers, and Proper Methods and Research Designs—The Problem with Survey Research demonstrates how asking instruments, settings in which asking and answering take place, and survey researchers themselves skew results and thereby make answers unreliable. The last two chapters and appendices examine observation, other methods of data collection and research designs that may produce accurate or correct information, and shows how reliance on survey research can be overcome, and must be.

It's not every day that a 16 year old writes a book. In fact, girls and boys of that age are supposed to spend their time studying

what other people write. It is pre-sumed that at that age they do not themselves have anything significant or interesting to say. And the education system guarantees just that. The best rewards go to those who can parrot set answers to set questions in examination halls. Those who try to use their imagination or reply differently are often punished with low grades.

Herein are 17 illustrated stories by Robert Gordon Anderson with 16 full-page colour illustrations by Dorothy Hope Smith. This volume is the sequel to *The Seven O'Clock Stories* also written by Robert Gordon Anderson and with the same three happy children and are short stories of everyday happenings on a farm. The story of the Big Bobsled, even contains instructions on how to make your own. The volume is introduced with "The Top Of The Morning" which is the saying the Toymaker uses as a greeting, no matter the weather which sets the tone of the book. The stories are:

"The Top Of The Morning" I The Little Lost Fox II The Big Bobsled III The Jolly Roger IV The Blue Croaker, The Bright Agate, And The Little Gray Mig V The Old Woman Who Lived On The Canal VI Two O' Cat VII The Fairy Lamp VIII The Animals' Birthday Party IX Dr. Philemon Pipp, The Patient Medicine Man X When Jehosophat Forgot His Piece XI Ole Man Pumpkin XII The Norway Spruce XIII When The Door Opened XIV The Hole That Ran To China XV The Peppermint Pagoda XVI He That Took The City These stories are simply and naturally told and are for children aged five to nine years old. As with all children's stories, they have originated in a place where good wishes come true: where the poor and the lonely are rich and live in castles and have friends: and where sorrowful folk are happy. Here you will hear the birds singing and children laughing, all day long. The trees are full of blossoms and fruit. The sky is always blue, the grass green and soft. Under the trees dwell the fairies, and against the blue sky you will sometimes see the sheen of angels' wings as the flit by. We invite you to curl up with this unique sliver of Fairy culture not seen in print for over a century; and immerse yourself in the tales and fables of yesteryear. 10% of the net sale will be donated to charities by the publisher. -----

contributions in the field of evolutionary and deterministic methods for design, optimization and control in engineering and sciences. Specialists have written each of the 34 chapters as extended versions of selected papers presented at the International Conference on Evolutionary and Deterministic Methods for Design, Optimization and Control with Applications to Industrial and Societal Problems (EUROGEN 2013). The conference was one of the Thematic Conferences of the European Community on Computational Methods in Applied Sciences (ECCOMAS). Topics treated in the various chapters are classified in the following sections: theoretical and numerical methods and tools for optimization (theoretical methods and tools; numerical methods and tools) and

engineering design and societal applications (turbo machinery; structures, materials and civil engineering; aeronautics and astronautics; societal applications; electrical and electronics applications), focused particularly on intelligent systems for multidisciplinary design optimization (mdo) problems based on multi-hybridized software, adjoint-based and one-shot methods, uncertainty quantification and optimization, multidisciplinary design optimization, applications of game theory to industrial optimization problems, applications in structural and civil engineering optimum design and surrogate models based optimization methods in aerodynamic design.
