Peterson's Graduate Programs in Physical Education, Sports, and Recreation 2011 Rowman & Littlefield

This book is like no other book because it is the only known book to provide the ABC's for organizing or reorganizing the Sunday school or church school. The book is also loaded with suggestive forms to help any leader to construct his or her own forms for Sunday school or church school administration. This book reminds the prospective teacher, the current teacher, the VBS coordinator, training administrators, and the support leader and workers of their responsibilities. Any church pastor, superintendent, church leader, professor of Christian education, or director of Christian education will find this book as a valuable tool in Christian education.

The Future of University Nuclear Science and Engineering Programs A Survey of Distance Education Programs Offered by Post-Secondary Schools Within a 150 Mile Radius of Chattanooga, Tennessee Long distance education has been a part of instructional delivery for more than one hundred years. Beginning as correspondence study accompanying the establishment of national postal systems, distance education has undergone dramatic change fueled by the rapid and recent explosion of technology. This exponential growth in technology has provided educators with new delivery methods for instruction, allowing post-secondary schools to reach greater numbers of students through the enrollment of individuals who would ordinarily be unable to attend traditional on-site classes. The purpose of this research was to obtain data on the numbers of courses and programs and delivery methods for distance education within a

150 mile radius of Chattanooga, TN. Data were obtained from 99 of the 104 post-secondary institutions within the survey area. Data collection was accomplished using surveys completed through telephone interviews, email inquiries, and information available at web site hosted by institutions in the target population. Initial information about the post-secondary institutions in the survey area was first obtained through state education department sources or Internet sources. This information included the type of school (two-year private colleges, four-year private colleges and universities, two-year community and technical colleges, two-year public senior colleges and universities, or four-year public colleges and universities), address, telephone number, email address, etc. Next the post-secondary institutions were contacted via email or telephone and the survey was administered. The results of this study can be used to evaluate the long distance learning programs that are currently offered by post-secondary schools within a 150-mile radius of Chattanooga, Tennessee. Distance education is relatively young in the history of education and has experienced rapid growth during the past several decades, particularly with regard to the online delivery of instruction. Distance education provides educational opportunities to individuals that are separated by distance and/or time, allowing instruction in remote locations. Appended are: (1) Long Distance Learning Survey; (2) Numbers of Post-Secondary Institutions by Data Collection Method; and (3) Types of Degree Programs Offered through Distance Education in the Survey Area. (Contains 6 tables and 6 figures.).Resources in EducationTNOU B.Ed. Entrance Examination (English) Papers presented at the 39th Annual Conference of the Indian Association of Teacher Educators, held at Allahabad during 10-11 February 2006.

Web-Based Education in the Human Services reflects the vitality and diversity of Web-based courses currently delivered within human services. Unlike previous texts that have combined technologies such as Interactive Television (ITV) and two-way audio where Web involvement was minimal, this unique book focuses on Web-based models, tools, and techniques used in courses where the majority of the content is delivered online. The book's contributors emphasize the social aspects of learning, examining topical areas not usually associated with Web-based education as they remind us of the need to move beyond the similarities between WBE and face-to-face (FTF) approaches. **TEACHER EDUCATION, SECOND EDITION** Psychology Press Teacher education is at the base of all educational systems. To make it effective, we need an education system that equips the teacher trainees with the necessary skills to perform their tasks effectively in the classroom. This book discusses how to train teachers, improve teacher education programmes, and impart quality education. The book, now in its second edition, emphasizes development of skills in teachers, keeping in mind the rapid use of technology and changes in education policies, procedures and provisions. Each chapter has been carefully revised as per the latest NCTE norms and standards recommended by Justice Verma Commission. This well-organized book is primarily intended for the postgraduate students of Education—M.A. Education and M.Ed. Besides, teacher trainees enrolled in B.Ed. and Diploma in teaching programmes, teacher educators, distance education school-based administrators and policymakers will also find the book useful. **KEY FEATURES** • Deals with necessary pedagogical skills and competencies to make the teachers professionally competent. • Provides a comparative study of teacher education of a number of countries to put things

in the right perspective. • Makes extensive use of flowcharts and diagrams to enable the readers to understand the topics discussed with great ease. TARGET AUDIENCE • M.A. (Education) • M.Ed. • Teacher trainees
sections 41-43 of 44 LexisNexis
 Online distance education continues to grow at a fast pace, even outpacing the overall growth of U.S. higher education. Demands for quality are coming from all shareholders involved. As if caught by surprise, a patchwork response to quality is often the typical organizational response. The result can be inconsistent and uncoordinated levels of value to those invested in online learning. This often promotes negative images of the educational experience and institution. Comprised of highly regarded experts in the field, this edited volume provides a comprehensive overview of quality assurance, a snapshot of current practices and proven recommendations for raising standards of quality in online education. Topics discussed include: * Improving practices for teaching online * Using educational analytics for quality assurance and improvement * Accessibility: An important dimension of quality assurance * Assuring quality in online course design * Assuring quality in learner support, academic resources, advising and counseling * The role and realities of accreditation This text clearly answers the call for addressing quality from a broad, deep and coordinated understanding. It addresses the complexities of quality assurance in higher education and offers professionals top-shelf advice and support. *This text is also appropriate for students enrolled in Educational Technology and Higher Education Administration Masters and PhD programs

Guide to Distance Learning Programs Peterson's

This volume takes a comprehensive and broad look at e-text programs across a wide spectrum of programs, institutions, and policies in three parts. The first part showcases several policy papers to contextualize the discussion and highlight the reasons for IAE programs' structure and the obstacles they face for implementation. The second part is an in-depth exploration of various case studies that provide a detailed description of IAE programs, including information about program elements, program structure, program size, and insights into how programs are operationalized, and their shortcomings and benefits to students and stakeholders. The final part is a selection of research papers that offer evidence-based support for the adoption of IAE programs in terms of student success, access, engagement, costs, and a variety of other student and institutional outcomes. There are approximately 300 institutions of higher education that currently have some form of Inclusive Access or Open Educational Resources E-text (IAE) program in the

United States, but there is little scholarship that engages on the topic of assessing these programs' effect on student success. The results of the research studies included in this volume will inform faculty, administrators, and policy-makers who seek to support the development, adoption, and implementation of IAE programs based on their potential positive effects on student success and other outcomes.

Perceptions of Online Distance Education Within the North Carolina Community College System by Chief Academic Officers and Chief Distance Education Officers IGI Global

For well over a half century, American Universities and Colleges has been the most comprehensive and highly respected directory of four-year institutions of higher education in the United States. A two-volume set that *Choice* magazine hailed as a most important resource in its November 2006 issue, this revised edition features the most up-to-date statistical data available to guide students in making a smart yet practical decision in choosing the university or college of their dreams. In addition, the set serves as an indispensable reference source for parents, college advisors, educators, and public, academic, and high school librarians. These two volumes provide extensive information on 1,900 institutions of higher education, including all accredited colleges and universities that offer at least the baccalaureate degree. This essential resource offers pertinent, statistical data on such topics as tuition, room and board; admission requirements; financial aid; enrollments; student life; library holdings; accelerated and study abroad programs; departments and teaching staff; buildings and grounds; and degrees conferred. Volume two of the set provides four indexes, including an institutional Index, a subject accreditation index, a levels of degrees offered index, and a tabular index of summary data by state. These helpful indexes allow readers to find information easily and to make comparisons among institutions effectively. Also contained within the text are charts and tables that provide easy access to comparative data on relevant topics.
