Real-world scenarios help you develop clinical reasoning skills for primary care! Case Studies in Primary Care: A Day in the Office, 2nd Edition includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You're asked to analyze data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback.

A Case for the Case Study Delmar Pub

This is a teaching companion to the case studies provided in the book 'Strategic Marketing Cases in Emerging Markets' and is intended to help teachers and trainers follow a pedagogic line by using the case studies to develop a critical understanding of the service business scenarios and strategies for marketing in emerging markets. The authors provide extensive teaching notes for each of the cases, covering the pedagogy of the case study, the prerequisites to understanding it, case-specific teaching objectives, a suggested teaching approach, and a case synopsis. Each case is then rounded out with suggested discussion questions and concise answers, as well as additional

reading to enhance the teaching and learning experience in the classroom.

Written by a distinguished nursing professional with over 25 years of experience, *Pharmacology Case Study Workbook* provides nursing students with an opportunity to apply pharmacology concepts to real-world situations. The text features 50 case studies based on real-life clinical situations that challenge students to think critically and develop effective problem-solving skills. Case studies present patients' medication history, enabling students to learn about the disease process from the point of medication use - an approach used in actual clinical practice. Other features include a review of key terms, home and intensive care scenarios, and a list of variables that must be considered in order to conduct an appropriate case analysis. Also present are a series of questions that will help guide students in developing effective ways to handle the scenario. Perfect for individual or group use, *Pharmacology Case Studies* is a valuable tool to help prepare nursing students for clinical practice!

A Guide for Students and Researchers

Harvard Business Press

The guide all MBAs and executive students need. If you're enrolled in an MBA or executive education program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying and time-consuming. In *The Case Study Handbook, Revised Edition*, William Ellet presents a potent new approach for efficiently analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (making a decision, performing an evaluation, or diagnosing a problem) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case-analytical

essays based on the process laid out earlier. Examples of effective writing further reinforce the methods. The book also includes a chapter on how to talk about cases more effectively in class. Any current or prospective MBA or executive education student needs this guide.

Vibrant and insightful, this book introduces students and researchers to the basics of case study research. Adopting jargon-free language, it grounds its advice in concrete experience and real-world cases. Using examples from across the social sciences, Gary Thomas provides practical guidance on how best to read, design and carry out case study research with a focus on how to manage and analyze data. The new edition of this bestselling book addresses crucial issues around ethics and has improved coverage of key themes such as rigor, validity, generalization and the analysis of case studies. It demystifies case study research and answers important questions such as: What is a case study? When and why should case study methods be used? How are case studies designed? What methods can be used? How do we analyze and make sense of our data? How do we write up and write about our case? Bursting with real-world examples and multidisciplinary cases, and supported by a dynamic new website, this book is essential reading for any student or researcher in the social sciences and humanities.

Case Studies in Primary Care - E-Book John Wiley & Sons

Since the end of World War II, social science research has become increasingly quantitative in nature. A *Case Study* provides a rationale for an alternative to quantitative research: the close investigation of single instances of social phenomena. The first section of the book contains an overview of the central methodological issues involved in the use of the case study method. Then, well-known scholars describe how they undertook case study research in order to understand changes in church involvement, city life, gender roles, white-collar crimes, family structure, homelessness, and other types of social experience. Each contributor confronts several key questions: What does the case study tell us that other approaches cannot? To what extent can one generalize from the study of a single case or of a highly limited set of cases? Does case study work provide the basis for postulating broad principles of social structure and behavior? The answers vary, but the consensus is that the opportunity to examine certain kinds of social phenomena in depth enables social scientists to advance greatly our empirical understanding of social life. The contributors are Leon Anderson, Howard M. Bahr, Theodore Caplow, Joe R. Feagin, Gilbert Geis, Gerald Handel, Anthony M. Orum, Andree F. Sjoberg, Gideon Sjoberg, David A. Snow, Ted R. Vaughan, R. Stephen Warner, Christine L. Williams, and

Norma Williams.

A Workbook for the Occupational Therapy Student John Wiley & Sons

This sharp, stimulating title provides a structure for thinking about, analysing and designing case study. It explores the historical, theoretical and practical bones of modern case study research, offering to social scientists a framework for understanding and working with this form of inquiry. Using detailed analysis of examples taken from across the social sciences Thomas and Myers set out, and then work through, an intricate typology of case study design to answer questions such as: How is a case study constructed? What are the required, inherent components of case study? Can a coherent structure be applied to this form of inquiry? The book grounds complex theoretical insights in real world research and includes an extended example that has been annotated line by line to take the reader through each step of understanding and conducting research using case study. Effective Answers for Case Studies CRC Press

A collection of 60 case studies, each presented as a common clinical problem, with some intriguing titles, including: 'He's just not himself anymore' and 'My leg gave way'. Each case history takes form of a narrative interrupted by questions with the relevant answers alongside. With its problem-based approach, it helps students appreciate the correct path to diagnosis of the pathological signs and symptoms. An excellent revision companion, each case has a revision box of key topics linked in to the main textbook so the student can refer to it for more details. Although the case studies correspond to chapters in the main textbook (three cases per chapter), the reader approaches each case as they would present in life, symptom-first. Illustrated throughout with full color gross and histopathological photographs as well

as clinical photographs, radiographs and line diagrams, this book has an instant visual appeal and presents the subject in a refreshing and innovative way.

This phenomenal new text focuses on assisting students in learning that there can be many possible choices in the clinical decision making process, and that these different choices can lead to many equally successful outcomes. *Case Studies Through the Health Care Continuum: A Workbook for the Occupational Therapy Student* is an entire book of case studies of adults with physical and psychological deficits. Each case study is followed by questions, organized around performance areas and performance components, treatment planning and discharge planning areas. The questions are designed to encourage clinical thinking about the cases. The cases encompass a variety of diagnoses and take place in a variety of health care arenas. By using case studies, students will begin to, and advance, their thinking process before directly dealing with clients. The cases are comprehensive and well thought out, and the questions provide a good starting point for processing and guiding critical

thinking. This exceptional text can be used in almost every course in the curriculum! *A Student's Guide* Elsevier Health Sciences In October 2016, the Council on Education in Public Health (CEPH) released new competencies that all accredited Master of Public Health (MPH) programs must adhere to. Master of Public Health Competencies: A Case Study Approach covers each of the 22 required competencies to demonstrate how they can be applied in public health practice. Spanning all five key disciplines of Public Health - biostatistics, epidemiology, health policy and management; social and behavioral sciences; and environmental and occupation health - Master of Public Health Competencies covers the full breadth of public health. Each chapter is focused on a single CEPH competency and provides the background of the public health issue, followed by a case study to learn that competency and understand its application. Written by MPH faculty and community practitioners and based on real world public practice, these concise case studies are accompanied by discussion questions that facilitate classroom discussion.
