Den gulden winckel Books By Willem
In this international bestseller, a woman

comes of age in a poignant novel about forgiveness, pain, and self-discovery. Mona's demanding mother ruled their home until a car crash took her life and changed their family forever. Left to tend to a distant father and a needy younger brother, Mona finds her new role almost too much to bear. And when a new stepmother, troubled and depressed, adds yet another crack to the family portrait, Mona's forced to shoulder an even greater share of the emotional burden. Somewhere between her responsibility to her family and to her own life, Mona finds a route of escape: in a theater career she craves. But for every challenge ahead--romantic, professional, sexual, and familial--Mona wonders how much of her future has already been defined by the challenges

of her past. An emotional, funny, and universal novel about the people, experiences, and choices that make us who we are, *Mona in Three Acts* is a revelatory journey of a woman's self-discovery, forgiveness, and courage to finally speak her truth.

A just appreciation of any modern European literature is not to be derived from the study of that literature alone. Not one has grown up spontaneously and independently from the soil of the national genius. Some seeds at least have come from elsewhere. Often whole forms of writing have been transplanted bodily. We must particularly recognize these truths when dealing with English literature. The basis of the English mind

is chiefly Teutonic, in some measure Celtic. If the English genius had been left to itself, to develop its spiritual and intellectual creations in its own way, English literature would have been a very different thing in both substance and form. But in reality English literary history is the story of the Teutonic and Celtic tendencies “corrected and clarified,” and the Teutonic and Celtic invention immensely assisted, by influences and ideas flowing in from other sources. There have been large ingraftings from other stocks, either partially kindred or altogether alien—from Greeks, Romans, Italians, French, Spaniards, Germans, as well as from Hebrews and other Orientals. All sound study is comparative. We must place other literatures beside our own, if

we desire to appraise rightly our national genius, its capacities, and its creations. We find our English writers composing their works in certain forms, and giving expression to a certain range of ideas. How came they to employ these particular forms of creation? How did they arrive at these particular ideas? How is it with other nations? Have they built upon the same lines and with the same materials, or how is it with them? Have we borrowed from them, or they from us? If there have been borrowings, when and in what measure did they occur? Looking back over the changes of spirit and form which our poetry, for example, has undergone, we shall encourage altogether false notions of the causes of such changes, unless we see how, every now and then, a shower

of new ideas, a stream of new light, has come in from abroad. Most readers know in some vague way that Chaucer avows or betrays his debts to France and Italy; that Shakespeare did not invent his own plots, but borrowed from Italians, from Plautus, from Plutarch, and others; that Milton was steeped in the Greek, Latin, and Italian classics. But we want to know more than this. We want to perceive with some definiteness how far the whole course of English literature has been enriched by tributary streams, and what sort of waters they brought. It would be instructive to draw a diagram of our literary history; to liken it to the course of a river, and to picture its various fountain-heads and tributaries pouring in their several quotas at their several times. In all modern literatures there is a

large proportion which is unoriginal to them. Milton has been mentioned already. Those who read only English works find Milton full of nobility of thought and imagery. Yet, before Milton produced his greater poems, he had read, re-read, and deliberately steeped himself in, the literature of Greece, Rome, modern Italy, and France. Precisely how much of Milton is made up of Homer, Euripides, Virgil, Dante, Ariosto, and other predecessors, can only be known to such as have those authors at their finger-ends. Shelley, again, is commonly regarded as one of the most daringly original of English writers. Yet Shelley's mind was an amalgam of himself, Homer, Euripides, Plato, Virgil, Dante, Calderon, Goethe; and this, once more, is but another way

of saying that it had incorporated the genius of generations of Greeks, Romans, Spaniards, Italians, and Germans. We cannot therefore arrive at the true genius of Milton or of Shelley, or speak understandingly of their originality, until we have surveyed those other literatures and their relations with our own. Let us, indeed, claim with a proper national pride that the influence of English literature, of our Shakespeare, our Bacon, our Locke, our Byron, upon foreign writers has been profound. Her debt to modern literature has been repaid by England, and, at least in the influence of Shakespeare, more than repaid. But with that question we are not here concerned.
