Work on the movement of phrase categories, mostly Noun Phrases, has been a central element of syntactic theorizing almost since the earliest work on generative grammar. Work on the movement of lexical elements, heads, has been much less central until recent years. Verb movement is now, however, the center of current research in syntax. Parallel to the theoretical interest has been the attention focused on the description of verb-second languages and on the movement operations that place the verb in its "second" position. This volume represents the latest work from many of the leading researchers in an important field, and draws on analyses from a wide range of languages. It will have a significant impact on its field.

to be effective. Given the pace of change relating to, for example, the evolution of international accounting standards and the demands for greater transparency, accountants must be clear, responsive, and audience-focussed communicators.

Employers of accountants consistently comment on the need for their new graduate recruits and trainees to have strong written, oral, and interpersonal communication skills. In this light accounting educators face the challenge of designing and delivering programmes that reflect professional expectations on the part of employers and clients, and educating students on how to make informed communication choices in order to achieve desired results and to build good working relationships. The chapters in this book deal with such topics as accounting students' perceptions of oral communication skills; competence-based writing skills; and the development of listening skills. A study of pronominal

agreement with imposters, third person DPs (this reporter, yours truly, my lord, Madam) that denote the speaker or addressee. Normally, a speaker uses a first person singular pronoun (in English, I, me, mine, myself) to refer to himself or herself. To refer to a single addressee, a speaker uses second person pronouns (you, yours, yourself). But sometimes third person nonpronominal DPs are used to refer to the speaker—for example, this reporter, yours truly—or to the addressee—my lord, the baroness, Madam (Is Madam not feeling well?). Chris Collins and Paul Postal refer to these DPs as imposters because their third person exterior hides a first or second person core. In this book they study the interactions of imposters with a range of grammatical phenomena, including pronominal agreement, coordinate structures, Principle C phenomena, epithets, fake indexicals, and a property of pronominal agreement they call homogeneity. Collins and Postal conclude that traditional ideas about pronominal features (person, number, gender),

which countenance only agreement with an antecedent or the relation of the pronoun to its referent, are much too simple. They sketch elements of a more sophisticated view and argue for its relevance and explanatory power in several data realms. The fundamental proposal of the book is that a pronoun agrees with what they call a source, where its antecedent constitutes only one type of source. They argue that the study of imposters (and closely related camouflage DPs) has far-reaching consequences that are inconsistent with many current theories of anaphora.

This landmark volume is the first work specifically designed to explore the extent to which striking surface morpho-syntactic similarities between Bantu and Romance languages actually represent similar syntactic structures. In particular, it explores the timely and much debated issues of verbal morphology and agreement, the structure of DPs, and word

order/information structure, with the goal of providing a better understanding of the structure of the different languages investigated, and the implications this holds for syntactic theory more generally. All of the papers draw on data from both Bantu and Romance languages, providing a framework for much-needed further comparative research on the nature of linguistic structure, its diversity and constraints, and the implications this has for learnability/acquisition. The volume also provides an important precedent for incorporating insights from Bantu linguistic structure into mainstream of syntax research.

**IIFT Solved Paper and mock test 2021** John Benjamins Publishing Agreement plays a central role in modern generative grammar. The present collection brings together contributions from experts on various aspects of agreement systems in the world's languages in an attempt to formulate formal and substantive universals in this domain. All the papers contained here focus on the formalization of the mechanisms of agreement and on the relationship between case

and agreement. All the papers propose solutions by seriously examining cross-linguistic data from the usual Germanic and Romance languages to Lummi, Greek, Hindi, Turkish and other Turkic languages, Japanese, Tsez, Masaai, Russian, Arabic, Basque, Warlpiri, Kaltakungu, and Bantu. *English Grammar Workbook Class - 3* John Benjamins Publishing This book argues that syntactic parameters are set in a principled fashion on the basis of overt functional morphology. The main focus of the book is on the different positions of the finite verb in the Germanic SVO languages. In addition, other syntactic phenomena (null subjects, transitive expletive constructions and object shift) and other language families (Romance, Semitic and Slavic) are discussed. A common explanation for all of the discussed phenomena is proposed: If and only if the features for "person" are distinctively marked by the agreement morphology, the agreement affixes are listed separately in the lexicon and project phrases of their own in syntax where they attract the verb to the head

positions and allow the specifier positions to be filled by various phonologically (un)realized elements. Special attention is given to issues of historical development and child language acquisition. **Verbs and Diachronic Syntax** The Blue Book of Grammar and Punctuation This volume gathers selected papers from the workshops Facing Movement and Meeting Clitics held in the context of the Barcelona Linguistic Institute. The authors explore a wide variety of languages, from Icelandic to Mayan, from Japanese to Russian and Italian, from various data sources: adult grammar, first and second language acquisition, developmental language disorders and language change. The papers on movement address the issues of reconstruction in parasitic gaps; the alternation between short and long distance movement in Germanic; subextraction from subjects; wh- in situ in Greek; word order alternations derived by movement in bilingual acquisition; intervention effects in L2 acquisition of Chinese; multiple wh-fronting in L2; and production of wh-

questions in L1, L2 and SLI in French. In the papers on clitics, the theoretical issues considered include: the affixal character of subject clitics in L1; the morphological complexity of clitics; proclisis versus enclisis; the restrictions on cooccurrence of clitics in causative and other constructions; clitic placement in relation to L2 and language change; clitics as demarcative markers; and the acquisition of pronominal clitics in European Portuguese.

Imposters are third person DPs that are used to refer to the speaker/writer or addressee, such as : (i) Your humble servant finds the time before our next encounter very long. (ii) This reporter thinks that the current developments are extraordinary. (iii) Daddy will be back before too long. (iv) The present author finds the logic of the reply faulty. This volume explores verbal and pronominal agreement with imposters from a cross-linguistic perspective. The central

questions for any given language are: (a) How do singular and plural imposters agree with the verb? (b) When a pronoun has an imposter antecedent, what are the phi-features of the pronoun? The volume reveals a remarkable degree of variation in the answers to these questions, but also reveals some underlying generalizations. The contributions describe imposters in Bangla, Spanish, Albanian, Indonesian, Italian, French, Romanian, Mandarin and Icelandic. Functional Structure in DP and IP Routledge

This volume includes papers on the study of Arabic dialects and their implications for general linguistics (Section I), as well of papers of a more

general nature (Sections II and III). Because the Arabic dialects are similar in many ways, a study of their differences can help isolate precisely the range of permissible interlinguistic variation (i.e. the “parameters” of universal grammar). A number of papers in Section I focus on the contribution of dialect studies to a theory of crossdialectal and crosslinguistic variation; others focus on individual dialects, thus providing data and analyses that can further contribute to our understanding of this type of variation. The papers in Sections II and III of the volume are selected from the general session of the symposium and address sociolinguistic and historical aspects of Arabic, respectively.
