This concise and practical guide thoroughly presents the characteristics of children with specific mild exceptionalities in today's diverse classroom. Using an active, problem-solving approach that reflects how today's students learn, Dr. Sydney S. Zentall identifies the characteristics of children with mild exceptionalities that can be gleaned from observations, written descriptions, and personal interactions. Unlike many texts on this topic, which overwhelm students with extraneous information, The text focuses on the characteristics of these students within general education and special class settings. With this knowledge readers will better understand the implications of characteristics for accommodations and be ready to apply this knowledge with empirically based interventions.

Human Development in Cultural Context Oxford University Press, USA

Twenty-first-century society is diverse, and Christians must be able to understand other cultures and communicate effectively between and among them. Following up on the bestselling Hurt: Inside the World of Today's Teenagers, this new addition to the Youth, Family, and Culture series explores the much-needed skill of Cultural Intelligence (CQ), the ability to work effectively across national, ethnic, and even organizational cultures. While rooted in sound, scholarly research, Cultural Intelligence is highly practical and accessible to general readers. It will benefit students as well as guide ministry leaders interested in increasing their cultural awareness and sensitivity. Packed with assessment tools, simulations, case studies, and exercises, Cultural Intelligence will help transform individuals and organizations into effective intercultural communicators of the gospel. EXCERPT What do you do when you encounter someone who isn't like you? How do you feel? What goes on inside you? How do you relate to him or her? These are the kinds of questions we want to explore in this book. Few things are more basic to life than expressing love and respect for people who look, think, believe, act, and see differently than we do. We want to adapt to the barrage of cultures around us while still remaining true to ourselves. We want to let the world change us so that we can be part of changing the world. And we want to move from the desire to love across the chasm of cultural difference to the ability to express our love for people of difference. Relating lovingly to our fellow human beings is central to what it means to be human. And when it comes down to it, Christian ministry at its core is interacting with all kinds of people in ways that give them glimpses of Jesus in us. The billions of us sharing planet Earth together have so much in common. We're all born. We all die. We're all created in the image of God. We eat, sleep, persevere, and care for our young. We long for meaning and purpose, and we develop societies with those around us. But the way we go about the many things we have in common is deeply rooted in our unique personalities and cultures. So although we have so much in common, we have as much or more about us that's different.

An Analysis of Organizational Behavior Across Cultures Cengage Learning

In The Making of a Teenage Service Class, Ranita Ray uncovers the pernicious consequences of focusing on risk behaviors such as drug use, gangs, violence, and teen parenthood as the key to ameliorating poverty. Ray recounts the three years she spent with sixteen poor black and brown youth, documenting their struggles to balance school and work while keeping commitments to family, friends, and lovers. Hunger, homelessness, untreated illnesses, and long hours spent traveling between work, school, and home disrupted their dreams of upward mobility. While families, schools, nonprofit organizations, academics, and policy makers stress risk behaviors in their efforts to end the cycle of poverty, Ray argues that this strategy reinforces class and racial hierarchies and diverts resources that could better support marginalized youth's efforts to reach their educational and occupational goals.

Contemporary trends such as increased one-parent families, high divorce rates, second marriages and homosexual partnerships have all contributed to variations in the traditional family structure. But to what degree has the function of the family changed and how have these changes affected family roles in cultures throughout the world? This book attempts to answer these questions through a psychological study of families in thirty nations, carefully selected to present a diverse cultural mix. The study utilises both cross-cultural and indigenous perspectives to analyse variables including family networks, family roles, emotional bonds, personality traits, self-construal, and 'family portraits' in which the authors address common core themes of the family as they apply to

their native countries. From the introductory history of the study of the family to the concluding indigenous psychological analysis of the family, this book is a source for students and researchers in psychology, sociology and anthropology.

Matsumoto's book is designed to help students appreciate how cultural factors moderate psychological processes and how the viewpoint of one's own culture can distort one's interpretation of the behavior of people from other cultures. At the same time, the book stresses that behavioral phenomena are characterized by both cross-cultural similarities and differences. Students will thoroughly examine the cultural similarities and differences in psychology, communication, work, health, and more. Culture and Modern Life parallels Weiten and Lloyd's PSYCHOLOGY APPLIED TO MODERN LIFE and is available to students in a discount bundle.

Behavioral Analysis of Societies and Cultural Practices Cambridge University Press

Significant advancements in methodologies and statistical techniques in cross-cultural psychological research abound, but general practice, education, and most researchers in psychology rarely use them. This leads to misinterpretations, misrepresentations, and prejudice. The authors expertly demonstrate the importance of methodological rigor to safeguard appropriate inferences about similarities and differences, particularly when methods have not been developed in the cultural contexts where they are used. The book features acculturation and identity, including contributions on remote acculturation, religiosity, and organizational contexts. It also covers individual differences and evaluates methodological progress in educational assessment, emotions, motivation, and personality. Methodological and psychometric perspectives on equivalence and bias, as well as measurement invariance in cross-cultural research, are a central theme. From study design to data interpretation, it is essential for psychology, and the social sciences in general, to adopt methods and assessment procedures that are more rigorous for culture-comparative studies.

Reading Graphic Design in Cultural Context explains key ways of understanding and interpreting the graphic designs we see all around us, in advertising, branding, packaging and fashion. It situates these designs in their cultural and social contexts. Drawing examples from a range of design genres, leading design historians Grace Lees-Maffei and Nicolas P. Maffei explain theories of semiotics, postmodernism and globalisation, and consider issues and debates within visual communication theory such as legibility, the relationship of word and image, gender and identity, and the impact of digital forms on design. Their discussion takes in well-known brands like Alessi, Nike, Unilever and Tate, and everyday designed things including slogan t-shirts, car advertising, ebooks, corporate logos, posters and music packaging.

The City in Cultural Context Baker Academic

A comprehensive, systematic account of human development which is sensitive to the needs, interests and ecologies of nonwestern cultures and individuals is provided in this unique volume. The importance and value of the sociocultural milieu in shaping the growth and development of children is emphasized, and the author asserts throughout that children do not grow and develop according to the same patterns regardless of culture. The author describes developmental psychology from the perspective of West Africa, demonstrating how the local ecology and the resulting cultural ideology lead to differing ways in which children are conceptualized and socialized, and in turn how they develop. While much of his case material is from
