SAVANAH MARIELA

Overkill Open Road + Grove/Atlantic
From the acclaimed author of *Netherland* (a New York Times Book Review Best Book of the year): the odyssey of two brothers crossing the world in search of an African soccer prodigy who might change their fortunes. Mark Wolfe, a brilliant if self-thwarting technical writer, lives in Pittsburgh with his wife, Sushila, and their toddler daughter. His half-brother Geoff, born and raised in the United Kingdom, is a desperate young soccer agent. He pulls Mark across the ocean into a scheme to track down an elusive prospect known only as "Godwin"—an African teenager Geoff believes could be the next Lionel Messi. Narrated in turn by Mark and his work colleague Lakesha Williams, *Godwin* is a tale of family and migration as well as an international adventure story that implicates the brothers in the beauty and ugliness of soccer, the perils and promises of international business, and the dark history of transatlantic money-making. As only he can do, Joseph O'Neill investigates the legacy of colonialism in the context of family love, global capitalism, and the dreaming

individual.

From one of Canada's leading journalists comes a major book about how the movement of populations from rural to urban areas on the margins is reshaping our world. These transitional spaces are where the next great economic and cultural boom will be born, or where the great explosion of violence will occur. The difference depends on our ability to notice. The twenty-first century is going to be remembered for the great, and final, shift of human populations out of rural, agricultural life into cities. The

movement engages an unprecedented number of people, perhaps a third of the world's population, and will affect almost everyone in tangible ways. The last human movement of this size and scope, and the changes it will bring to family life, from large agrarian families to small urban ones, will put an end to the major theme of human history: continuous population growth. *Arrival City* offers a detailed tour of the key places of the "final migration" and explores the possibilities and pitfalls inherent in the developing new world order. From villages in China, India, Bangladesh and Poland to the international cities of the world, Doug Saunders portrays a diverse group of people as they struggle to make the transition, and in telling the story of their journeys — and the history of their often multi-generational families enmeshed in the struggle of transition — gives an often surprising sense of what factors aid in the creation of a stable, productive community.

During the last decade Europe has been transformed both politically and commercially. The establishment of a genuinely single marketplace in the context of an expanding membership has enabled the European Union greatly to enhance its role on the world stage. In the areas of trade and commercial policy the Union increasingly speaks with one voice. As a result of the Maastricht Treaty on Economic and Political Union of 1993, a process has been set in motion whereby the embryonic mechanisms of a common foreign policy (European Political Cooperation or EPC) are gradually evolving into a more comprehensive Common Foreign and Security Policy (CFSP). The contributors to this volume describe and evaluate the nature and extent to which the European Union plays an independent role in international affairs. This pioneering work makes an important contribution to

the literature on the European Union since the chapters present a comprehensive picture of the Union's foreign economic policies and actions, its foreign security policy, and the supranational nature of much Union decision-making. The book is significant, not only because of its dual focus on economics as well as politics, but also because it comprehensively covers the broad range of Union policies in both the economic and political spheres. The intended level of readership is undergraduate courses on the EU and on European politics; upper level undergraduate courses in International Relations; and graduate survey courses on the EU. The book is sufficiently comprehensive and instructive to achieve a wide readership, especially in North America and the UK.

Clémentine Mélois is a writer, artist, and member of Oulipo. Her first published work, *Cent titres* (2014), is a cult classic. She has gone on to subvert children's

literature and – more recently – the photo-story genre. *Sinon j'oublie* (2017) – *Otherwise I Forget* – is a unique work embroidered around a selection of her collection of 'found' shopping lists. After a short foreword – exposing her interest in this universal but throw-away form of writing – we find images of 100 shopping lists accompanied by her imagined insight into the lives and minds of their authors. The result is a delightful panoramic view of contemporary France in the guise of an (autobiographical) novel. This is the first of her works to be translated for an Anglophone readership. More accessible than other of her works, universal in appeal, and full of humanity, *Otherwise I Forget* is a wonderful and deceptively simple introduction to the work of this highly original writer and artist.

This new book investigates how the relationships of international business networks (one buyer-multiple suppliers) develop over time, looking at the geographical angle as well as an actor composition point of view. Bart Kamp presents a framework that reveals what business-to-business (b2b) factors explain buyer-supplier co-location patterns, making it possible to predict the geographical behaviour of suppliers, and also assesses whether longevity is truly the deep-rooted feature of international b2b network relationships that it is often claimed to be.

International Marketing is an adaptation of a best-selling German text, which considers the global marketing arena from a new and original perspective. It focuses upon international marketing primarily as the coordination of a company's different national marketing

programmes. How can for example an exchange of marketing knowledge across borders add value to a company's position in other markets? What impact does the exchange of goods and information across borders by customers have? What effect can 'going international' have on an international cost position? How can lead markets act as a guide to future developments in other countries? *International Marketing* takes a comprehensive look at all the underlying concepts, using a wealth of truly European examples and substantial case studies.

This book is the disquisition of what I know and truly believe makes products a success and how you can replicate it within your company. What is this book about? Why should I read this book? Why did you write this book? These were the three questions I received from a good friend. So what is this book about my good friend asks? This book is like a cookbook with recipes for lean innovation, a collection of concrete techniques and strategies that are invaluable and lead to the same end: game-changing innovation. The book is a compilation of what I consider the fundamental models for lean innovation and some of my own complementary models for successful innovation¹. A supplement to the existing international reference works on innovation (Alexander Osterwalder, Eric Ries, Ash Maurya, Clayton Christensen...) I will complement and adapt the existing tools and methods. Enhance their flavor "monter la sauce" as they say in France. The book is mainly a "how to" book and a "lessons learned" book, substantiated by good analysis and reflection. Like a chess book to improve your play this

book will improve your innovation. The book provides an analysis of proven tactics and strategies on how to win the lean innovation game as well as a post mortem on why it is so often lost. Should you read this book? Here is some bad news, if you were hoping to improve on your innovation by spending more on R&D, it won't work. The consulting giant PWC confirmed in its Global Innovation 1000 research that just increasing R&D resources will not solve the innovation problem ! The presented methodology can be quickly employed and implemented by the reader with the book as an instruction manual !
