*Architectural Drafting for Interior Design* John Wiley & Sons  
MR Architecture + Decor's work—which, true to its name, straddles the line between architecture and interior design—is driven by the belief that close collaborations with clients lead to personalized and intimate homes. The first collection of the firm's 20 years of work includes a brief history of the firm, founded by David Mann. Featuring seven never-before-seen projects, the text not only describes each project but also includes two distinct points of view: that of MR Architecture + Decor and that of the client or collaborator. More than 200 appealing photographs of some of the firm's gorgeous residential work are included, taken by such leading architecture and interior design photographers as François Dischinger, Eric Piasecki, Simon Upton, and Joshua McHugh. MR Architecture + Decor celebrates an architecture and design firm whose variety and depth of work, from Takashimaya, the legendary department store on Fifth Avenue, to log cabins in Montana, demonstrates the power of creativity and collaboration.

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

*Sketching Interiors at the Speed of Thought* Peachpit Press

Since the appearance of simplified 3D sketching programs like SketchUp, architects and interior designers have been called on to use both freehand and 3D CAD drawings, often at very earliest stages of design. Since we must often go back and forth between analytical plan views and 3D visual views, it's important that this be a seamless process, requiring little disruptive action or break in the workflow. Integrated Drawing Techniques closes the gap between creativity and geometry, teaching beginner architects and interior designers how to design their residential interiors using freehand sketching and computer-aided design simultaneously. From concept planning to 3D rendering, this book is a comprehensive guide to designing residences by hand and computer.

Beginning interior designers can learn how to graphically communicate their ideas with a resource that is designed specifically for them. While traditional drafting books focus on architectural and engineering readers, Architectural Drafting for Interior Designers, Second Edition, eliminates irrelevant coverage and incorporates material and examples that are meaningful to today's interior designers. This book also addresses the specific needs of beginning interior designers by focusing on topics needed before AutoCAD is even introduced, such as how to draw a floor plan, how to use it to create an interior elevation, and how to understand the relationship between 2D and 3D drawings. Updated to include a new chapter on integrating software with hand drawings, and with content thematically reorganized, this edition is more comprehensive and intuitive than ever. The only book that is written to the standards of the National Council for Interior Design Qualifications (NCIDQ) and interior design trade associations like the National Kitchen and Bath Association (NKBA), this will provide readers with a strong, standards-based foundation in interior design. *Sketch Like an Architect: Step-by-Step From Lines to Perspective* Laurence King Publishing "Books such as this are imperative for our students to learn skills taught as part of a class. Although this book is geared towards interior design, the content and skills development will be as important to students in garden design and soft furnishings alike." Vicky McClymont, National Design Academy, Nottingham, UK Use detailed, step-by-step techniques to create quick perspective sketches. The book will help you develop important skills for ideation and client

communication. Exercises cover a wide range of elements including doors, windows, stairs, millwork, furnishings, and ceilings, as well as more advanced topics like shade and shadowing, scene composition, contrast, and materials and textures. -Interactive digital content, including demonstration videos and self-assessment exercises -Presented in three parts: beginning, intermediate, and advanced sketching techniques -Sketching Gallery shows the work of practitioners allowing you to enhance your style PLEASE NOTE: Purchasing or renting this ISBN does not include access to the STUDIO resources that accompany this text.
