In this broad-ranging text, Peter Dahlgren clarifies the underlying theoretical concepts of civil society and the public sphere, and relates these to a critical analysis of the practice of television as journalism, as information and as entertainment. He demonstrates the limits and the possibilities of the television medium and the formats of popular journalism. These issues are linked to the potential of the audience to interpret or resist messages, and to construct its own meanings. What does a realistic understanding of the functioning and the

capabilities of television imply for citizenship and democracy in a mediated age?

Cushion brings television news back into perfect focus in a book that offers historical depth, geographical breadth, empirical analysis and above all, political significance. Through an interrogation of the dynamics of and relations between regulation, ownership, the working practices of journalism and the news audience, Cushion makes a clear case for why and how television news should be firmly positioned in the public interest. It should be required reading for anyone concerned with news and journalism." - Natalie Fenton, Goldsmiths, University of London  
 "An admirably ambitious synthesis of journalism scholarship and journalism practice, providing a comprehensive resource of historical analysis, contemporary trends and key data." - Stewart Purvis, City University and former CEO of ITN

*On Television* exposes the invisible mechanisms of manipulation and censorship that determine what appears on the small screen. Bourdieu shows how

the ratings game has transformed journalism - and hence politics - and even such seemingly removed fields as law' science' art' and philosophy. Bourdieu had long been concerned with the role of television in cultural and political life when he bypassed the political and commercial control of the television networks and addressed his country's viewers from the television station of the College de France. On Television' which expands on that lecture' not only describes the limiting and distorting effect of television on journalism and the world of ideas' but offers the blueprint for a counterattack.

Jargon buster: convergent journalism:  
?Media convergence is the most significant development in the news industry in the last century. The ability to interchange text, audio, and visual communication over the Internet has fundamentally transformed the way news

organizations operate. Convergence has enabled media companies to gather, disseminate, and share information over a variety of platforms. Throughout the history of journalism, it has been common for journalists to study one medium, such as traditional print or broadcast, and to anticipate a career working only in their chosen field. However, the 21st century journalist has fluidity to write and deliver news content in a variety of formats.
