TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions

as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

The Horseless Age Shambhala Publications

The inspiration for the primetime ITV series on Great Britain, this is the ultimate journey around England. Christopher Winn takes us to each county, to see where history happened, where people and ideas were born, where dreams took flight and where men and women now rest from their labours. To tread in their footsteps, to touch and experience some of what inspired and moved them is to capture some of the flavour of their lives and make their stories alive and real. Crammed with facts and information, I Never Knew That About England celebrates the places and people that make the country unique and includes history, legends, firsts, supremes, unusualls, inventions, birthplaces and gossip. You'll be able to visit the bridge where Pooh and Piglet played Poohsticks and see where

Alfred burnt the cakes. In a small village in Bedfordshire you can visit the graveyard where Long John Silver and Wendy rest. These stories will bring any place that you visit to life (keep one copy in the car and one in the house!) and enable you to discover the rich and surprising history of England.

This Multi-level Governance Series study focuses on Ukraine's advances in regional development, territorial reform and decentralisation since 2014. The Government launched a reform to merge local governments and strengthen the decentralisation process, giving additional power and resources to sub-national authorities. In a short period, successful steps have been taken toward achieving municipal mergers and greater fiscal, administrative and political decentralisation, complemented by the State Strategy for Regional Development 2015-2020. The first local elections have been held and more public services are being delivered by certain local authorities. Yet, important challenges remain, ranging from a need to address rising disparities and adjusting multi-level governance practices and territorial structures, to better structuring fiscal decentralisation. This report addresses regional performance and disparities in Ukraine, provides insight into Ukraine's current territorial reform and approach to decentralisation, explores the impact of fiscal decentralisation measures, and includes a case study of the transport sector. It also provides a set of recommendations for action to support Ukraine in meeting the conditions for successful decentralisation.

According to Master Liao, the great power of T'ai Chi cannot be realized without knowing its inner meaning. T'ai Chi Classics presents the inner meaning and techniques of T'ai Chi movements through translations of three core classics of T'ai Chi, often considered the "T'ai Chi Bible." The texts are introduced by three chapters explaining how to increase inner energy (ch'i), transform it into

inner power (jing), and project this inner power outward to repel an opponent without physical contact. Master Liao also provides a description of the entire sequence of T'ai Chi movements, illustrated by his own line drawings.

Physical Sciences for NGSS has been specifically written to meet the requirements of the Next Generation Science Standards (NGSS) for High School Physical Sciences (HS-PS). It encompasses all three dimensions of the standards (science and engineering practices, crosscutting concepts, and disciplinary core ideas), addressing the program content through a wide range of engaging student-focused activities and investigations. Through completion of these activities, students build a sound understanding of science and engineering practices, recognize and understand the concepts that link all domains of science, and build the knowledge base required to integrate the three dimensions of the standards to meet the program's performance expectations.
