A History of the Korean Language is the first book on the subject ever published in English. It traces the origin, formation, and various historical stages through which the language has passed, from Old Korean through to the present day. Each chapter begins with an account of the historical and cultural background. A comprehensive list of the literature of each period is then provided and the textual record described, along with the script or scripts used to write it. Finally, each stage of the language is analyzed, offering new details supplementing what is known about its phonology, morphology, syntax, and lexicon. This book is about Korea's cultural hero, King Sejong (r. 1418-1450), the inventor of the Korean alphabet. Written by internationally known scholars, it contains 14 chapters, with numerous color plates & illustrations. King Sejong is best known & loved by the Korean people for his invention of the Korean alphabet, usually considered the most scientific writing system the world has ever known. It was an extraordinary intellectual achievement but it was also an act of compassion. Sejong created the alphabet as an expression of love for his people & as part of an ideal theory of governance. For these same reasons, Sejong also ordered astronomical instruments & rain gauges assembled, rituals & music reformed, & movable metal type created. Sejong wanted his subjects to understand the natural world so they could interact efficiently, appropriately, & harmoniously with their environment. Sejong took the throne in the Choson dynasty's third decade & put it on such a strong foundation that it lasted for over five centuries, a remarkable record not just in East Asia but in world history. Through this concise & informative reader, the English-speaking public will understand why the very name Sejong evokes an image of human perfection in Koreans' minds.
