"Named for the language

they speak--Maa, a
distinct but unwritten
African tongue--the
Maasai of Kenya and
Tanzania still live much as

they did thousands of years ago, herding cattle, sheep, and goats and existing in harmony with their peaceful environment in and around the Great Rift Valley. Tall, proud, aristocratic in bearing and manner, these handsome people have made their way into the twentieth century with their ancient customs and the structure of their society preserved to an unusual extent. For the first time ever, this book--a kind of autobiography, since it is written by a Maasai--

documents their living story. It recounts the ancient legends, reveals the songs and prayers, and vividly describes the stages of life for a Maasai: childhood, initiation, warrior rank, and finally elderhood."--Publisher's description.

 Previously unknown details of Rene Angelil's personal and professional life are revealed in this investigation into the man who orchestrated one of the foremost successes in the history of show business. A seducer,

dreamer, and inveterate gambler, Angelil lived through the 1960s with an attitude of blissful insouciance, only to suffer a series of professional setbacks and disappointments in love, which did not prevent him from achieving fame and fortune. In 1981, Rene Angelil staked his life on a single card: Celine Dion. His bet succeeded, yet the road ahead was still rocky. His health gave way, and as he was recovering, an accusation of sexual assault threatened to ruin his

reputation. What comes next in the life of this inveterate gambler? This biography takes us far beyond the idealized, indulgent image presented by the media. Is this powerful man a genius? Is he the victim of a conspiracy, or does he abuse his power? Why is he so feared? This completely up-to-date book contains answers to all these questions and much more. For this volume the author has written a new preface, a new essay, and an afterword.

"Since antiquity, humans have used botanicals to treat various conditions affecting their organ systems. This book is built around explaining which plants may be used for major ailments affecting the various systems. The increasing availability of botanicals on the market, intended to be used as dietary supplements for health, has been fueled by the public's demand for a more natural approach to healthcare.

Unfortunately, much of the information fed to the public on alternatives is based on anecdotal evidence (case studies), the advice of friends, or media features that often do not stand up to standards for scientific evidence. In this book, Al-Achi explains current research and science that exists or remains lacking for the various botanicals as healthcare products. He also details the potential misuse and the dangers of some herbal formulas. Photographs of 62 medicinal plants are

included."--BOOK JACKET.

authorized biography of Céline Dion, the rags-to-riches story of a woman who has become the leading recording artist in the world. First published in French in Quebec in December 1997, Céline has sold in excess of 120,000 copies in Quebec alone. A French-language edition will be released in France this fall, to coincide with the release of a new French album. Céline Dion is one of the world's best-loved and best-selling recording artists; her singles and albums have topped the

international charts for several years. Her awards include numerous Junos, Grammys, and World Music Awards. Her most recent album, Let's Talk About Love, has already sold over 25 million units world-wide since its release in November 1997. The song "My Heart Will Go On" from the box-office record-setting film Titanic is now the most frequently heard single in the history of American radio. Céline is the story of Céline Dion, her family, and her husband; it is the story of a child, with

thirteen siblings, from a lower middle-class family, who grew up to achieve the status of pop icon and global diva. Along the way, she garnered the respect of some of the top people in the music industry, such as David Foster, Barbra Streisand, Luciano Pavarotti, and Sir George Martin. Germain gives the reader the full story of how René Angélil became Céline's manager and, eventually, her husband. He also tells how René brought Céline to the status of pop icon in Quebec and then

worked to help her achieve the same status on a global level. The competitive world of the contemporary music industry is revealed how the deals are put together, how the marketing machinery is motivated, and how songs come to be chosen and produced. Making it to the top demands talent certainly, but also overriding ambition, good luck, and marketing savvy. Céline is also a close-up of American popular culture, and the impact it has around the

world. The book shows how a singing sensation becomes the guest of prime ministers, presidents, and sultans.

and Assumption traditions are a collection of over sixty different narratives, preserved in nine ancient languages, that commemorate the end of the Virgin Mary's life. These traditions have long been overlooked by scholars of early Christianity, no doubt largely because this complicated corpus was insufficiently well known. The present study aims to remedy this situation with a detailed analysis of the earliest traditions of Mary's death, including liturgical and

archaeological evidence as well as the numerous narrative sources. Several of the most important narratives are translated in appendices, many appearing in English for the first time. The book will be of interest to all scholars of early Christian literature.

The Lore of Birthdays

Rowman & Littlefield Publishers

This volume contains papers that represent Leibniz's early thoughts on the problem of evil, centring on a dialogue, the *Confessio philosophi*,

in which he formulates a general account of God's relation to sin and evil that becomes a fixture in his thinking. How can God be understood to be the ultimate cause, asks Leibniz, without God being considered as the author of sin, a conclusion incompatible with God's holiness? Leibniz's attempts to justify the way of God to humans lead him to deep discussion of related topics: the nature of free choice, the problems of necessitarianism and fatalism, the nature of

divine justice and holiness. All but one of the writings presented here are available in English for the first time.

Father Luigi Gambero, internationally-known expert on early Christianity, presents a comprehensive survey of the development of Marian doctrine and devotion during the first eight centuries. Focusing on the lives and works of over thirty of the most famous Church Fathers and early Christian

writers, Fr. Gambero has produced a clear and readable summary of the richness of the patristic age's theological and devotional approach to the Mother of God. The book contains numerous citations from the works of those men who developed the defining Christological and Mariological positions that have constituted the foundational doctrinal teaching of the Church. Each chapter concludes with an extended reading from the works of the patristic authors. A

number of these texts have never before been published in English. The thought of the Fathers and early Christian writers continues to fascinate readers today. Their theological acuity and spiritual depth led them faithfully into the mysteries of Sacred Scripture. Their vast experience made them reliable and trustworthy witnesses to the faith of the people of God.

An overview of the ongoing methods used to understand African history. Spurred in part by the ongoing re-evaluation of sources and methods in research, African historiography in the past two decades has been characterized by the continued branching and increasing sophistication of methodologies and areas of specialization. The rate of incorporation of new sources and methods into African

historical research shows no signs of slowing. This book is both a snapshot of current academic practice and an attempt to sort through some of the problems scholars face within this unfolding web of sources and methods. The book is divided into five sections, each of which begins with a short introduction by a distinguished Africanist scholar. The first section deals with archaeological contributions to historical research. The second section examines the

methodologies involved in deciphering historically accurate African ethnic identities from the records of the trans-Atlantic slave trade. The third section mines old documentary sources for new historical perspectives. The fourth section deals with the method most often associated with African historians, that of drawing historical data from oral tradition. The fifth section is devoted to essays that present innovative sources and methods for African historical research. Together, the

essays in this cutting-edge volume represent the current state of the art in African historical research.
