From the people who've been delivering trustworthy guidebooks to every destination in the world for 40 years, Lonely Planet's 50 Natural Wonders To Blow Your Mind will take you on a tour of the world's most mind-boggling wild and

wonderful places, and help you discover just how extraordinary our planet really is. For all of our obsessions with man-made wonders, nothing compares to the creations of Mother Nature. Vast underground cave systems, wild desert landscapes, breathtaking waterfalls, staggering geology and spectacular vestiges of our prehistoric past all remind us of our small place in Earth's story. Even with our ever-expanding knowledge of the way the world has come to be, some landscapes still leave us utterly perplexed. This is the mystery and the majesty of the natural world. In this book we've attempted to capture just a fraction of what our planet has to offer, and we hope it inspires you to get out and find your own slice of pleasure in the great outdoors. The idea of choosing the Wonders of the World can be traced all the way back to the 5th century, B.C., when the Greek historian Herodotus of the Halicarnassus listed seven must-sees, the Great Pyramid of Khufu in Egypt and six other constructions that long ago vanished from the earth. In this deluxe new LIFE book, *Wonders of the World*, the editors return to the sites of the original Seven Wonders and then keep right on traveling around the globe--eventually visiting in words and pictures seven-times-seven Wonders, plus one more. There are old Wonders here and a new list offered by the New7Wonders Foundation, a Switzerland-based organization that conducted an online poll that saw more than a million votes cast for the world's greatest Wonders. There are man-made Wonders and natural Wonders. There are obscure Wonders and famous Wonders. The amazing stories behind your favorites are recounted as LIFE goes to the Colosseum, to Stonehenge, to the Great Wall, to Machu Picchu, to the Taj Mahal, to Easter Island, to The Acropolis and the Vatican and back to the Great Pyramid. We travel into outer space for a close-up look at the International Space Station, and into the sea for a sensational vantage on Australia's Great Barrier Reef. We go to the summit of Mount Everest and down into the mile-deep Grand Canyon in Arizona. We could not choose between the world's tallest waterfall, 3,212-foot-high Angel Falls in Venezuela, or that which is arguably the world's most awesome, Victoria Falls on the Zimbabwe-Zambia border--so we went with both. Fifty Wonders in all, each more wondrous than the last. A reader cannot help being amazed and inspired by what man's industry has built through time, and what sublime Wonders nature has graced us with. This a book Herodotus would have loved! And then comes the big bonus: The 7 LIFE Wonders. We were sure that some of these fabulous sites were suitable for framing, and so we went to the vast LIFE archives and picked pictures of some of the most wonderful Wonders taken by famous LIFE photographers. Using a technique we developed in our 2009 book

The Classic Collection, we inserted prints of these places in the last section of our book. Better yet: When you remove the prints to frame them, the image stays on the page, so your lovely coffee-table book remains intact. For these wonders, a wondrous book.

A monumental and beautiful guide to Earth's wildlife and natural history--its rocks, minerals, animals, plants, fungi, and microorganisms--this landmark of reference publishing has been extended and updated. In the 11 years since this book was released, thousands of new species have been identified, and new revelations have redrawn the tree of life. Already featuring galleries of more than 5,000 species, *The Natural History Book* now includes discoveries such as the olinguito (the "kitty bear" of the Andean cloud forest) and the painted manakin of Peru. It takes advantage of the first living observations of the giant squid and the deep-sea anglerfish. And it has reorganized the groups of living things to reflect the latest scientific understanding. All this ensures that this, the only ebook to offer a complete visual survey of all kingdoms of life, remains the benchmark of illustrated natural history references. Written by a worldwide team of natural history experts, *The Natural History Book* is the perfect addition to every family bookshelf, as well as an ideal gift for any nature lover. From granites to grapevines, from microbes to mammals, *The Natural*

History Book is the ultimate celebration of the diversity of the natural world.

Discover and explore the most incredible statues, monuments, temples, bridges, and ancient cities with this unparalleled survey of the most famous buildings and structures ever created by humans. From Stonehenge to the Sagrada Familia, from the Great Wall of China to the Burj Khalifa, *Manmade Wonders of the World* plots a continent-by-continent journey around the world, exploring and charting the ingenuity and imagination used by different cultures to create iconic buildings. This truly global approach reveals how humans have tackled similar challenges - such as keeping the enemy out or venerating their gods - in vastly different parts of the world. As writer, historian, and broadcaster Dan Cruickshank writes in his foreword, "reading this book is like taking a journey through the world not only of the present but also of the past, because the roots of many wonders lie in antiquity." By combining breathtaking photography with 3D cutaway artworks, floorplans, and other illustrations, the hidden details and engineering innovations that make each building remarkable are revealed. Featuring the most visited monuments in the world - such as the Eiffel Tower, Taj Mahal, and Machu Picchu - as well as some hidden gems, *Manmade Wonders of the World* can help you to map out the trip of a lifetime or simply be enjoyed as a celebration of the world that humans have built over thousands of years.
