Internationalization and Canadian  
Agriculture Island Press

This book provides an unprecedented analysis and appraisal of party autonomy in private international law - the power of private parties to enter into agreements as to the forum in which their disputes will be resolved or the law which governs their legal relationships. It includes a detailed exploration of the historical origins of party autonomy as well as its various theoretical justifications, and an in-depth comparative study of the rules governing party autonomy in the European Union, the United States, common law systems, and in international codifications. It examines both choice of forum and choice of law, including arbitration agreements and choice of non-state law, and both contractual and non-contractual legal relations. This analysis demonstrates that while an apparent consensus around the core principle of

party autonomy has emerged, its coherence as a doctrine is open to question as there remains significant variation in practice across its various facets and between legal systems. Kitchen Party Frontiers Media SA Detect foodborne pathogens early and minimize consumer exposure. • Presents the latest guidelines for fast, easy, cost-effective foodborne pathogen detection. • Enables readers to avoid common pitfalls and choose the most effective and efficient method, assemble the necessary resources, and implement the method seamlessly. • Includes first-hand laboratory experience from more than 85 experts from research centers across the globe.

Bright Star Routledge

Continuing food poisoning outbreaks around the globe have put fresh produce safety at the forefront of food research. Global Safety of Fresh Produce provides a detailed and comprehensive overview of best practice for produce safety throughout the food chain, and unique coverage of commercial technologies for fresh produce safety. Part one covers the

production and regulation of fresh produce on the agricultural level, including issues of niche farm fresh products, FDA regulation, and zoonotic transfer of pathogens from animals to farm products. Part two moves on to look at safety and environmental issues surrounding fresh produce processing, such as postharvest washing, alternative sanitizers, and using produce waste as animal feed. Part three focuses on current and emerging commercial solutions for fresh produce safety, like ionizing radiation and edible coatings, and part four covers methods of laboratory testing and related legislation. The final section of the book covers a series of case studies of fresh produce safety breaches, including European E. coli outbreaks in sprouts and leafy greens, and the illegal use of fluorescent whitening agents (FWAs) in China. This book is an essential text for R&D managers in the fresh produce industry, quality control professionals working with fresh produce throughout the food chain, postgraduate students, and academic researchers with an interest in fresh produce safety. Provides a comprehensive overview of best practice for produce safety Examines the production and regulation of fresh agricultural produce Looks at safety and environmental issues surrounding fresh produce processing

*Cross-border Livestock Trade and Food Security in the Southern and Southeastern Ethiopia Borderlands* CRC Press

Most of Sheryl Kirby's life has revolved around food. As a child, she learned to cook on her grandmother's big black stove. The local foods of Nova Scotia - from wild blueberries to fresh mackerel - gave her an appreciation for seasonal ingredients, and a move to Toronto when

she was eighteen allowed her to experience whole other worlds of food and flavours. *Kitchen Party - Food Stories From Nova Scotia and Beyond* is a collection of stories and essays that trace Kirby's food adventures and education, from a kid in suburban Halifax, to a cooking school student, caterer and food writer in Toronto. Donairs, dosa, Mexican mole, lobster rolls, cupcakes and foie gras all become a means to explore life, love and social interaction in this book of food-oriented familiar essays.

### **Quick Current Affairs on Events & Issues 2018** Routledge

In recent decades, Canada's agricultural industry, one of the world's largest, has had to adjust to global trade developments such as the North American Free Trade Agreement (NAFTA) and the World Trade Organization. *Internationalization and Canadian Agriculture* examines the patterns of continuity and change in Canadian agricultural policy making in important areas like farm income support programs, prairie grain marketing, supply management, animal and food product safety, and the regulation of genetically modified crops and foods. Arguing that the effects of internationalization have been mediated by Canada's political institutional framework, Grace Skogstad demonstrates how the goals and strategies of authoritative political actors in Canada's federal and parliamentary systems have been decisive to policy developments. Skogstad details the interaction between agriculture and the political economy of Canada, shows how international and domestic trade shape Canadian agricultural policies, and argues that while agricultural programs have changed, the post-war state

assistance agricultural paradigm has persisted. A thorough political analysis and history of late twentieth- and early twenty-first-century Canadian agricultural policy and policy-making, Internationalization of Canadian Agriculture is an important contribution to political economy and public policy. *Food Justice Now!* U of Minnesota Press Since the turn of the twenty first century, there has been a trend for urban "mega events" to be awarded to cities and nations in the East and Global South. Such events have been viewed as economic stimulant as well as opportunities to promote national identity, gain greater international recognition and exercise a form of 'soft power.' However, there has also been on-going controversy about the value, impact and legacy of global mega events in these cities and nations. This book provides a critical examination of the ambition for spectacle that has emerged across the East and Global South. The chapters explore the theoretical and conceptual issues associated with mega-events and new forms of globalization, from the critical political economy of mega-events in a changing world order to the contested social and economic legacies of mega-events and the widespread opposition that increasingly accompanies these events. The book also explores questions of urban development and governance, the role of new communications technologies in global economic expansion, the high security State, and the growing global influence of international non-governmental organizations. This book offers a rich collection of original theoretical contributions and global case studies from leading international scholars from the social sciences and humanities. It offers a fresh and unique

interdisciplinary perspective that synthesizes cutting edge research on mega-events and urban spectacles while simultaneously contributing to a broader understanding of the dynamics of global capitalism and international political power in the early twenty first century. **Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges** University of Toronto Press A rallying cry to link the food justice movement to broader social justice debates The United States is a nation of foodies and food activists, many of them progressives, and yet their overwhelming concern for what they consume often hinders their engagement with social justice more broadly. *Food Justice Now!* charts a path from food activism to social justice activism that integrates the two. It calls on the food-focused to broaden and deepen their commitment to the struggle against structural inequalities both within and beyond the food system. In an engrossing, historically grounded, and ethnographically rich narrative, Joshua Sbicca argues that food justice is more than just a myopic focus on food, allowing scholars and activists alike to investigate the causes behind inequities and evaluate and implement political strategies to overcome them. Focusing on carceral, labor, and immigration crises, Sbicca tells the stories of three California-based food movement organizations, showing that when activists use food to confront neoliberal capitalism and institutional racism, they can creatively expand how to practice and achieve food justice. Sbicca sets his central argument in opposition to apolitical and individual solutions, discussing national food movement campaigns and the need for

economically and racially just food policies—a matter of vital public concern with deep implications for building collective power across a diversity of interests.

*Virtual Events Management* Routledge

The economic growth of East and South-East Asia in the context of the global financial crisis has strengthened the view that this region is emerging in the 21st century as the most economically vibrant region in the world. With some of the largest economies, and generally high economic growth rates compared to the rest of the world, it is unsurprising that East and South-East Asia has become the subject of global interest. East Asia's rise inevitably focuses attention on the issue of China's emergence as a regional and global power. Such a prospect challenges the current status quo, in which the region is dominated by the USA and its regional allies, and issues in Sino-US strategic relations have raised global awareness of the need to understand this pivotal region better. In addition, the Taiwan issue continues to evoke nationalist sentiments in China, and North Korea continues to threaten regional stability. Non-traditional (or alternative) security issues are also of major importance in the region, including natural disasters and epidemics, as well as challenges relating to human rights and governance, transnational crime, demographic issues, economics and trade and regionalism. This Handbook aims to offer an insight into these issues. The volume is divided into two main sections. The first, International Relations and Security Perspectives, will focus on the international relations of the region, paying special attention to the key state players. The chapter contributions will examine the security

perspectives, and foreign and defence policies of these states, as well as key bilateral relationships. The second section will examine key Regional Non-traditional Security Issues, including globalization, transnational health challenges, population growth and the environment.

### **Sustainable Food Consumption and Production in the 21st Century**

Springer

This book is the first comprehensive compilation of existing knowledge on the impact of cisgenic crops on biodiversity, environment, and ecosystem. Strategies to create and access cisgenic crops, potential risks assessment, and legal implications across the globe (European Union, North and South Americas, Africa, and Asia) are enumerated. Ethics, economics, safety, social concerns, and consumer acceptance of cisgenic foods are deliberated. Policy paradigm and ways to overcome GM regulations through cisgenic crops are highlighted. The book has 12 chapters authored by internationally leading experts on the subject. This book will be useful especially for the policy makers and GMO regulators, while the students, teachers, and researchers from across the globe will be equally benefited.

### Managing Human Resources in Cross-border Alliances Pearson Education India

This substantial and original book examines how the EU Private International Law (PIL) framework is functioning and considers its impact on the administration of justice in cross-border cases within the EU. It grew out of a major project (ie EUPILLAR: European Union Private International Law: Legal Application in Reality) financially supported by the EU Civil Justice Programme. The research was led by the Centre for Private International

Law at the University of Aberdeen and involved partners from the Universities of Freiburg, Antwerp, Wroclaw, Leeds, Milan and Madrid (Complutense). The contributors address the specific features of cross-border disputes in the EU by undertaking a comprehensive analysis of the Court of Justice of the EU (CJEU) and national case law on the Brussels I, Rome I and II, Brussels IIa and Maintenance Regulations. Part I discusses the development of the EU PIL framework. Part II contains the national reports from 26 EU Member States. Parts III (civil and commercial) and IV (family law) contain the CJEU case law analysis and several cross-cutting chapters. Part V briefly sets the agenda for an institutional reform which is necessary to improve the effectiveness of the EU PIL regime. This comprehensive research project book will be of interest to researchers, students, legal practitioners, judges and policy-makers who work, or are interested, in the field of private international law.

**Cross Border Mergers and Acquisitions** Verso Books

The Fall of the Tory Party Despite winning the December 2019 General Election, the Conservative parliamentary party is a moribund organisation. It no longer speaks for, or to, the British people. Its leadership has sacrificed the long-standing commitment to the Union to 'Get Brexit Done'. And beyond this, it is an intellectual vacuum, propped up by half-baked doctrine and magical thinking. Falling Down offers an explanation for how the Tory party came to position itself on the edge of the precipice and offers a series of answers to a question seldom addressed: as the party is poised to press the self-destruct button, what kind of role and future can it have? This tipping point has been a

long time coming and Burton-Cartledge offers critical analysis to this narrative. Since the era of Thatcherism, the Tories have struggled to find a popular vision for the United Kingdom. At the same time, their members have become increasingly old. Their values have not been adopted by the younger voters. The coalition between the countryside and the City interests is under pressure, and the latter is split by Brexit. The Tories are locked into a declinist spiral, and with their voters not replacing themselves the party is more dependent on a split opposition - putting into question their continued viability as the favoured vehicle of British capital. Environment, Agriculture and Cross-border Migrations Routledge

"Honigsberg considers the impact of the change that occurred in the fall of 1967, when Martin Luther King's dream of blacks and whites working together in a cooperative partnership gave way to the new cry of "Black Power." His memoir provides a glimpse into the civil rights movement and those who were forever changed by its struggle for human dignity and vision of racial justice and equality."--Jacket.

Health Services Reports Routledge

With a focus on the Global South, this book argues that awareness and discussion of the politics of equity and inclusion in global citizenship education (GCE) research are essential to the future of nuanced and effective research in this area. The book explores the notion of heavily regulated hard spaces to examine areas of institutional blindness and reflects on ways to negotiate the issue of sensitivity in an institutional context, exploring how one's sensitivity relates to pedagogy and ethics. Through this in-depth metadiscussion of GCE research, the

book provides a complex portrait of unique challenges in this domain and explores the nuanced experience of navigating temporal intersections of the global, the citizen, and education in geographically and thematically obstructed spaces. This book will be of great interest to researchers, policymakers, academics and postgraduate students in the fields of global education, comparative education, and educational policy.

Climate Displacement Woodhead Publishing

This book analyzes the aims, activities and structures of cross border migrant organizations in four European countries of arrival and seven countries of origin, exploring different patterns of cross-border resource mobilization and coordination.

A Pura Belpré Illustrator Honor Book Winner of the Tomás Rivera Mexican Children's Book Award Inspiring, reassuring, and beautifully illustrated, this new story from the creator of the New York Times bestseller *Dreamers* is the perfect gift for every child. A New York Times Best Children's Book of the Year With the combination of powerful, spare language and sumptuous, complex imagery characteristic of her work, Yuyi Morales weaves the tale of a fawn making her way through a landscape that is dangerous, beautiful—and full of potential. A gentle voice urges her onward, to face her fears and challenge the obstacles that seek to hold her back. Child, you are awake! You are alive! You are a bright star, Inside our hearts. With a voice full of calm, contemplative wisdom, readers are invited to listen and observe, to accept themselves—and to dare to shout! In a world full of

uncertainty, *Bright Star* seeks to offer reassurance and courage. Yuyi Morales' first book since her New York Times bestseller *Dreamers* explores the borderlands—the plants, animals, and insects that make their home in the desert, and the people who live and travel through this unique and beautiful part of the world. Created with a combination of techniques including hand-embroidered lettering, painting, sketching, digital paintings with textures from photographs of the Sonoran Desert, this stunning book is full of beauty—from the handwoven blanket of the endpapers through the last inspiring spread of young families facing their future with determination and hope. Mega-Events and Globalization Routledge

Human health has been protected from environmental contamination by national laws throughout history, but there are still many areas of international environmental law that are underdeveloped. Even though numerous international environmental treaties have been established, effective agreements remain difficult to achieve for a variety of reasons. Because environmental problems disregard political boundaries, they can only be adequately addressed by a wide range of governments, some of which may have serious disagreements on

important points of policy. The knowledge gap between legal developments designed to achieve environmental objectives and the practical, scientific, and technical applications must be bridged. Environmental and energy law should be explored from a wide range of perspectives and approaches to gain insight into how the law is designed to tackle particular environmental problems. *Innovations in Environmental Legislation and Justice: Environmental and Water-Energy-Food Nexus Laws* examines the development and application of international environmental laws and regulations dealing with global air, water, and land pollution. By adopting a multi-disciplinary approach to environmental and energy law, the book embraces all readerships and goes a step further to address the often thorny problem of improving communication between scientists and engineers and law and policymakers. Covering topics such as environmental justice, green constitutions, and climate change, this book is ideal for policymakers, government officials, legal professionals, environmentalists, students, academicians, researchers, and more.

**Environmental Policy and Public Health** Holiday House

As with the first edition, this second edition describes how environmental health policies are developed, the statutes and other policies that have evolved to address public health concerns associated with specific environmental hazards, and the public health foundations of the policies. It lays out policies for what is considered the major environmental physical hazards to human health. Specifically, the authors describe hazards from air, water, food,

hazardous substances, and wastes. To this list the authors have added the additional concerns from climate change, tobacco products, genetically-modified organisms, environment-related diseases, energy production, biodiversity and species endangerment, and the built environment. And as with the first edition, histories of policymaking for specific environmental hazards are portrayed. This edition differs from its antecedent in three significant themes. Global perspectives are added to chapters that describe specific environmental hazards, e.g., air pollution policies in China and India. Also there is the material on the consequences of environmental hazards on both human and ecosystem health. Additionally readers are provided with information about interventions that policymakers and individuals can consider in mitigating or preventing specific environmental hazards.

**Public Health Reports** Univ of California Press

Devolution has transformed the British Polity in the last decade. Taking this profound change as its theme, *Devolution and British Politics* is an up-to date, comprehensive and effective review of the origins and development of the devolution process. *Devolution in British Politics* offers a de-centralised assessment of British politics and encourages critical thinking regarding contemporary political theory.

**Black Food Matters** Oxford University Press

An in-depth look at Black food and the challenges it faces today For Black Americans, the food system is broken. When it comes to nutrition, Black consumers experience an unjust and inequitable distribution of resources. *Black Food Matters* examines these

issues through in-depth essays that analyze how Blackness is contested through food, differing ideas of what makes our sustenance “healthy,” and Black individuals’ own beliefs about what their cuisine should be. Primarily written by nonwhite scholars, and framed through a focus on Black agency instead of deprivation, the essays here showcase Black communities fighting for the survival of their food culture. The book takes readers into the real world of Black sustenance, examining animal husbandry practices in South Carolina, the work done by the Black Panthers to ensure food equality, and Black women who are pioneering urban agriculture. These essays also explore individual and community values, the influence of history, and the ongoing struggle to meet needs and affirm Black life. A comprehensive look at Black food culture and the various forms of violence that threaten the future of this cuisine, *Black Food Matters* centers Blackness in a field that has too often framed Black issues through a white-centric lens, offering new ways to think about access, privilege, equity, and justice.

[Cross-Border Litigation in Europe](#) Taylor & Francis

Food safety has been a global concern

for many years. While global sourcing of foods and ingredients provides great opportunity for variety and diversity of cultural products, there are significant risks. Programs that regulate food safety and quality in countries around the world vary in their scope and effectiveness, with many being underfunded. Rapidly developing countries may lack the expertise, laboratory resources for testing, and established inspection programs to adequately promote the safety of foods. Rather, these countries may be more focused on providing enough food for their citizens. Lack of documentation or traceability in the exporting country can further exacerbate the situation. Of course, safety problems in food imported from more developed countries also occur, and the source of food borne disease outbreaks are found regularly within the United States. Improving Import Food Safety gathers together vital information on the food safety programs of national governments, the food industry, and the testing industry. Chapters have been contributed by authors from the United States, Latin America, Europe, and Asia. Readers will learn about a variety of regulatory approaches to food safety at the federal and state levels in the United States, as well as in selected countries and within the food industry itself. They will also gain insights into the nature and source of safety problems, in addition to approaches to food safety around the world. The book is divided into three sections: Highlighting Key Issues: authors illustrate the millions of permutations for the origin of ingredients, discussing the difficulty of policing imports, providing a unique perspective on the economic situation in China and insight into development of support for small farm producers in

Mexico. Legal and Regulatory Issues/Structures in the USA and Abroad: describes the legal and regulatory system in the European Union, the United States, and China, plus a chapter addressing global approaches to fraud. Potential Strategies to Improve Import Safety: presents strategies to deal with what are ultimately global issues, but on multiple levels. Perspectives are provided by authors from Industry, and industry trade association, academia, and a recently semi-retired, global ambassador or food safety. Readers will

find this book noteworthy because of the diverse topics and perspectives offered on the challenges of keeping food safe in a global economy. Authors come from a variety of backgrounds, and each has provided a unique perspective on this critical topic. The volume is aimed at importers and exporters of food and ingredients; food microbiologists, food safety and QC/QA personnel; regulatory and legal personnel in food manufacturing companies; food policy makers and regulatory officials and facility and graduate students in food science.
