The New York Times bestselling author of Krakatoa and The Professor and the Madman takes readers on a quirky and charming tour of the last outpost of the British empire Originally published in 1985, Outposts is Simon Winchester's journey to find the vanishing empire, "on which the sun never sets." In the course of a three-year, 100,000 mile journey—from the chill of the Antarctic to the blue seas of the Caribbean, from the South of Spain and the tip of China to the utterly remote specks in the middle of gale-swept oceans—he discovered such romance and depravity, opulence and despair tht he was inspired to write what may be the last contemporary account of the British empire. Written with Winchester's captivating style and breadth, here are conversations and anecdotes, myths and political analysis, scenery and history—a poignant and colorful record of the lingering beat of what was once the heart of the civilized world.

In Mobilizing Restraint, Emmanuel Teitelbaum argues that, contrary to conventional wisdom, democracies are better at managing industrial conflict than authoritarian regimes. This is because democracies have two unique tools at their disposal for managing worker protest: mutually beneficial union-party ties and worker rights. By contrast, authoritarian governments have tended to repress unions and to sever mutually beneficial ties to organized labor. Many of the countries that fall between these two extremes—from those that have only the trappings of democracy to those that have imperfectly implemented democratic reforms—exert control over labor in the absence of overt repression but without the robust organizational and institutional capacity enjoyed by full-fledged democracies. Based on the recent history of industrial conflict and industrial peace in South Asia, Teitelbaum argues that the political exclusion and repression of organized labor commonly witnessed in authoritarian and hybrid regimes has extremely deleterious effects on labor relations and ultimately economic growth. To test his arguments, Teitelbaum draws on an array of data, including his original qualitative interviews and survey evidence from Sri Lanka and three Indian states—Kerala, Maharashtra, and West Bengal. He also analyzes panel data from fifteen Indian states to evaluate the relationship between political competition and worker protest and to study the effects of protective labor legislation on economic performance. In Teitelbaum's view, countries must undergo further political liberalization before they are able to replicate the success of the sophisticated types of growth-enhancing management of industrial protest seen throughout many parts of South Asia.

A brief historical account of the background leading to the publication of the first four editions of the World Directory of Crystallographers was presented by G. Boom in his preface to the Fourth Edition, published late in 1971. That edition was produced by traditional typesetting methods from compilations of biographical data prepared by national Sub-Editors. The major effort required to produce a directory by manual methods provided the impetus to use computer techniques for the Fifth Edition. The account of the production of the first computer assisted Directory was described by S.C. Abrahams in the preface of the Fifth Edition. Computer composition, which required a machine readable data base, offered several major advantages. The choice of typeface and range of characters was flexible. Corrections and additions to the data base were rapid and, once established, it was hoped updating for future editions would be simple and inexpensive. The data base was put to other Union uses, such as preparation of mailing labels and formulation of lists of crystallographers with specified common fields of interest. The Fifth Edition of the World Directory of Crystallographers was published in June of 1977, the Sixth in May of 1981. The Subject Indexes for the Fifth and Sixth Editions were printed in 1978 and 1981 respectively, both having a limited distribution.
