In NATO Rules of Engagement, Camilla Guldahl Cooper provides a thorough analysis of NATO rules of engagement, and offers clarity on a concept which despite its considerable political, strategic and operational importance, is often misunderstood.

**Netherlands Annual Review of Military Studies 2015**

American Psychiatric Pub  
This book

covers the security and safety of CBRNE assets and management, and illustrates which risks may emerge and how to counter them through an enhanced risk management approach. It also tackles the CBRNE-Cyber threats, their risk mitigation measures and the relevance of raising awareness and education enforcing a CBRNE-Cy security culture. The authors present international

instruments and legislation to deal with these threats, for instance the UNSCR1540. The authors address a multitude of stakeholders, and have a multidisciplinary nature dealing with cross-cutting areas like the convergence of biological and chemical, the development of edging technologies, and in the cyber domain, the impelling risks due to the use of malwares against critical subsystems of

|   |   |  |
|---|---|--|
| <p>CBRN facilities. Examples are provided in this book. Academicians, diplomats, technicians and engineers working in the chemical, biological, radiological, nuclear, explosive and cyber fields will find this book valuable as a reference. Students studying in these related fields will also find this book useful as a reference.</p> <p><b>Cases, Materials and Commentary</b></p> <p>Cuvillier</p> | <p>Verlag</p> <p>The development of cyberspace defense capabilities for the North Atlantic Treaty Organization (NATO) has been making steady progress since its formal introduction at the North Atlantic Council Prague Summit in 2002. Bolstered by numerous cyber attacks, such as those in Estonia (2007), Alliance priorities were formalized in subsequent NATO cyber</p> | <p>defense policies adopted in 2008, 2011, and 2014. This monograph examines the past and current state of cyberspace defense efforts in NATO to assess the appropriateness and sufficiency to address anticipated threats to member countries, including the United States. The analysis focuses on the recent history of cyberspace defense efforts in NATO and how changes in</p> |
|---|---|--|

strategy and policy of NATO writ large embrace the emerging nature of cyberspace for military forces as well as other elements of power. It first examines the recent evolution of strategic foundations of NATO cyber activities, policies, and governance as they evolved over the past 13 years. Next, it outlines the major NATO cyber defense mission areas, which include NATO network protection,

shared situational awareness in cyberspace, critical infrastructure protection, counter-terrorism, support to member country cyber capability development, and response to crises related to cyberspace. Finally, it discusses several key issues for the new Enhanced Cyber Defence Policy that affirms the role that NATO cyber defense contributes to the mission of collective defense and

embraces the notion that a cyber attack may lead to the invocation of Article 5 actions for the Alliance. This monograph concludes with a summary of the main findings from the discussion of NATO cyberspace capabilities and a brief examination of the implications for Department of Defense and Army forces in Europe. Topics include the roles and evolution of doctrine, deterrence,

training, and exercise programs, cooperation with industry, and legal standards.

Logics of War  
Springer  
Nature  
The gender-differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the international community, as demonstrated by UN Security Council Resolution (UNSCR) 1325 on Women, Peace and Security and

subsequent resolutions. Similarly, the development community has identified gender-differentiated impacts upon women and girls as a result of the effects of climate change. Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict, but certain studies suggest an indirect linkage between

climate change effects such as food insecurity and armed conflict. Little research has been conducted on the possible compounding effects that armed conflict and climate change might have on at-risk population groups such as women and girls. Armed Conflict, Women and Climate Change explores the intersection of these three areas and allows the reader to better understand

how military organisations across the world need to be sensitive to these relationships to be most effective in civilian-centric operations in situations of humanitarian relief, peacekeeping and even armed conflict. This book examines strategy and military doctrine from NATO, the UK, US and Australia, and explores key issues such as displacement, food and energy insecurity, and

male out-migration as well as current efforts to incorporate gender considerations in military activities and operations. This innovative book will be of great interest to students and scholars of international relations, international development, international security, sustainability, gender studies and law. *Index of Specifications and Standards* Routledge Warfare has

migrated into cities. From Mosul to Mumbai, Aleppo to Marawi, the major military battles of the twenty-first century have taken place in densely populated urban areas. Why has this happened? What are the defining characteristics of urban warfare today? What are its military and political implications? Leading sociologist Anthony King answers these critical questions through close

analysis of recent urban battles and their historical antecedents. Exploring the changing typography and evolving tactics of the urban battlescape, he shows that although not all methods used in urban warfare are new, operations in cities today have become highly distinctive. Urban warfare has coalesced into gruelling micro-sieges, which extend from street level - and below - to the airspace high

above the city, as combatants fight for individual buildings, streets and districts. At the same time, digitalized social media and information networks communicate these battles to global audiences across an urban archipelago, with these spectators often becoming active participants in the fight. A timely reminder of the costs and

the horror of war and violence in cities, this book offers an invaluable interdisciplinary introduction to urban warfare in the new millennium for students of international security, urban studies and military science, as well as military professionals. **NATO Glossary of Terms and Definitions** Rand Corporation A wide range of contemporary challenges and threats,

and their volatility, uncertainty, complexity and ambiguity make it necessary to develop a new, flexible and integrated holistic approach. The modern world requires NATO to build institutional partnerships with a range of actors. This applies not only to the other major international organizations, such as the United Nations and the European Union, but also to non-governmental organizations

(NGOs) as well as the private sector, for example the energy and IT sectors. All these players must become partners in the attempt to cope with multi-dimensional security-related problems. Given the vast differences in their goals, mandates, methods and philosophy of action, building trusting and effective relationships between them will be an arduous process. Nevertheless,

as the biggest political and military organization in the world, NATO cannot avoid contemporary challenges if it does not want to “go out of business”. The Concept of Military Objectives in International Law and Targeting Practice IOS Press  
This thesis deals with the individual criminal liability under international law of NATO commanders for crimes committed by their subordinates

in the context of complex, multilateral command and control structures. After analysing the applicable law, the elements that must be fulfilled in order to be able to prosecute commanders and other superiors under the doctrine of Command Responsibility are comprehensively described and the Command, Control & Communication structures within NATO

and in NATO-led operations explained. Subsequently, the doctrine of Command Responsibility is applied to the identified structures taking into account the role of a commander acting in a multilateral NATO operation, the role of the Troop Contributing Nation, the methods of conferral of powers as well as the de iure and de facto effective control of such a commander leading a multilateral

force. Die vorliegende Arbeit befasst sich mit der individuellen strafrechtlichen Verantwortlichkeit von NATO-Befehlshabern nach dem Völkerrecht für Straftaten ihrer Untergebenen im Rahmen komplexer, multilateraler Befehls- und Kommandostrukturen. Nach einer Darstellung des anwendbaren Rechts, werden die Voraussetzungen für eine Vorgesetztenverantwortlich

eit von Befehlshabern und anderen Vorgesetzten umfassend beschrieben und die Führungs-, Befehls- und Kommunikationsstrukturen innerhalb der NATO und bei NATO-geführten Einsätzen erläutert. Anschließend wird der Tatbestand der Vorgesetztenverantwortlichkeit unter Berücksichtigung der Stellung eines Befehlshabers in einem multilateralen NATO-Einsatz, der Rolle des

truppenstellen den Staates, der Methoden der Befugnisübertragung sowie der de iure und de facto wirksame Kontrolle eines solchen Befehlshabers auf die ermittelten Strukturen angewandt. **The Legal Impact of Foreign Intervention in Civil Wars** Hackett Publishing Field manual (FM) 3-13 provides doctrinal guidance and directions for conducting inform and influence

activities (IIA) and discusses the importance of information in operational environments. It describes the Army's view of how IIA aid the commander to gain an advantage through information. It develops the other principles, tactics, and procedures detailed in subordinate doctrinal publications. The publication does not address every information-related capability

commanders can use to help shape their complex operational environments. It should, however, generate introspection and provide just enough guidance to facilitate flexibility and innovative approaches for commanders to execute the art of command to inform and influence. It also provides guidance to the staff to conduct IIA to achieve the desired effects that support the

commander's intent and objectives. Commanders designate an information-related capability and are only limited by available resources. The principal audience for FM 3-13 is commanders and staffs at all echelons of command, Army civilians, and government contractors. Commanders, staffs, and subordinates ensure their decisions and actions comply with applicable United States,

international, and, in some cases, host nation laws and regulations. Commanders at all levels ensure their Soldiers operate according to the law of war and the rules of engagement. (See FM 27-10.) FM 3-13 implements standardization agreement (STANAG) Allied Joint Publication (AJP)-3 (B). FM 3-13 uses joint terms where applicable. Selected joint and Army terms and

|   |   |  |
|---|---|--|
| <p>definitions appear in both the glossary and the text. Terms for which FM 3-13 is the proponent publication (the authority) have an asterisk (*) in the glossary. Definitions for which FM 3-13 is the proponent publication are boldfaced in the text. For other definitions shown in the text, the term is italicized and the number of the proponent publication follows the definition. FM 3-13 applies</p> | <p>to the Active Army, the Army National Guard (ARNG)/Army National Guard of the United States (ARNGUS), and the United States Army Reserve (USAR) unless otherwise stated. The proponent of FM 3-13 is the United States Army Combined Arms Center. The preparing agency is the Combined Arms Doctrine Directorate, United States Army Combined Arms Center. <u>NATO</u><br/><u>Cyberspace</u></p> | <p><u>Capability</u><br/>BRILL<br/>Drawing together key documents, case law, reports and other essential materials, International Humanitarian Law offers students, lecturers and practitioners an accessible and critically informed account of the theory, law and practice of international humanitarian law. Providing comprehensive, thematic and targeted coverage of national and international</p> |
|---|---|--|

cases and materials, this book successfully balances doctrine with practical application to help students understand how the theories are applied in practice and navigate through jurisprudence with ease. Employing a critical and targeted commentary throughout, this book also helps students to better understand the implications of the law and the challenges facing

international humanitarian law today including: cyber war, detention, direct participation in hostilities, human rights in armed conflict and terrorism. Suitable for advanced undergraduate and postgraduate students and practitioners, International Humanitarian Law offers a thematic and comprehensive treatment of the subject. **The Right to Life in Armed Conflict** Peter Lang

The concept that certain objects and persons may be legitimately attacked during armed conflicts has been well recognised and developed through the history of warfare. This book explores the relationship between international law and targeting practice in determining whether an object is a lawful military target. By examining both the interpretation and its post-

|  |  |  |
|--|--|--|
| <p>ratification application this book provides a comprehensive analysis of the definition of military objective adopted in 1977 Additional Protocol I to the four 1949 Geneva Conventions and its use in practice. Tackling topical issues such as the targeting of TV and radio stations or cyber targets, Agnieszka Jachec-Neale analyses the concept of military objective within the</p> | <p>context of both modern military doctrine and the major coalition operations which have been undertaken since it was formally defined. This monograph will be of great interest to students and scholars of international law and the law of armed conflict, as well as security studies and international relations. <i>Armed Conflict, Women and Climate</i></p> | <p><i>Change</i> DIANE Publishing This new and updated edition of <i>Understanding Naval Warfare</i> offers the reader an accessible introduction to the study of modern naval warfare, providing a thorough grounding in the vocabulary, concepts, issues, and debates, set within the context of relevant history. Navies operate in an environment that most people do not understand and that many</p> |
|--|--|--|

avoid. They are equipped with a bewildering range of ships, craft and other vessels and types of equipment, the purpose of which is often unclear. Writings on naval warfare are usually replete with references to esoteric concepts explained in specialist language than can serve as a barrier to understanding. The objective of this book, therefore, is to cut through the obscure and the arcane to offer

a clear, coherent and accessible guide to the key features of naval warfare which will equip the reader with the knowledge and understanding necessary for a sophisticated engagement with the subject. This second edition is divided into two key parts. The first focuses on concepts of naval warfare and introduces readers to the ideas associated with the theory and

practice of naval operations. It also includes a new chapter in which the history of the last century of naval warfare is explored in order to illustrate the key concepts. The second part focuses on the conduct of war at sea and on peacetime roles for contemporary navies. This latter section concludes with a chapter that looks ahead to the likely future of naval warfare. This textbook will be essential

reading for students of naval warfare, sea power and maritime security, and highly recommended for those studying military history, strategic studies and security studies in general.

*NATO Rules of Engagement*  
John Wiley & Sons

Most wars between countries end quickly and at relatively low cost. The few in which high-intensity fighting continues for years bring

about a disproportionate amount of death and suffering.

What separates these few unusually long and intense wars from the many conflicts that are far less

destructive? In *Logics of War*, Alex Weisiger tests three explanations for a nation's decision to go

to war and continue fighting regardless of the costs. He combines sharp statistical analysis of interstate wars over the

past two centuries with nine narrative case studies. He examines both well-known conflicts like World War II and the Persian Gulf War, as well as unfamiliar ones such as the 1864-1870 Paraguayan War (or the War of the Triple Alliance), which proportionally caused more deaths than any other war in modern history. When leaders go to war expecting easy victory, events usually correct their

misperception  
s quickly and  
with fairly low  
casualties,  
thereby  
setting the  
stage for a  
negotiated  
agreement. A  
second  
explanation  
involves  
motives born  
of domestic  
politics; as  
war becomes  
more intense,  
however,  
leaders are  
increasingly  
constrained in  
their ability to  
continue the  
fighting.  
Particularly  
destructive  
wars instead  
arise from  
mistrust of an  
opponent's  
intentions.  
Countries that

launch  
preventive  
wars to  
forestall  
expected  
decline tend  
to have  
particularly  
ambitious war  
aims that they  
hold to even  
when fighting  
goes poorly.  
Moreover, in  
some cases,  
their  
opponents  
interpret the  
preventive  
attack as  
evidence of a  
dispositional  
commitment  
to aggression,  
resulting in  
the rejection  
of any form of  
negotiation  
and a demand  
for  
unconditional  
surrender.

Weisiger's  
treatment of a  
topic of  
central  
concern to  
scholars of  
major wars  
will also be  
read with  
great interest  
by military  
historians,  
political  
psychologists,  
and  
sociologists.

|---|---|--|
| <p>Routledge Noam Zamir provides a thorough examination of the theoretical basis of classification of conflicts in international humanitarian law (IHL), with special focus on the legal impact of armed foreign intervention in civil wars. Classification of Conflicts in International Humanitarian Law enriches the discourse on IHL by providing an in-depth analysis of classification of conflicts and</p> | <p>examining recent civil wars with foreign interventions, such as the Libyan civil war (2011), Mali civil war (2012-2015) and the ongoing civil war in Yemen. Jeffrey Frank Jones Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are</p> | <p>trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process</p> |
|---|---|--|

for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical

questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendations on statements help clinicians to incorporate

recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and

easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use

assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation.

Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

presents recent research in the recognition of vulnerabilities of national systems and assets which gained special attention for the Critical Infrastructures in the last two decades. The book concentrates on R&D activities in the relation of Critical Infrastructures focusing on enhancing the performance of services as well as the level of security. The objectives of the book are based on a project entitled "Critical Infrastructure Protection Researches" (TÁMOP-4.2.1. B-11/2/KMR-2 011-0001) which concentrated on innovative UAV solutions, robotics, cybersecurity, surface engineering, and mechatronics and technologies providing safe operations of essential assets. This report is summarizing the methodologies and efforts taken to fulfill the goals defined. The project has been performed by the consortium of the Óbuda University and the National University of Public Service.

*Field Manual FM 3-13 Inform and Influence Activities January 2013*  
Springer

This book investigates the challenges related to civil-military cooperation (CIMIC) and offers a new perspective by examining the social role of NATO CIMIC soldiers. The intertwining of

the civilian and military spheres has become a significant part of the contemporary security environment. However, the relationship between the military and civilian actors is often troubled, filled with misunderstandings and rivalry. In their duty to provide a link between the military and diverse civilian environment, soldiers involved in CIMIC are exposed to varied, often-

conflicted expectations that make up their social role and put stress on their performance and the effectiveness of CIMIC. By drawing on analysis of NATO CIMIC documents and a series of interviews with CIMIC soldiers, the author is able to, first, identify the elements of the CIMIC role and, second, diagnose the inherent role conflict and describe methods of dealing with it. Looking at civil-military

cooperation through this lens reveals new layers of challenges that impact its effectiveness and a better way to understand the complexity of civil-military interaction. This book will be of much interest to students of military studies, military sociology, peacekeeping, security studies, and international relations, as well as military practitioners. *PSYCHOLOGICAL*

This book examines military and civilian actors in international interventions and offers a

new analytical framework to apply on such interventions.

While it is frequently claimed that success in international interventions hinges largely on military-civilian coherence, cooperation has proven challenging to achieve in practice. This book examines why this is the case, by analysing various approaches employed by military and civilian actors and discussing the different relationships

between the intervening actors and those upon whom they have intervened. The work analyses different military concepts, such as peacekeeping and counterinsurgency, and the often-troubled relationship between the humanitarian and military intervening actors. It presents a new analytical framework to examine these relationships based on identification theory, which

illuminates how the interveners represent those they have been deployed to engage, as well as their own identity and role. As such the book offers an enhanced

understanding of the challenges related to civil-military cooperation in international interventions, as well as a theoretical contribution to the study of interventions,

more generally. This book will be of much interest to students of international interventions, military studies, peacekeeping, security studies and International Relations.
