MfM ménage romance from USA Today bestselling author Julia Sykes Two darkly domineering alpha males. They say I don't have to choose. They both want me. Together. The three of us. I was meant to be theirs: Joseph, my sweet first love, and Marco, his sternly intimidating best friend. I know they're dangerous men, but being with them doesn't feel wrong. When they hold me in their arms, I feel safe, cherished. I'm still their captive, but I'm no longer certain if I want to be free of them. They swear they only kidnapped me for my own protection, and after a terrifying attack by one of their enemies, I'm starting to believe them. If I give myself to them, can my alluring criminal captors protect me? Or is their world too dangerous for even their strong arms to shield me from harm? Written in recognition of developments in spatial data analysis that focused on differences between places, the first edition of Local Models for Spatial Analysis broke new ground with its focus on local modelling methods. Reflecting the continued growth and increased interest in this area, the second edition describes a wide range of methods which account for local variations in geographical properties. What's new in the Second Edition: Additional material on geographically-weighted statistics and local regression approaches A better overview of local models with reference to recent critical reviews about the subject area Expanded coverage of individual methods and connections between them Chapters have been restructured to clarify the distinction between global and local methods A new section in each chapter references key studies or other accounts that support the book Selected resources provided online to support learning An introduction to the methods and their underlying concepts, the book uses worked examples and case studies to demonstrate how the algorithms work their practical utility and range of application. It provides an overview of a range of different approaches that have been developed and employed within Geographical Information Science (GIScience). Starting with first principles, the author introduces users of GISystems to the principles and application of some widely used local models for the analysis of spatial data, including methods being developed and employed in geography and cognate disciplines. He discusses the relevant software packages that can aid their implementation and provides a summary list in Appendix A. Presenting examples from a variety of disciplines, the book demonstrates the importance of local models for all who make

use of spatial data. Taking a problem driven approach, it provides extensive guidance on the selection and application of local models.

Britain's public (that is, its major independent) schools have a conspicuous role in the country's social system, and as a result are the subject of a long-standing political debate. The discussion is generally founded on a stereotyped image of what these school may have been like in the 1950s - this books shows how they were in the late 1980s. It is based on fieldwork in two major public boarding schools which the author conducted over an extended period, and draws on interviews, observation and documentary sources to establish a picture of what public school life is actually like for pupils and staff. Since the schools were predominantly male preserves, the major part of the book describes the social world and experiences of boys and schoolmasters. An important section of the book, however, discusses the introduction of girl pupils, the experiences of female teachers and the way schoolmasters' wives tend to be drawn into their husbands' work. Geoffrey Walford's conclusions about life in public schools differ considerably from traditional expectations. At the same time he asks whether there really has been a 'public school revolution'. His book makes an important contribution to our knowledge of public schools, to debates in the sociology of education and to the issues of abolishing or extending the independent sector.

Written as a technology guide for students, practitioners, and administrators, the focus of this book is on introducing current and future trends in library technology and automation within the larger context of strategic and systems planning, implementation, and continuous improvement. Technology is an essential resource for attaining both organizational and patron goals, and planning needs to emphasize the alignment between the clearly defined goals of each. For this alignment to occur on a consistent basis goals must be designed, or engineered, in a systematic fashion where technology fulfils the need to deliver the desired outcomes in an efficient, cost-effective manner. The

concept of usability engineering is also examined, where the technology is planned, designed, and implemented in such a way as to maximize utility and ease-of-use for users and employees. Readers of this book will understand both the why and the how of library technology, planning, and implementation articulated in a simple, easy-to-understand fashion. Delivered from academic, public, and school library media perspectives Current and emerging technologies are discussed along with their current and future application in the field of library and information science Technology planning and integration is explained using a systems design process with scenarios and case studies that are articulated in a step-wise, holistic fashion

Fushi no Kami: Rebuilding Civilization Starts With a Village Volume 4 Morgan James Publishing

This brief covers the unique crime group of Outlaw Motorcycle Gangs. Outlaw Motorcycle Gangs are adult criminal associations composed of "bikers" living a deviant lifestyle that includes individual, group, and club criminal behavior. These groups are sometimes called one percenters, due to the American Motorcycle Association statement that ninety-nine percent of motorcyclists are law abiding citizens. While many may be familiar with the reputation of the Hells' Angels, many may not realize the wide network of other Outlaw Motorcycle Gangs or the extent of their involvement in criminal activities. The brief includes a breakdown of the criminal networks and activities of these groups, which operate similarly to an organized crime group. It also covers the evolution of motorcycle clubs to motorcycle gangs. It examines the recent trend of American-based motorcycle gangs into international organized crime activities. This book will be of interest to researcher studying criminology, particularly organized crime and criminal networks, as well as international and comparative law and public policy.

The Solar League, humanity's empire, has existed since mankind reached for the stars. While the humans considered it the pinnacle of human achievement, for the subjugated alien races it seemed only to endorse humanity's worst impulses. But the worst of humanity pales in comparison to an alien onslaught that is on the verge of bringing mankind down into death and subjugation. Thracius "Tracy" Belmanor helps lead the Solar League's desperate defense against this new alien threat while the Empress of the Solar League, Mercedes, tries to keep the League from tearing apart. However, neither is prepared for the questions that need to be answered to save mankind and all of the human and non-human citizens of the League. Is humanity redeemable? Can the League reform into something better? Tracy and Mercedes must ask these questions of themselves and then decide the future of humanity while facing betrayals, ambition, and secrets that may bring about a dark age for the galaxy.
