Content and Language Integrated Learning (CLIL) is a transformative and powerful approach to language education and has had a significant impact on educational pedagogy in recent years. Despite burgeoning literature on the efficacy and implementation of CLIL, there remains a gap between CLIL and English Language Teaching (ELT). Many practitioners wonder how they can 'do CLIL' if their main classes are focused on English as a Foreign Language (EFL). This volume addresses these concerns by examining the experiences of various CLIL practitioners in the EFL context of Japan. Chapters outline the CLIL methodology, the differences in 'hard CLIL' (subject led) and 'soft CLIL' (language-oriented) before focusing on the EFL

interpretations of soft-CLIL. Although the distinction of hard CLIL and soft CLIL has been mentioned in several publications, this is the first book-length exploration of this issue, featuring chapters examining expectations, challenges, material support, implementation, and even motivation in CLIL classrooms. All of this culminates in a review of the potential and future of CLIL in EFL contexts, paving the way for more widespread and well informed implementation of CLIL all over the world.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B

Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a

young age and bring incredible results, proving that it's never too early to teach someone how to live well.
