New York, the city. New York, the magazine. A celebration. The great story of New York City in the past half-century has been its near collapse and miraculous rebirth. A battered town left for dead, one that almost a million people abandoned and where those who remained had to live behind triple deadbolt locks, was reinvigorated by the twinned energies of starving artists and financial white knights. Over the next generation, the city was utterly transformed. It again became the capital of wealth and innovation, an engine of cultural vibrancy, a magnet for immigrants, and a city of endless possibility. It was the place to be—if you could afford it. Since its founding in 1968, New York Magazine has told the story of that city's constant morphing, week after week. Covering culture high and low, the drama and scandal of politics and finance, through jubilant moments and immense tragedies, the magazine has hit readers where they live, with a sensibility as fast and funny and urbane as New York itself. From its early days publishing writers like Tom Wolfe, Jimmy Breslin, and Gloria Steinem to its modern incarnation as a laboratory of inventive magazine-making, New York has had an

extraordinary knack for catching the Zeitgeist and getting it on the page. It was among the originators of the New Journalism, publishing legendary stories whose authors infiltrated a Black Panther party in Leonard Bernstein's apartment, introduced us to the mother-daughter hermits living in the dilapidated estate known as Grey Gardens, launched Ms. Magazine, branded a group of up-and-coming teen stars "the Brat Pack," and effectively ended the career of Roger Ailes. Again and again, it introduced new words into the conversation—from "foodie" to "normcore"—and spotted fresh talent before just about anyone. Along the way, those writers and their colleagues revealed what was most interesting at the forward edge of American culture—from the old Brooklyn of Saturday Night Fever to the new Brooklyn of artisanal food trucks, from the Wall Street crashes to the hedge-fund spoils, from The Godfather to Girls—in ways that were knowing, witty, sometimes weird, occasionally vulgar, and often unforgettable. On "The Approval Matrix," the magazine's beloved back-page feature, New York itself would fall at the crossroads of highbrow and lowbrow, and more brilliant than despicable. (Most of the time.) Marking the magazine's fiftieth birthday, *Highbrow, Lowbrow, Brilliant, Despicable: 50 Years of New York* draws from all that coverage to present an enormous, sweeping, idiosyncratic picture of a half-century at the center of the world. Through stories and images of power and money, movies and food, crises and family life, it constitutes an unparalleled history of that city's transformation, and of a New York City institution as well. It is packed with behind-the-scenes stories from New York's writers, editors, designers, and journalistic subjects—and frequently overflows its own pages onto spectacular foldouts. It's a big book for a big town.

Bessie Pease Gutmann was a premier illustrator during the first half of the twentieth century. She embodies the feel and subject matter that has come to be associated with women illustrators of that period. This visual masterpiece contains more full-color photography of Gutmann's work than all other previous Gutmann publications, and is accompanied by the most complete pricing to her work ever offered. Some of the works shown are so rare that this book provides their only publication outside of hard-to-find antique art print catalogs. The magnificent imagery of this book will make it a wonderful addition to anyone's art library.

This is an authoritative and comprehensive history of the Fifty Years' war and the relationship that dominated world politics in the second half of the twentieth century. For fifty years relations between the United States and the Soviet Union were deciding factors in international affairs. Available for the first time in paperback, Richard Crockatt's acclaimed book is an examination of this relationship in its global context. It breaks new ground in seeking a synthesis of historical narrative and analysis of the global structures within which superpower relations developed. Attention is given to economic as well as political and military factors.

In 2021, Texas Country Reporter celebrates its fiftieth season on the air. Broadcast every week on stations across Texas, it focuses on "ordinary people doing extraordinary things." And at the center of it is Bob Phillips, the show's creator and host—an erstwhile poor kid from Dallas who ended up with a job that allowed him to rub elbows with sports figures, entertainers, and politicians but who preferred to spend his time on the back roads,

listening to less-famous Texans tell their stories. In this memoir, Phillips tells his own story, from his early days as a reporter and his initial pitch for the show while a student at SMU to his ongoing work at the longest-running independently produced TV show in American television history. As we travel with Phillips on his journey, we meet Willie Nelson and former Dallas Cowboys coach Tom Landry; reflect on memorable, unusual, and challenging show segments; experience the behind-the-scenes drama that goes on in local television; witness the launching of an annual festival; and discover the unbelievable allure of Texas, its culture, and, especially, its people. Spanning generations, *A Good Long Drive* is proof that life's journey really is a destination unto itself. *Earth's Next Fifty Years* U of Minnesota Press

A brilliant ensemble of the world's most visionary scientists provides twenty-five original never-before-published essays about the advances in science and technology that we may see within our lifetimes. Theoretical physicist and bestselling author Paul Davies examines the likelihood that by the year 2050 we will be able to establish a continuing human presence on Mars. Psychologist Mihaly Csikszentmihalyi investigates the ramifications of engineering high-IQ, genetically happy babies. Psychiatrist Nancy Etcoff explains current research into the creation of emotion-sensing jewelry that could gauge our moods and tell us when to take an anti-depressant pill. And evolutionary biologist Richard Dawkins explores the probability that we will soon be able to obtain a genome printout that predicts our natural end for the same cost as a chest x-ray. (Will we want to read it? And will insurance companies and governments have access to it?) This fascinating and unprecedented book explores not only the practical possibilities of the near future, but also the social and political ramifications of the developments of the strange new world to come. Also includes original essays by: Lee Smolin Martin Rees Ian Stewart Brian Goodwin Marc D. Hauser Alison Gopnik Paul Bloom Geoffrey Miller Robert M. Sapolsky Steven Strogatz Stuart Kauffman John H. A personal and expert account of the artists and events that defined the medium's first 50 years - now in paperback Since the introduction of portable consumer electronics nearly a half century ago, artists throughout the world have adapted their latest technologies to art-making. In this new paperback edition of her acclaimed book, curator Barbara London traces the history of video art as it transformed into the broader field of media art - from analog to digital, small TV monitors to wall-scale projections, and clunky hardware to user-friendly software. In doing so, she reveals how video evolved from fringe status to be seen as one of the foremost art forms of today.

Fifty Years of "The Battle of Algiers" *Fifty Years a Country Doctor* A collection of the articles written by the author throughout his extensive career, this book achieves three goals. First, it reprints selected research and theory papers on stress and coping from the 1950s to the present produced by Lazarus under five rubrics: his dissertation; perennial epistemological issues including the revolt of the 1940s and 1950s; his transition from laboratory to field research; the clinical applications of stress and coping; and

expanding stress to the emotions. Second, it provides a running commentary on the origination of the issues discussed, what was occurring in psychology when the work was done, and where the work led in the present. Third, it integrates various themes about which psychologists debate vociferously, often without recognizing the intellectual bases of these differences.

Martin Luther King's legacy for today's activists, fifty years after his death. Since his death on April 4, 1968, Martin Luther King's legacy has influenced generations of activism. Edited and with a lead essay by Brandon Terry, this volume explores what this legacy can and cannot do for activism in the present. King spent the months leading up to his death organizing demonstrations against the Vietnam War and planning the Poor People's Campaign, a "multiracial army of the poor" that would march on Washington in pursuit of economic justice. Thus the spring of 1968 represented a hopeful, albeit chaotic set of possibilities; King, along with countless other activists, offered both ethical and strategic solutions to the multifaceted problems of war, racism, and economic inequality. With a critical eye on both the past and present, this collection of essays explores that moment of promise, and how, in the fifty years since King's death, historical forces have shaped what we claim as a usable past in fighting the injustices of our time. Contributors Christian G. Appy, Andrew Douglas, Bernard E. Harcourt, Elizabeth Hinton, Samuel Moyn, Ed Pavlić, Aziz Rana, Barbara Ransby, Keeanga-Yamahtta Taylor, Brandon M. Terry, Jeanne Theoharis, Thad Williamson

We can count on one hand the musical legends equal to Elton John (the Beatles and the Rolling Stones each get a finger). Elton John: Fifty Years On looks at the impact songwriting partners Elton John and Bernie Taupin have had on popular music and culture, and also discusses every song on all thirty albums, plus his work on Broadway, in movies, and elsewhere. • Part 1 is a bullet-pointed look at every released song, complete with insights, trivia, and meanings, including musical insights—like Elton’s favorite chord progressions, or the most notable melodies in his discography. • Part 2 is a collection of essays and interviews with musicians and music writers chatting about Elton and Bernie. Did you know? • Elton and Bernie’s revision of “Candle in the Wind” (known as “Goodbye England’s Rose”), a tribute to Princess Diana after her untimely death, is the biggest-selling single in the UK and the second-biggest selling single in music history (after Bing Crosby’s “White Christmas”). • “Tiny Dancer” may or may not be about Bernie Taupin’s wife, Maxine...quotes from Elton and Bernie contradict each other. • The biggest music stars in the world routinely show up at Elton John concerts to sing duets with the Rocket Man, including Lady Gaga, Miley Cyrus, George Michael, Bruce Hornsby, Lionel Richie, Mary J. Blige, Bryan Adams, Demi Lovato, Shawn Mendes, and many more, as well as Elton’s legendary “dual” shows with Billy Joel • The background vocals for the song “White Lady White Powder” on the 21 at 33 album are sung by the Eagles. • The background vocals for the song “Cage the Songbird” on the Blue Moves album are sung by Graham Nash and David Crosby. (Stephen Stills must have been busy?) Elton John: Fifty Years On was written for ultimate Elton John fans. A browsing book, a reading book, a treasure trove of facts, trivia, insights, and commentary, it’s the perfect companion to Elton

leaving the Yellow Brick Road.

An Analysis of Historical and Perennial Issues John Wiley & Sons

An “informative and vividly reported book” that goes beyond the politics of climate change to explore practical ways we can adapt and survive (San Francisco Chronicle). Journalist Mark Hertsgaard has reported on global warming for outlets including the New Yorker, NPR, Time, and Vanity Fair. But it was only after he became a father that he started thinking about the two billion young people worldwide who will spend the rest of their lives coping with mounting climate disruption. In *Hot*, he presents a well-researched blueprint for how all of us—parents, communities, companies, and countries—can navigate this unavoidable new era. Reporting from across the nation and around the world, Hertsgaard provides examples of ambitious attempts to mitigate the effects of sea-level rise, mega-storms, famine, and other threats—and an “urgent message . . . that citizens and governments cannot afford to ignore” (The Boston Globe). “This readable, passionate book is surprisingly optimistic: Seattle, Chicago, and New York are making long-term, comprehensive plans for flooding and drought. Impoverished farmers in the already drought-stricken African Sahel have discovered how to substantially improve yields and decrease malnutrition by growing trees among their crops, and the technique has spread across the region; Bangladeshis, some of the poorest and most flood-vulnerable yet resilient people on earth, are developing imaginative innovations such as weaving floating gardens from water hyacinth that lift with rising water. Contrasting the Netherlands’ 200-year flood plans to the New Orleans Katrina disaster, Hertsgaard points out that social structures, even more than technology, will determine success, and persuasively argues that human survival depends on bottom-up, citizen-driven government action.” —Publishers Weekly “His analysis of the impact of global warming on industries as different as winemaking and insurance is intriguing, and his well-supported conclusion that social change can beat back climate change is inspiring . . . an exceptionally productive approach to a

confounding reality.” —Booklist “This is an important book.” —Bill McKibben

Fifty Years a Country Doctor Phaidon Press

The definitive story of the most controversial and longest surviving band in music history In order to accurately chronicle the human drama at the center of the Rolling Stones story, the author of this book has carried out interviews with band members, close family members (including Mick's parents), and the group's fans and contemporaries. He has even examined their previously unreleased FBI files. In 1962 Mick Jagger was a bright, well-scrubbed boy planning a career in the civil service, while Keith Richards was learning how to smoke and swivel a six-shooter. Add the mercurial Brian Jones (who'd been effectively run out of Cheltenham for theft, multiple impregnations, and playing blues guitar) and the wryly opinionated Bill Wyman and Charlie Watts, and the potential was obvious. During the 1960s and 70s the Stones were polarizing figures, alternately admired and reviled for their flamboyance, creativity, and salacious lifestyles. Confidently expected never to reach 30, they are now approaching their seventies, and have been together for 50 years. Like no other book before, this history makes sense of the rich brew of clever invention and opportunism, of talent, good fortune, insecurity, self-destructiveness, and of drugs, sex, and other excess, that made the Stones who they are.
