*The Anatomy of Evil*  
Prometheus Books  
The crimes of Charles  
Manson, Ted Bundy,  
Jeffrey Dahmer, John  
Wayne Gacy, Dennis  
Rader, and other high-

profile killers are so  
breathtakingly awful  
that most people would  
not hesitate to label  
them evil. In this  
groundbreaking book,  
renowned psychiatrist  
Michael H. Stone-host  
of Discovery Channel's  
former series Most Evil-  
uses this common

emotional reaction to horrifying acts as his starting point to explore the concept and reality of evil from a new perspective. In an in-depth discussion of the personality traits and behavior that constitute evil across a wide spectrum, Dr. Stone takes a clarifying scientific approach to a topic that for centuries has been inadequately explained by religious doctrines. Basing his analysis on the detailed biographies of more than 600 violent criminals, Stone has created a 22-level hierarchy of evil behavior, which loosely reflects the structure of Dante's *Inferno*. He traces two salient personality traits that run the gamut from those who commit crimes of passion to perpetrators of the

worst crimes—sadistic torture and murder. One trait is narcissism, as exhibited in people who are so self-centered that they have little or no ability to care about their victims. The other is aggression, the use of power over another person to inflict humiliation, suffering, and death. Stone then turns to the various factors that, singly or intertwined, contribute to pushing certain people over the edge into committing heinous crimes. They include heredity, adverse environments, violence-prone cultures, mental illness or brain injury, and abuse of mind-altering drugs. All are considered in the search for the root causes of evil behavior. What do

psychology, psychiatry, and neuroscience tell us about the minds of those whose actions could be described as evil? And what will that mean for the rest of us? Stone discusses how an increased understanding of the causes of evil will affect the justice system. He predicts a day when certain persons can safely be declared salvageable and restored to society and when early signs of violence in children may be corrected before potentially dangerous patterns become entrenched. Michael H. Stone, MD (New York, NY) is professor of

clinical psychiatry at the Columbia College of Physicians and Surgeons. He is the author of ten books, most recently *Personality Disorders: Treatable and Untreatable*, and over two hundred professional articles and book chapters. He is also the host of Discovery Channel's former series *Most Evil* and has been featured in the *New York Times*, *Psychology Today*, the *Christian Science Monitor*, *CNN*, *ABC News*, *CBS News*, *NBC News*, the *New York Post*, the *London Times*, the *BBAC*, and *Newsday*, among many other media outlets.
