*The Future of International Relations* Rowman & Littlefield

This handbook presents a comprehensive, concise and accessible overview of the field of Historical International Relations (HIR). It summarizes and synthesizes existing contributions to the field while presenting central themes, approaches and methodologies that have driven the development of HIR, providing the reader with a sense of the diversity and research dynamics that are at the heart of this field of study. The wide range of topics covered are grouped under the following headings: Traditions: Demonstrates the wide variety of approaches to HIR. Thinking International Relations Historically: Different ways of thinking IR historically share some common concerns and areas for further investigation. Actors, Processes and Institutions: Explores the processes, actors, practices, and institutions that constitute the core objects of study of many HIR scholars. Situating Historical International Relations: Critically reflects about the situatedness of our objects of study. Approaches: Examines how HIR scholars conduct and reflect about their research, often in dialogue with a variety of perspectives from cognate disciplines. Summarizing key contributions and trends while also sketching out challenges for future inquiry, this is an invaluable resource for students, academics and researchers from a range of disciplines, particularly International Relations, global history, political science, history, sociology, anthropology, peace studies, diplomatic studies, security studies, international political thought, political geography, international law.

This book distills the essential elements of world politics, both the enduring characteristics as well as the revolutionary changes that may be altering the very fabric of the centuries-old state system. Author J. Martin Rochester explores all the important topics that one would expect to find in an IR text (war, diplomacy, foreign policy, international law and organization, the international economy, and more) but injects fresh perspectives on how globalization and other contemporary trends are affecting these issues. In addition, the author does so through a highly engaging, lively writing style that will appeal to today's students. Fundamental Principles of International Relations is a tightly woven treatment of international politics past and present, drawing on the latest academic scholarship while avoiding excessive jargon and utilizing pedagogical aids while avoiding clutter. Rochester ultimately challenges the reader to think critically about the future of a post-Cold War and post-9/11 world that is arguably more complex, if not more dangerous, than some previous eras, with the potential for promise as well as peril.

*Barack Obama and the Arab Spring* SAGE

This book presents an analysis of how metaphors are essential elements in the study of international relations. It acknowledges the fact that theory and practice in international relations often rest on common metaphorical concepts which have implications for the ways people around the world pursue their lives. Because of the increased attention metaphors have received as integral elements in political discourse, there is a need to investigate metaphorical concepts that are not neutral in their implications for understanding international relations. Inasmuch as government policy is shaped by metaphorical concepts that originate in the academic realm, and given that scholarly works are therefore partially involved in inspiring policy, the author subjects a range of metaphors in international relations theory to critical interrogation.

International Relations: Perspectives and Controversies offers an innovative approach to this introductory course. Each of the topical chapters covers an enduring and important debate in the field and examines how political actors or political thinkers explain and defend their different opinions. This format offers the students the chance to understand important issues in International Relations as dynamic struggles over resources and power. Each chapter is structured in four parts. The first part provides a historical overview of the issue, its origins, evolution, and current status. The middle two sections of each chapter map out the opposing or contrasting points of view within the debate. These debates are followed by an evaluation of the merits of each position and the scholarly and political assessment of the situation. The goal of the text is to help students think systematically and critically about international affairs. By distilling the discussion from a variety of viewpoints (rather than simply providing articles by scholars who disagree), the author highlights meaningful distinctions among differing political positions in a way that helps students understand not only the headlines from today and yesterday, but more importantly, those from tomorrow. New! The text has been reorganized to present the discussion of power politics (Chapter 3) before the coverage of war and human nature (Chapter 5). New! Expanded coverage of IOs/NGOs includes the European Union as related to security amidst anarchy (Chapter 3) and the role of Amnesty International and other NGOs in human rights activism (Chapter 10). New! Expanded and updated coverage of the "Clash of Civilizations" in Chapter 12 is found both in the body of the chapter and in the Points of View readings at the end of the chapter. New! Updated Points of View readings, which present primary sources such as official foreign policy statements, government documents, news stories, debate transcripts, and editorials, expand on the chapter discussions. New topics include "Should We Practice Free Trade in Agriculture?"; "Does Foreign Aid Promote Development?"; "Can a Nuclear Iran be Deterred?"; and "Did 9/11 Reflect a Clash of Civilizations?". Marginal glossary allows students to access key terms without interrupting their reading. End-of-chapter pedagogy includes bulleted chapter summaries, a list of key terms with page numbers, suggestions for further reading, critical-thinking questions, endnotes, and references to relevant web sites.

In Barack Obama and the Arab Spring: A Successful Balancing Act of Foreign Policy and Diplomacy, Ahmed Zohny develops a well-blended marriage of history and political theories of U.S. foreign policy, diplomacy, public diplomacy, and national security. In this interdisciplinary research, he uses data and findings from both the Arabic and English languages by genealogically examining President Obama's foreign policy and diplomacy in response to the chronology of the unfolding events of the 2011 Arab Spring in Tunisia, Egypt, Libya, Syria, Bahrain and Yemen. President Obama and his top diplomats' performances in response to each country's events are assessed, critically analyzed, and compared to one another in terms of the U.S. bilateral relations with each country, U.S. national interests, and her strategic goals in the Middle East region. The findings of this research indicate that President Obama's foreign policy and public diplomacy toward the Arab Spring proved to be a successful balancing act, prudent and in the best national interests of the United States in the Middle East.

In fields such as politics, international relations, public administration and international law, there is a rapidly growing interest in the topic of 'accountability'. In this innovative new work, Steele shows how we might recognize how an alternative form of accountability in global politics has been present for some time, and that, furthermore, this form's continued presence remains one of the most politically powerful, if not enduring, possibilities for resistance in the near future. This book argues that the physical and visually shocking outcomes of violence found on the bodies of humans, as well as the buildings and landscapes which surround us, specifically the scars they leave behind, remain one of our most compelling forms of accountability. Steele develops the theoretical argument on scars and exteriority utilizing insights from several philosophical and theoretical resources including Hannah Arendt, Erving Goffmann, and Richard Rorty. The work examines scars and their effects through several illustrations, including the accounts of Emmett Till, Iranian protestor Neda Agha-Soltan, the Syrian boy Hamza al-Khateeb, the massacre in WWII and then memorializing throughout the 20th century of the Lidice children in the modern-day Czech Republic, the particular architecturally destructive

outcomes of the 2008-9 Gaza War, the loss of the Twin Towers in New York, as well as a variety of violent scars found on the landscapes of Europe and Southeast Asia. Emphasizing the importance of the space and 'time' of scars, the book illustrates how an alternative form of accountability in the scar can be a useful, disruptive, spontaneous, but also creative practice to challenge the discourses of violence which remain with us today.

Many saw the United States' decisive victory in Desert Storm (1991) as not only vindication of American defense policy since Vietnam but also confirmation of a revolution in military affairs (RMA). Just as information-age technologies were revolutionizing civilian life, the Gulf War appeared to reflect similarly profound changes in warfare. A debate has raged ever since about a contemporary RMA and its implications for American defense policy. Addressing these issues, *The Iraq Wars and America's Military Revolution* is a comprehensive study of the Iraq Wars in the context of the RMA debate. Focusing on the creation of a reconnaissance-strike complex and conceptions of parallel or nonlinear warfare, Keith L. Shimko finds a persuasive case for a contemporary RMA while recognizing its limitations as well as promise.

The Book takes the approach of a critique of the prevailing international environmental law-making processes and their systemic shortcomings. It aims to partly redesign the current international environmental law-making system in order to promote further legislation and more effectively protect the natural environment and public health. Through case studies and doctrinal analyses, an array of initial questions guides the reader through a variety of factors influencing the development of International Environmental Law. After a historical analysis, commencing from the Platonic philosophy up to present, the Book holds that some of the most decisive factors that could create an optimized law-making framework include, among others: progressive voting processes, science-based secondary international environmental legislation, new procedural rules, that enhance the participation in the law-making process by both experts and the public and also review the implementation, compliance and validity of the science-base of the laws. The international community should develop new law-making procedures that include expert opinion. Current scientific uncertainties can be resolved either by policy choices or by referring to the so-called „sound science.“ In formulating a new framework for environmental lawmaking processes, it is essential to re-shape the rules of procedure, so that experts have greater participation in those, in order to improve the quality of International Environmental Law faster than the traditional processes that mainly embrace political priorities generated by the States. Science serves as one of the main tools that will create the next generation of International Environmental Law and help the world transition to a smart, inclusive, sustainable future.

**Fundamental Principles of International Relations** Routledge

This book presents the state of the art of international relations theory through an analysis of the work of twelve key contemporary thinkers; John Vincent, Kenneth Waltz, Robert O. Keohane, Robert Gilpin, Bertrand Badie, John Ruggie, Hayward Alker, Nicholas G. Onuf, Alexander Wendt, Jean Bethke Elshtain, R.B.J. Walker and James Der Derian. The authors aim to break with the usual procedure in the field which juxtaposes aspects of the work of contemporary theorists with others, presenting them as part of a disembodied school of thought or paradigm. A more individual focus can demonstrate instead, the well-rounded character of some of the leading oeuvres and can thus offer a more representative view of the discipline. This book is designed to cover the work of theorists whom students of international relations will read and sometimes struggle with. The essays can be read either as introductions to the work of these theorists or as companions to it. Each chapter attempts to place the thinker in the landscape of the discipline, to identify how they go about studying International Relations, and to discuss what others can learn from them.
