Affective Factors Influence Classroom Learning

Mindful of this peril, the writer presents in this paper a review of some research on the influence of affective factors on classroom learning. A frame of reference is presented first. This is followed by a review of research on teacher-learner affective characteristics and interactions, and some concluding remarks.

[PDF] **Affective Factors Influence Classroom Learning** ...In the classroom Affective factors may be as important for successful language learning, if not more so, than ability to learn. Teachers can reduce negative factors and develop positive ones by doing activities to build a positive group dynamic, by including students in deciding aspects of the course and choosing activities that are motivating for the age and interests of the learners.

Affective factors | Teaching English | British Council | BBC

The article examines the influence of affective factors on classroom learning. Different patterns of intellect, motivation, personality and environment may result in productive thinking. Some of the factors affecting teacher-learning processes include learner characteristics, teacher characteristics, learner and teacher behaviors, group characteristics and physical characteristics of the behavioral setting.

Affective Factors Influence Classroom Learning

Creating classroom environments that act intentionally to lower the affective filter will increase language development. The lower the filter, the more input is allowed to pass

through. Students who are highly motivated, feel confident, and feel safe are more open to input. Let's picture two classrooms:

What Is the Affective Filter, and Why Is it Important in ...

In brief, this aspect of learning focuses on how learners feel about their learning and the course environment. Motivations and attitudes have been extensively studied in educational psychology. As you can see from the student videos, their motivations, attitudes and feelings influence their learning experience.

Motivational & Affective Factors

Learning factors: Factors owing to lack of mastery of what has been taught, faulty methods of work or study, and narrowness of experimental background may affect the learning process of any pupil. If the school proceeds too rapidly and does not constantly check up on the extent to which the pupil is mastering what is being taught, the pupil accumulates a number of deficiencies that interfere with successful progress.

7 **Important Factors that May Affect the Learning Process**

Classroom set-up and environment are not the only factors, which affect learning. Self-esteem plays a major role in how students perform in school. Children who feel good about themselves tend to have an easier time handling conflict, resisting negative influences and remaining optimistic.
