A compendium of lectures given by Dr. Borland on those homeopathic remedies most commonly

used for the digestive tract. For those with some previous experience.

Materia Medica Pura

Oxford University Press,
USA

The perpetual challenge of all students of homoeopathy, whether beginner or experienced, is the overwhelming volume of detailed symptoms in our Material Medicas. We constantly strive to simplify the information, to sort out the clinically useful from the non-distinguishing and general symptoms, to grasp in a single picture

the essential features of the remedy.

Compounding this difficulty is the fact that most of our sources belong to another era in time, the rapid changes and unique pressures of modern society have brought forth new facets of our remedies, and even well known symptoms are expressed in a modern idiom which obscures their relationship to the material in older texts. This task of separating the truly essential from the common place and adapting the form to

present day expression, has been approached by Roger Morrison with characteristic dedication. *Low Back Pain Syndrome* Editions Prosveta
An ideal quick reference for primary care providers, specialists, and trainees, this accessible resource offers up-to-date assessment and management solutions for the entire range of rheumatologic diseases. Current Rheumatology Diagnosis & Treatment Springer Science & Business Media
Rheumatology in Practice

offers chapters which are organised and built around anatomical and regional syndromes, so reinforcing the evidence-based approach. As readers progress through the text they are given more demanding and challenging questions, encouraging them to use their diagnostic skills to identify the main syndromes and the underlying diseases responsible for the disorders in question. The text is lavishly illustrated in full colour, with detailed photos of patient

examinations, complemented by radiographs and full colour line illustrations. The text also benefits from the use of summaries using coloured boxing to identify key points in diagnosis and management. Written by two of the most respected clinicians in the discipline, this book will be essential reading for rheumatologists in practice and training.

Although more widely

utilized in Europe and other parts of the world, musculoskeletal ultrasound is gaining wider acceptance in this country not only because of its ability to image anatomic structures but also because of its low cost compared with magnetic resonance. Reviewed in this issue is imaging of common tendon and muscle injuries of the upper and lower extremities, the rotator cuff, musculoskeletal infections, nerve abnormalities, soft tissue

masses, and hernias among others. Also covered are the use of ultrasound in joint aspiration and percutaneous interventional procedures. *Samuel Hahnemann; His Life and Work, Based on Recently Discovered State Papers, Documents, Letters, Etc (Volume I)* Profile Books
 Guest edited by Drs. Jonathan Kay and Sergio Schwartzman, this issue of *Rheumatic Disease Clinics* will cover Controversies in Rheumatology. This issue

is one of four selected each year by our series Consulting Editor, Dr. Michael Weisman of Cedars-Sinai. Articles explore several questions, including, but not limited to: Is triple therapy or methotrexate plus a biologic the initial treatment of choice for RA patients; Is hypo or hyper-uricemia a risk requiring treatment for cardiac morbidity and mortality; Are there benefits and risks to biosimilars from a patient perspective; Should platelet-rich plasma be used to treat

osteoarthritis; Is there a role for stem cell therapy to treat cartilage defects in osteoarthritis; Should any rheumatology patient, today, be treated with bone marrow ablation and stem cell transplantation; Is there effective prevention, prophylaxis, or treatment for CPPD arthritis; Is fibromyalgia a psychiatric disease or a pain syndrome; Should cyclophosphamide still be used to treat ANCA-associated vasculitis; Does methotrexate have a place in the treatment of psoriatic arthritis;

Should hydroxychloroquine dosing be limited because of potential ocular toxicity; and Should generalized immunosuppression or targeted organ treatment be the best principle for overall management of SLE.

Presentation Learning to feed consciously. No matter what type of diet you are on, the most important thing is to know how to eat mindfully. The inner state in which we absorb food and the interest we take in our actions during meals are then reflected on us. Discover how to draw

subtle energies from nutrition that will allow us to better accomplish all our activities afterwards. 'Millions of years before physicists developed atomic fission, humans performed it every day in their own bodies. And they continue to realize it, for nutrition is nothing more than a process of the disintegration of matter. Eating is learning to break down matter and distribute the energy thus

extracted in all organs: lungs, heart, brain ... Chewing food slowly and for a long time is a first step in this disintegration. The second stage is the work of the thought which, like an extremely penetrating ray, penetrates to the heart of matter from which it releases the most subtle energies in order to support the work of soul and spirit.'
