## COMPTON WARREN

---

**Scottish Geographical Magazine** Boolarong Press  
New York Times best-selling author and primatologist Frans de Waal explores the fascinating world of animal and human emotions. Frans de Waal has spent four decades at the forefront of animal research. Following up on the best-selling *Are We Smart Enough to Know How Smart Animals Are?*, which investigated animal intelligence, *Mama's Last Hug* delivers a fascinating exploration of the rich emotional lives of animals. *Mama's Last Hug* begins with the death of Mama, a chimpanzee matriarch who formed a deep bond with biologist Jan van Hooff. When Mama was dying, van Hooff took the unusual step of visiting her in her night cage for a last hug. Their goodbyes were filmed and went viral. Millions of people were deeply moved by the way Mama embraced the professor, welcoming him with a big smile while reassuring him by patting his neck, in a gesture often considered typically human but that is in fact common to all primates. This

story and others like it form the core of de Waal's argument, showing that humans are not the only species with the capacity for love, hate, fear, shame, guilt, joy, disgust, and empathy. De Waal discusses facial expressions, the emotions behind human politics, the illusion of free will, animal sentience, and, of course, Mama's life and death. The message is one of continuity between us and other species, such as the radical proposal that emotions are like organs: we don't have a single organ that other animals don't have, and the same is true for our emotions. *Mama's Last Hug* opens our hearts and minds to the many ways in which humans and other animals are connected, transforming how we view the living world around us.

Fockleyr Manninagh as Baarlagh, currit magh fo chiarail I. Gill. [With] An English and Manx dictionary, prepared from dr. Kelly's triglot dictionary, with alterations and additions, by W. Gill and J.T. Clarke Lasting Longer

It is 1934, and Mary Elizabeth Barrett is the youngest of four growing up in Benkleman, Kansas. In a town where there are few secrets, it is quite a surprise when her father, George, uses his

wife's jelly-making money to buy a secondhand touring car and announces they are moving to California. Despite his wife Ruth's protests, the touring car is packed in a week's time. Whether they like it or not, the family is on their way to a new beginning. Five days later, after the family stops in Minton, Colorado, for lunch, Mary Elizabeth's father hops in the old touring car and tells them he will be right back. While the sun lowers in the sky, Ruth finds a note from George in her pocketbook, telling her that although he has decided to head to California alone, he will be back to get them all eventually. With just over one hundred dollars to their name, Ruth and her four children make a decision: they will stay in Minton. As Mary Elizabeth and her family begin anew, they soon realize that happiness comes in the simplest of moments as they learn to look at challenges as stepping stones and face the harsh reality that George may never return. *The Last Apple on the Tree* is a story of trials, perseverance, and family togetherness as a mother and her four children find beauty in their own little garden of life.

Editorial Reviews According to Dr. Stacy L. Elliott, MD, the medical director at Vancouver Hospital's BC Center for Sexual Medicine, *Lasting Longer* has been instrumental in sexual education and treating sexual dysfunction for many years. She says: He was before his time in his thinking and experience has proven him to be right. We have used Dr. Silverberg's *Lasting Longer* faithfully for the twenty-five years of our history. His

newer version is even easier to understand, has more directed exercises, and is even more positive and encouraging than his original version. We are very grateful for his assistance all these years. Dr. Elliott is also a professor at the UBC Department of Psychiatry's Division of Sexual Medicine. She is a well-recognized expert in the field of male sexual dysfunction and has been the Chair of the Canadian Male Sexual Health Council. *Product Description Lasting Longer* was written by Dr. Sy Silverberg, an MD/Certified Sex Therapist with 40 years experience. It was first published in 1978. Since then it has been distributed only to professionals who have used it to help thousands of men, worldwide, to learn how to control ejaculation. It was revised in 2010 and rewritten so that any man can understand it without the support of a therapist. This was done in part to combat the professed online cures being offered to men at exorbitant prices. For the most part these solutions are useless and in some cases even harmful. And since the answer to controlling ejaculation lies in learning, these sprays, herbs, vitamins, dietary supplements and drugs will not help you learn to control premature ejaculation any more than they could help you learn to speak another language. Time has proven my belief that P.E. is so prevalent simply because young men have never been taught how to control ejaculation, he explains. Dr. Silverberg equates the learning process to learning bladder control. *Lasting Longer* leads men step-by-step through a series of exercises designed to teach them how to recognize the signals from their bodies that indicate they are approaching the point of no return. They, then learn how to control the reflex that triggers ejaculation. Exactly the same way they learned to control the reflex that triggers

urination. He believes that any man who was toilet-trained can learn ejaculatory control. Lasting Longer stands out from other publications on the topic in that it does not present page after page of historical data, statistics, demographics, scientific jargon or entertaining clinical examples. Instead it uses clear and concise language to outline only the steps necessary to correct the problem. In addition it offers concrete suggestions for developing a satisfying long-term sexual relationship with a partner of either gender. Excerpts of the book may be viewed at: <http://sextherapy-prematureejaculation.com>. Dr. Silverberg says: "I imagine that many of you have had the experience of spending hundreds of dollars on 'cures' that have not worked. For your own sake please try this approach. If you are not able to learn how to control ejaculation to your satisfaction, I will refund the full purchase price to you."

**Washington Medical Annals** Dr. Sy Silverberg M.D.

Did you know that the clitoris has 8000 nerve endings, twice as many as the penis? Here is everything you've wondered about the female orgasm and how to make it happen. A witty, well-researched and revealing guide to giving your lover an orgasm every time. More than just foreplay, Ian Kerner argues that oral sex is the key to a great sex life for both partners. Short sections cover philosophy, technique, step-by-step instructions and detailed anatomical information, essential to both beginners and experienced lovers. It's time to close the sex gap and create a level playing field in the exchange of pleasure, and cunnilingus is far more than just a means for achieving this noble end; it's the cornerstone of a new sexual paradigm, one that exuberantly extols a shared experience of pleasure, intimacy, respect and

contentment. It's also one of the greatest gifts of love a man can bestow upon a woman.' Ian Kerner

Alf Howard sailed with legends of the heroic era of Antarctic exploration and became a legend in his own lifetime. He was the last surviving member of Sir Douglas Mawson's 1929-1931 British, Australian and New Zealand Antarctic Research Expedition (BANZARE) and was also the last survivor to have served aboard the coal-fired three-masted wooden ship Discovery, built for Captain Robert Falcon Scott's 1901-1904 Antarctic odyssey. As a young chemist and hydrologist on board the Discovery, going south with Mawson was the catalyst for his long-distinguished career with the Commonwealth Scientific and Industrial Research Organisation (CSIRO). Subsequently, at the University of Queensland, he was awarded degrees in physics and linguistics and completed a PhD in psychology. For more than twenty years he designed computer programs and provided statistical advice to postgraduate students and staff until he was 97. The call of Antarctica was too strong to resist and during the 1990s he returned four times.
